### Answer:

---

C, D

### Explanation:

---

<https://cloud.ibm.com/docs/solution-tutorials?topic=solution-tutorials-tutorials>

Install must-have tools to be productive with IBM Cloud:

IBM Cloud CLI- the command line interface to interact with IBM Cloud API.

Docker- to deliver and run software in packages called containers.

kubectl- a command line interface for running commands against Kubernetes clusters.

oc- manages OpenShift applications, and provides tools to interact with each component of your system.

Helm 3- helps you manage Kubernetes applications --- Helm Charts help you define, install, and upgrade even the most complex Kubernetes application.

Terraform- automates your resource provisioning.

jq- a lightweight and flexible command-line JSON processor.

Git- a free and open source distributed version control system.

## Question 6

---

**Question Type:** MultipleChoice

---

Which IBM Cloud service can automate the provisioning of IBM Cloud resources?

**Options:**

---

- A- Functions
- B- Coligo
- C- Skytap
- D- Schematics

**Answer:**

---

C

## Question 7

---

**Question Type:** MultipleChoice

---
