Question 1

Question Type: MultipleChoice

What authentication information is provided through Base DN in the LDAP configuration process?

Options:

- A- Path to the server containing the Directory.
- B- Distinguished name of the search base.
- C- Name of the database.
- D- Configuration file path.

Answer:

A

Question 2

Question Type: MultipleChoice

Red Hat OpenShift GitOps organizes the deployment process around repositories. It always has at least two repositories, an Application repository with the source code and what other repository?

Options:

- A- Nexus
- B- Ansible configuration
- C- Environment configuration
- D- Maven

Answer:

C

Question 3

Question Type: MultipleChoice

Which service receives audit data and collects application logs in Cloud Pak Foundational Services?

Options:

- A- logging service
- B- audit-syslog-service
- C- systemd journal
- D- fluentd service

Answer:

B

Question 4

Question Type: MultipleChoice

Which two OpenShift project names can be used for installing the Cloud Pak for Integration operator?

Options:

- A- openshift-infra

B- openshift

C- default

D- cp4i

E- openshift-cp4i

Answer:

A, B

Explanation:

<https://www.ibm.com/docs/en/cloud-paks/cp-integration/2021.2?topic=installing-operators>

Question 5

Question Type: MultipleChoice

An API Conned administrator runs the command shown below:

```

[root@geti-inf ~]# oc get po
NAME                                READY   STATUS             RESTARTS   AGE
apic-dev-a7s-cj-retention-1625794200-htxmm    0/1    Completed         0          11h
apic-dev-a7s-cj-rollover-1625834700-jz15s    0/1    Completed         0          28m
apic-dev-a7s-client-69f7bd5466-kq857        1/1    Running           0          20h
apic-dev-a7s-ingestion-6bb9689677-9hfwz     1/1    Running           0          20h

apic-dev-mgmt-juhu-57b794cbb8-jj7jg        1/1    Running           0          20h
apic-dev-mgmt-ldap-6855669677-gk7kx        1/1    Running           0          20h
apic-dev-mgmt-lur-58f45d697-cbd82          1/1    Running           1          20h
apic-dev-mgmt-nats-operator-689fd58c64-dwfk5 1/1    Running           0          20h
apic-dev-mgmt-nats-streaming-operator-546d6dd7b5-2znzs 1/1    Running           0          20h
apic-dev-mgmt-natscluster-1                1/1    Running           0          18h
apic-dev-mgmt-openapi-analyzer-6f6756d6-x6c8g 1/1    Running           0          20h
apic-dev-mgmt-portal-proxy-9d8f8fbd7-lbgdz   1/1    Running           0          20h
apic-dev-mgmt-stancluster-1                1/1    Running           2          18h
apic-dev-mgmt-taskmanager-6699d9cfbd-7s5hc  1/1    Running           1          20h
apic-dev-mgmt-turnstile-78cbb94695-pdkkb    0/1    CrashLoopBackOff 301        20h

```

Given the output of the command, what is the state of the API Connect components?

Options:

- A- The Analytics subsystem cannot retain historical data.
- B- Developer Portal sites will be unresponsive.

- C- Automated API behavior testing has failed.
- D- New API calls will be rejected by the gateway service.

Answer:

D

Question 6

Question Type: MultipleChoice

When using IBM Cloud Pak for Integration and deploying the DataPower Gateway service, which statement is true?

Options:

- A- Only the datapower-cp4i image can be deployed.
- B- A selected list of add-on modules can be enabled on DataPower Gateway.
- C- This image deployment brings all the functionality of DataPower as it runs with root permissions.
- D- The datapower-cp4i image will be downloaded from the dockerhub enterprise account of IBM.

Answer:

A

Question 7

Question Type: MultipleChoice

The installation of a Cloud Pak for Integration operator is hanging and the administrator needs to debug it. Which objects on the OpenShift cluster should be checked first?

Options:

- A-** The Log Aggregator in the openshift-operators namespace and then the subscription.
- B-** The InstallPlan and the pod logs from the hanging operator.
- C-** The operator's Subscription, InstallPlan, and ClusterServiceVersion.
- D-** The ibm-operator-catalog CatalogSource and the ClusterServiceVersion.

Answer:

C

Question 8

Question Type: MultipleChoice

Which statement is true regarding an upgrade of App Connect Operators?

Options:

- A-** The App Connect Operator can be upgraded automatically when a new compatible version is available.
- B-** The setting for automatic upgrades can only be specified at the time the App Connect Operator is installed.
- C-** Once the App Connect Operator is installed the approval strategy cannot be modified.
- D-** There is no option to require manual approval for updating the App Connect Operator.

Answer:

A

Question 9

Question Type: MultipleChoice

Which capability describes and catalogs the APIs of Kafka event sources and socializes those APIs with application developers?

Options:

- A- Gateway Endpoint Management
- B- REST Endpoint Management
- C- Event Endpoint Management
- D- API Endpoint Management

Answer:

C

Explanation:

<https://www.ibm.com/docs/en/cloud-paks/cp-integration/2021.3?topic=socializing-your-kafka-event-sources>

Question 10

Question Type: MultipleChoice

Which two authentication types support single sign-on?

Options:

A- 2FA

B- Enterprise LDAP

C Plain text over HTTPS

D- Enterprise SSH

E- OpenShift authentication

Answer:

A, B

Question 11

Question Type: MultipleChoice

What technology are OpenShift Pipelines based on?

Options:

- A- Travis
- B- Jenkins
- C- Tekton
- D- Argo CD

Answer:

C
