Question 1

Question Type: MultipleChoice

What is a valid alternative for a client who wants to store a large number of documents in a database in IBM Cloud?

Options:

- A- Leverage a SQL database such as PostgreSQL
- B- Leverage a NoSQL database such Elasticsearch
- C- Leverage a NoSQL database such as Cloudant
- D- Leverage a SQL database such as DB2

Answer:

C

Question 2

Question Type: MultipleChoice

What is a resource group in IBM Cloud?

Options:

- A-** A set of provisioned services labeled with the same tag
- B-** A group of resources that can be created on demand using a Terraform script
- C-** Application resources that have been placed in the same zone
- D-** A way to organize a set of account resources so users' access can be quickly assigned

Answer:

D

Question 3

Question Type: MultipleChoice

Which Virtual Private Cloud (VPC) component is used to connect a subnet to the public internet?

Options:

- A- A VPN gateway
- B- A transit gateway
- C- A public gateway
- D- A floating ip address

Answer:

C

Question 4

Question Type: MultipleChoice

What is true of a Virtual Private Cloud (VPC)?

Options:

- A- It can communicate with other Virtual Private Clouds (VPCs) through a public gateway

- B-** It is deployed to a single region but cannot span zones
- C-** It can only be deployed to single zone regions
- D-** It is deployed to a single region and can span zones

Answer:

D

Question 5

Question Type: MultipleChoice

A web application is being delivered for a regional shoe store to handle orders for delivery. Most of the application is deployed on public cloud, but requires completed orders to be routed to a centralized system on-premises for the warehouse to coordinate orders.

Key requirements of this integration are that messages are delivered without duplicates, it handles connectivity issues, and the data is encrypted end-to-end. Which IBM solution is suited for this use case?

Options:

A- IBM API Connect

- B- IBM MQ
- C- IBM Aspera
- D- IBM Event Streams

Answer:

B

Question 6

Question Type: MultipleChoice

Which Virtual Private Cloud (VPC) component is used to connect a subnet to the public internet?

Options:

- A- A VPN gateway
- B- A transit gateway
- C- A public gateway
- D- A floating ip address

Answer:

C

Question 7

Question Type: MultipleChoice

What is true of a Virtual Private Cloud (VPC)?

Options:

- A-** It can communicate with other Virtual Private Clouds (VPCs) through a public gateway
- B-** It is deployed to a single region but cannot span zones
- C-** It can only be deployed to single zone regions
- D-** It is deployed to a single region and can span zones

Answer:

D

Question 8

Question Type: MultipleChoice

A web application is being delivered for a regional shoe store to handle orders for delivery. Most of the application is deployed on public cloud, but requires completed orders to be routed to a centralized system on-premises for the warehouse to coordinate orders.

Key requirements of this integration are that messages are delivered without duplicates, it handles connectivity issues, and the data is encrypted end-to-end. Which IBM solution is suited for this use case?

Options:

- A- IBM API Connect
- B- IBM MQ
- C- IBM Aspera
- D- IBM Event Streams

Answer:

B

Question 9

Question Type: MultipleChoice

What is a valid alternative for a client who wants to store a large number of documents in a database in IBM Cloud?

Options:

- A- Leverage a SQL database such as PostgreSQL
- B- Leverage a NoSQL database such Elasticsearch
- C- Leverage a NoSQL database such as Cloudant
- D- Leverage a SQL database such as DB2

Answer:

C

Question 10

Question Type: MultipleChoice

What is a resource group in IBM Cloud?

Options:

- A-** A set of provisioned services labeled with the same tag
- B-** A group of resources that can be created on demand using a Terraform script
- C-** Application resources that have been placed in the same zone
- D-** A way to organize a set of account resources so users' access can be quickly assigned

Answer:

D
