Options:

- A- COMPLETE
- B- RETURNED
- C- PARTIAL
- D- NONE
- E- WINSP
- F- VOID

Answer:

A, C, D

Explanation:

In the Receiving application in IBM Maximo Manage, the three statuses that show the overall receipt status of the purchase order are COMPLETE, PARTIAL and NONE.

Question 2

Question Type: MultipleChoice

On a Work Order with no GL Account specified, which GL Account will take precedence?

Options:

- A- Work Order Control Account
- B- Job Plan
- C- Asset
- D- Location

Answer:

A

Question 3

Question Type: MultipleChoice

What are the three default values used with the position of a Crew Type or Crew?

Options:

- A- Helper
- B- Supervisor
- C- Driver
- D- Leader
- E- Apprentice
- F- Technician

Answer:

A, D, E

Explanation:

In IBM Maximo Manage v8.0 implementation, the three default values used with the position of a Crew Type or Crew are Helper, Leader, and Apprentice. These values represent the different roles that members of a crew can assume.

Question 4

Question Type: MultipleChoice

In which application can a Contract property default be set for a specific contract type, for example Is early termination allowed by the Customer?

Options:

- A- Database Configuration
- B- Organizations
- C- System Properties
- D- Contract Administration

Answer:

D

Explanation:

The Contract Administration application is used to set contract property defaults for specific contract types. For example, you can set whether early termination is allowed by the customer for a specific contract type.

Question 5

Question Type: MultipleChoice

To what type of objects can a Service Level Agreement be applied?

Options:

- C- Asset
- D- LIFO
- E- Weighted Average
- F- LILO

Answer:

A, D, E

Explanation:

Apart from Standard and Average costing methods in IBM Maximo Manage's Inventory application, three other costing methods that can be used are FIFO (First In First Out), LIFO (Last In First Out) and Weighted Average.

Question 9

Question Type: MultipleChoice

When using flow control on a Work Order, how can you ensure that Work Order status changes are inherited

user ensure that Work Order status changes are inherited

Options:

- A- Check the Inherit Status Changes flag on the Work Order and ensure the mxe.app.wo.flowControlStatusInheritance System Properties is set to 1.
- B- In the Organization application, check the Inherit Status Changes flag in Work Order Options -> Flow Control Options.
- C- Ensure the Asset or Location on both the Parent and Child Work Order.
- D- Check the Roll Down Status Changes flag on the Parent and Child Work Order.

Answer:

B

Explanation:

When using flow control on a Work Order in IBM Maximo Manage, to ensure that Work Order status changes are inherited from the Parent to Child Work Orders, you should go to the Organization application and check the Inherit Status Changes flag in Work Order Options -> Flow Control Options.
