Question 1

Question Type: MultipleChoice

A user wishes to perform the same work tasks on several assets simultaneously. How can this be configured?

Options:

- A-** A Route should be created with each stop being one Asset and the Job Plan associated with the Route record.
- B-** A Master Job Plan should be created with Tasks for each Asset.
- C-** A Work Order Hierarchy should be created against the same Job Plan used for all stops.
- D-** The Assets should be specified on the Multiple Assets, Locations and CIs table on the Work Order.

Answer:

A

Explanation:

To perform the same work tasks on several assets simultaneously, a route can be created in the Routes application. A route is a series of work orders that are generated in a specific sequence to maintain a group of assets. Each stop in the route can be associated with a specific asset, and the job plan can be assigned to the route record, which means the same job plan tasks can be performed on each

asset.

Question 2

Question Type: MultipleChoice

Which application in the IBM Maximo Application Suite uses both AI and remote human-based interactions to help technicians receive on-demand assistance?

Options:

- A- Maximo Manage
- B- Maximo Safety
- C- Maximo Assist
- D- Maximo Monitor

Answer:

C

Explanation:

Maximo Assist uses both AI and remote human-based interactions to help technicians receive on-demand assistance.

Question 3

Question Type: MultipleChoice

In the Inventory Usage application when the type is TRANSFER, if a user changes the status to COMPLETE what type of transaction record is created?

Options:

- A-** Transaction Type RETURN in MATUSETRANS table
- B-** Transaction Type ISSUE in MATUSETRANS table
- C-** Transaction Type SHIPTRANSFER in MATRECTRANS table
- D-** Transaction Type TRANSFER in MATRECTRANS table

Answer:

C

Explanation:

In the Inventory Usage application when the type is TRANSFER, if a user changes the status to COMPLETE a transaction record of type SHIPTRANSFER is created in the MATRECTRANS table.

Question 4

Question Type: MultipleChoice

Which Maximo Application Suite add-on enables managing certificates for assets and training requirements for personnel?

Options:

- A- Health, Safety and Environment (HSE)
- B- Asset Configuration Manager
- C- Maximo HR Manager
- D- Service Provider

Answer:

A

Explanation:

The Health, Safety and Environment (HSE) add-on in the IBM Maximo Application Suite enables managing certificates for assets and training requirements for personnel. This add-on provides functionality for managing health and safety risks, including compliance with regulations, management of environmental incidents, and tracking of personnel certifications and training.

Question 5

Question Type: MultipleChoice

A company wishes to configure Flow Control for Work Orders. In which application can they change the Start Status and Complete Status that will be used?

Options:

A- System Properties

B- Work Order Tracking

C- Job Plans

D- Organizations

Answer:

D

Explanation:

The Organizations application is used to configure Flow Control for Work Orders. In this application, you can change the Start Status and Complete Status that will be used.

Question 6

Question Type: MultipleChoice

In which application can a Contract property default be set for a specific contract type, for example Is early termination allowed by the Customer?

Options:

- A- Database Configuration
- B- Organizations
- C- System Properties
- D- Contract Administration

Answer:

D

Explanation:

The Contract Administration application is used to set contract property defaults for specific contract types. For example, you can set whether early termination is allowed by the customer for a specific contract type.
