Question 1

When all objects stored in IBM Cloud Object Storage are encrypted using Server-Side Encryption with Customer Provided Keys (SSE-C), how are read and write object requests sent?

Options:

A- Send encryption information as part of UID/PWD verification

B- Send the required encryption information as part of SSL requests

C- Have their requested UID/PWD verified prior to HTTP request flow

D- Send the required encryption information as headers in the HTTP requests only

Answer:

B

Question 2

What's the correct architectural network topology in IBM Cloud?

Options:

A- Region > VPC > Zone > Subnet

B- VPC > Zone > Region > Subnet

C- VPC > Region > Zone > Subnet

D- Region > Zone > VPC > Subnet

Answer:

D

Question 3

Question Type: **MultipleChoice**

What are two benefits of using IBM Cloud Container Registry?

A- ILMT is built-in to ensure compliance with IBM Licensing terms

B- Set up your own single-tenant image namespace in a highly available, scalable, encrypted private registry that is hosted and managed by IBM

C- Store your private images and share them with users in your IBM Cloud account

D- The built-in Vulnerability Advisor feature that scans for potential security issues and vulnerabilities I

E- Benefit from unlimited free storage and pull traffic to your private images for an unlimited term

Answer:

C, D

Question 4

Question Type: MultipleChoice

What is meant by the practice of Continuous Integration?

Options:

A- Automating the process that moves software through the software development lifecycle

B- Frequently committing code to prevent significant drift and competing changes

C- Automating data change replication between data sources at short intervals, for example, every 5 minutes via synchronous or asynchronous methods

D- A technique in which application logs are constantly tailed and records are forwarded to a central console
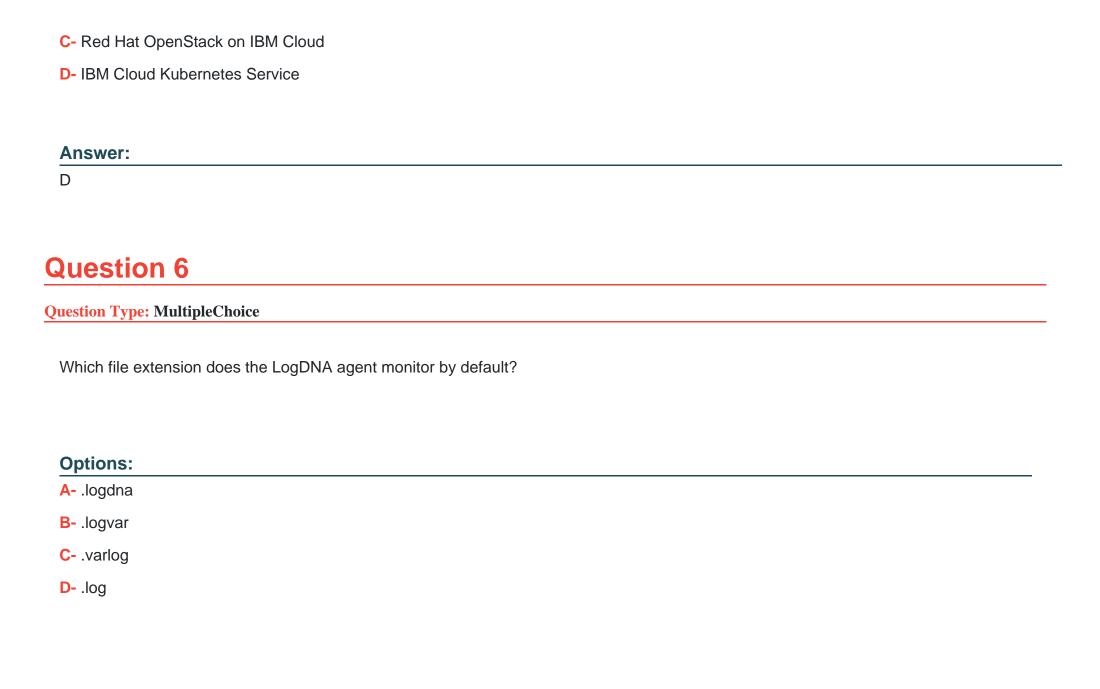

Answer:

C

Question 5

Question Type: **MultipleChoice**

Which of the following IBM Cloud services is integrated with Certificate Manager?

Options:

A- IBM Cloud for Power Solutions

B- IBM Bare Metal Server

C- Red Hat OpenStack on IBM Cloud

D- IBM Cloud Kubernetes Service

Answer:

D

Question 6

Question Type: **MultipleChoice**

Which file extension does the LogDNA agent monitor by default?

Options:

A- .logdna

B- .logvar

C- .varlog

D- .log

Answer:

D

Question 7

Question Type: MultipleChoice

A retail company has issued an RFP to transform an existing on premise publicly accessible application to Cloud Native using IBM Kubernetes Service and Cloud Internet Services. The customer brought up an additional non-functional requirement around performance at the edge. It is explained that the solution will be able to accommodate the concern without additional service.How is this possible?

Options:

A- IKS can scale across the globe

B- IKE provides a built in Content Delivery Network

C- Cloud Internet Service has Page Rules

D- Cloud Internet Server has a 32TB Network

Answer:

D

Question 8

What is IBM Cloud Functions?

Options:

A- An IBM Cloud service for implementing multi-stage business processes involving users and systems

B- polyglot functions-as-a-service (FaaS) programming platform for lightweight code that executes on demand

C- A capability of Cloudant for triggering an action as data is updated, for example, sending data updates to systems

D- The low-code/no-code development environment for data replication and systems integration in App Connect

Answer:

B
