Question 1

Question Type: MultipleChoice

Which statement is true when configuring an LDAP user registry for Metric Manager?

Options:

- A-** Default LDAP configuration is equal to default CloudPak LDAP settings, however Single Sign On (SSO) with DASH should be configured.
- B-** There is no need to configure LDAP user registry as Metric Manager is part of Cloud Pak for Watson AIOps.
- C-** It is necessary to create an ldapRegistry.xml file with appropriate content for the LDAP server.
- D-** The LDAP directory must be assigned to a Team as a resource before configuring an LDAP user registry for Metric Manager.

Answer:

B

Question 2

Question Type: OrderList

Select all that apply

What is the correct sequence of steps to disable TLS in Event Manager?

Unordered Options

- Find the proxy pod.
- Find the `tlsEnabled` flag and set it to false. Save and exit the ConfigMap.
- Restart the proxy pod.
- Open the proxy ConfigMap for editing.

Ordered Options

Answer:

Open the proxy ConfigMap for editing. Save and exit the ConfigMap.

Question 3

Question Type: MultipleChoice

Which Metric Manager data extraction type enables the extraction of historical data?

Options:

A- Archive mode

B- Backlog mode

C- Training mode

D- Replay mode

Answer:

B

Question 4

Question Type: MultipleChoice

Which two self-monitoring parameters of an ObjectServer should be watched closely?

Options:

- A- Total trigger times in the profiling period
- B- Java heap size
- C- alerts.status row counts
- D- Pod restarts number
- E- Total message queue duration

Answer:

B, C

Question 5

Question Type: MultipleChoice

When a user logs on to any of the components on a Cloud Pak for Watson AIOps deployed cluster and it is too slow or times out, what can be done to resolve the issue?

Options:

- A- Update the ldap-proxy-config ConfigMap and set the LDAP_RECURSIVE_SEARCH to 'false'.
- B- Update the platform-auth-idp ConfigMap and set the LDAP_TIMEOUT to a higher value.
- C- Update the ldap-proxy-config ConfigMap and set the LDAP_TIMEOUT to a higher value.
- D- Update the platform-auth-idp ConfigMap and set the LDAP_RECURSIVE_SEARCH to 'false'

Answer:

A

Question 6

Question Type: MultipleChoice

In AI Manager, what is a reason for missing data older than 14 days in the training log indices?

Options:

- A- The current log anomaly pod is in Pending status.
- B- The data retention period is 14 days.
- C- The number of Elasticsearch pods and the number of total shards are less than 14.

D- The current log anomaly pod is in Error status.

Answer:

B

Question 7

Question Type: MultipleChoice

What step should be taken to ensure that the uninstall of AI Manager does not affect the Event Manager when using the script found at <https://github.com/IBM/cp4waiops-samples/tree/main/uninstall/3-2/uninstall-cp4waiops.sh>?

Options:

- A-** Specify ONLY CLOUDPAK='false' in the uninstall-cp4waiops-resource-groups.props file.
- B-** No special action is required, as the Event manager is running on a separate namespace.
- C-** This is not possible. Uninstalling AI Manager will always affect the Independent Event Manager.
- D-** Specify `_-ONLY CLOUDPAK='false'` in the command line.

Answer:

A
