## Question 1

---

**Question Type:** MultipleChoice

---

What is the function of Kibana in the Cloud Pak For Integration logging service?

**Options:**

---

- A- Collate, correlate, and interpret log data
- B- Capture, collect, and forward log data
- C- Index, search, and store log data
- D- Query, discover, and visualize log data

**Answer:**

---

C

## Question 2

---

**Question Type:** MultipleChoice

---

Which capability of the Cloud Pak for Integration secures the front door of a cloud native application?

**Options:**

---

- A- Messaging
- B- API Management
- C- App Connect Enterprise
- D- Event Streams

**Answer:**

---

B

## Question 3

---

**Question Type: MultipleChoice**

---

What is one feature of the IBM API Connect capability?

**Options:**

---

- A-** Provides a robust set of enterprise-grade API management capabilities
- B-** Provides security, control, integration, and optimized access to APIs
- C-** Build integration flows with pre-built connectors for SaaS products and APIs
- D-** Access, transform, and combine data assets across all of your enterprise applications, databases, and systems, with the capability to expose them as APIs

**Answer:**

---

D

## Question 4

---

**Question Type:** MultipleChoice

---

Which is a recommended storage provider for the ROKS implementation

**Options:**

---

- A-** Cloud Data Lake

- B- Kubernetes Container Storage
- C- IBM Cloud Block storage
- D- Containers Storage Block

**Answer:**

---

A

## Question 5

---

**Question Type:** MultipleChoice

---

In Cloud Pak for Integration, which object can be used to request storage resources without knowing the underlying storage infrastructure?

**Options:**

---

- A- Persistent Volume Claim (PVC)
- B- Persistent Volume (PV)
- C- RADOS Block Device (RBD)

**D-** Elastic Block Storage (EBS)

**Answer:**

---

C

## Question 6

---

**Question Type: MultipleChoice**

---

What is the IBM App Connect Enterprise Toolkit?

**Options:**

---

- A-** A high availability management tool
- B-** A command-line interface for App Connect integration
- C-** A web user interface for accessing integration server resources
- D-** A graphical user interface for message flow development

**Answer:**

---

A

## Question 7

---

**Question Type:** OrderList

---

What is the correct order of dependencies in the DataPower Gateway services point of view as they are nested into each other?

The screenshot shows a user interface for ordering dependencies. On the left, under the heading "Unordered Options", there is a vertical list of four text boxes containing the words "Domain", "Tenant", "Appliance", and "Object". To the right of these boxes are two circular buttons: the top one contains a right-pointing chevron (>) and the bottom one contains a left-pointing chevron (<). On the right side of the interface, under the heading "Ordered Options", there is a large, empty rectangular area.

**Answer:**

---

## Question 8

---

**Question Type:** MultipleChoice

---

What is the patented Data Transfer Technology that is included with the Cloud Pak for Integration?

**Options:**

---

A- SFTP

B- FASP

C- HTTPS

D- FTP

**Answer:**

---

D

## Question 9

---

**Question Type: MultipleChoice**

---

Which statement describes Container orchestration?

**Options:**

---

- A-** A CI/CD component that automates steps in a software delivery process
- B-** A runtime environment that automates and reports on processes that are intended to help optimize businesses
- C-** The automated process of managing or scheduling workloads within clusters
- D-** A small software layer that enables multiple operating systems to run alongside each other

**Answer:**

---

A
