Explanation:

https://developer.ibm.com/blogs/openshift-101-pipelines/

Question 2

Question Type: MultipleChoice

Which statement is true regarding tracing in Cloud Pak for Integration?

Options:

A- If tracing has not been enabled, the administrator can turn it on without the need to redeploy the integration capability.

B- Distributed tracing data is enabled by default when a new capability is in-stantiated through the Platform Navigator.

C- The administrator can schedule tracing to run intermittently for each speci-fied integration capability.

D- Tracing for an integration capability instance can be enabled only when de-ploying the instance.

Answer:

D

Question 3

Question Type: MultipleChoice

An administrator is checking that all components and software in their estate are licensed. They have only purchased Cloud Pak for Integration (CP41) li-censes.

How are the OpenShift master nodes licensed?

Options:

A- CP41 licenses include entitlement for the entire OpenShift cluster that they run on, and the administrator can count against the master nodes.

B- OpenShift master nodes do not consume OpenShift license entitlement, so no license is needed.

C- The administrator will need to purchase additional OpenShift licenses to cover the master nodes.

D- CP41 licenses include entitlement for 3 cores of OpenShift per core of CP41.

Answer:

A

Question 4
