Question 1

Question Type: MultipleChoice

What are two of the core Cloud Pak for Integration capabilities?

Options:

- A- MQ Appliance
- B- Event Streams
- C- Automation Studio
- D- Application Integration
- E- Robotic Process Automation

P2P
exams

Answer:

B, D

Question 2

Question Type: OrderList

Select all that apply

What is the correct order to configure TLS profiles for an API's access and encryption? List the API Connect components to be configured, from the first to the last one.

The screenshot shows a configuration interface with two columns: 'Unordered Options' and 'Ordered Options'. The 'Unordered Options' column contains a list of components: Catalog, Space, Organization, and Portal. The 'Ordered Options' column is currently empty. Between the columns are two circular arrows (a right arrow and a left arrow) for moving items. To the right of the 'Ordered Options' column are two circular arrows (an up arrow and a down arrow) for reordering the items.

Answer:

CatalogSpaceOrganizationPortal

Question 3

Question Type: MultipleChoice

Which active-standby pair of queue managers uses a shared networked file system?

Options:

- A- Double resilient queue manager
- B- Replicated data queue manager
- C- Integrated HA queue manager
- D- Multi-instance queue manager

Answer:

D

Question 4

Question Type: OrderList

A new proxy API needs to be created, security added, and published to the Sandbox catalog. Which is the correct sequence of steps that should be taken to perform these tasks?

The screenshot shows a user interface for ordering a list of steps. On the left, under the heading "Unordered Options", there are five steps in separate boxes:

- Reference the security definitions in the Security section of the API
- Import or create a new API definition
- Add the API definition in a product definition
- Add security definitions to the API definition
- Publish the Product definition in the Sandbox catalog

On the right, under the heading "Ordered Options", there are two empty boxes with arrows pointing up and down, indicating where the steps should be dragged. A large "P2P exams" watermark is visible in the background.

Answer:

Add the API definition in a product definition
 Import or create a new API definition
 Reference the security definitions in the
 Add security definitions to the API definition
 Add the product definition in the Sandbox catalog

Question 5

Question Type: MultipleChoice

What storage service on Azure should be used for the API Management capability of Cloud PaK for Integration?

Options:

- A- Azure Disks
- B- Azure Files
- C- Azure Tables
- D- Azure Blobs

Answer:

D

Question 6

Question Type: MultipleChoice

Which statement is true about the Monitoring component of Cloud Pak for Integration?

Options:

- A- It is built on the ELK stack
- B- Data persistence is not enabled by default
- C- Only a user with role ClusterAdministrator can perform write operations
- D- It requires an additional license

Answer:

D

Question 7

Question Type: MultipleChoice

Which situation would lead to loss of an etcd quorum in an OpenShift v4 cluster?

Options:

- A- The database used by all Cloud Pak for Integration components is corrupted
- B- OpenShift has lost all worker nodes
- C- The majority of master/control plane hosts are lost
- D- One of the master nodes has gone off line

Answer:

A

P2P
exams

Question 8

Question Type: MultipleChoice

How can DataPower Gateway workloads be restored in the DR site?

Options:

- A- DataPower Gateway container images need to be available in a container registry that the DR site has access to
- B- Cloud Pak for Integration can automatically synchronize the running pods with the DR site
- C- In Cloud Pak for Integration Platform Navigator, select the running DataPower Gateway instance and then click 'Export for DR site'
- D- Containers do not hold state, which would require workloads to be reconfigured from scratch

Answer:

D

P2P
exams

Question 9

Question Type: MultipleChoice

Which approach can be implemented with Cloud Pak for Integration to help a company modernize its application environment and container management capabilities?

Options:

- A- Microservices
- B- Publish/Subscribe
- C- Monolithic architecture
- D- Robotic Process Automation

Answer:

A

Question 10

Question Type: MultipleChoice

What is the purpose of the Asset Repository?

Options:

- A- To store IBM certified container images
- B- To store integration artifacts and documents
- C- To store data of the servers that compose the cluster
- D- To store container images generated in the platform

Answer:

C
