- D) The Decision Runner server

### Answer:

---

B

## Question 2

---

**Question Type:** MultipleChoice

---

Which rule engine execution mode is designed to optimize a large numbers of objects?

A Faslpalh

**Options:**

---

**B)** RetePlus

**C)** Sequential

**D)** Ciassic Engine

**Answer:**

---

D

## Question 3

---

**Question Type: MultipleChoice**

---

GoodCreditLoans is a financial company that wants to create an automated loan approval application. They currently have an application that uses hard-coded logic and manual checks to assess loan applications, generate payment reminders, send marketing emails to potential clients, and create monthly sales reports.

The existing application uses these entities: MarketingContact. Equipment. Loan, Reminder. Applicant. SalesReport

Here are some example rules harvested during rule discovery for the new automated loan approval application:

if the amount of the loan is less than \$10,000,000.00 then the loan is rejected

If the amount of the loan is equal to or more than \$10,000,000.00 and the applicant's monthly salary is greater than \$175,000.00 then the loan is accepted

What two entities are needed to write the loan approval business rules?

**Options:**

---

- A) Loan
- B) Reminder
- C) Applicant
- D) SalesReport
- E) MarketingContact

**Answer:**

---

D, E

## Question 4

---

**Question Type:** MultipleChoice

---

Which rule engine execution mode is designed to optimize a large numbers of objects?

A Faslpalh

**Options:**

---

B) RetePlus

C) Sequential

D) Ciassic Engine

**Answer:**

---

D

## Question 5

---

**Question Type:** MultipleChoice

---

What has to be selected or defined when running a simulation in Decision Center?

**Options:**

---

- A) JDBC Connection
- B) The Cluster JVM
- C) Output Folder for Result
- D) The Decision Runner server

**Answer:**

---

B

## Question 6

---

**Question Type: MultipleChoice**

---

GoodCreditLoans is a financial company that wants to create an automated loan approval application. They currently have an application that uses hard-coded logic and manual checks to assess loan applications, generate payment reminders, send marketing emails to potential clients, and create monthly sales reports.

The existing application uses these entities: MarketingContact. Equipment. Loan, Reminder. Applicant. SalesReport

Here are some example rules harvested during rule discovery for the new automated loan approval application:

if the amount of the loan is less than \$10,000,000.00 then the loan is rejected

If the amount of the loan is equal to or more than \$10,000,000.00 and the applicant's monthly salary is greater than \$175,000.00 then the loan is accepted

What two entities are needed to write the loan approval business rules?

**Options:**

---

- A) Loan
- B) Reminder
- C) Applicant
- D) SalesReport
- E) MarketingContact

**Answer:**

---

D, E
