## Question 1

---

**Question Type:** MultipleChoice

---

An administrator upgrades the IBM DB2 JDBC driver. The test connection operation fails. On checking the System.Out log the administrator finds that the JVM is still using the old JDBC driver.

What could be the possible reason for the failure?

**Options:**

---

- A- No driver JARs exist.
- B- The driver upgrade failed.
- C- There are multiple drivers in the provider classpath.
- D- DB2UNIVERSAL\_JDBC\_DRIVER\_PATH was NULL.

**Answer:**

---

B

## Question 2

---

**Question Type: MultipleChoice**

---

When using an external HTTP server, what software must be installed to communicate with IBM WebSphere Application Server?

**Options:**

---

- A- IBM Caching Proxy
- B- IBM Load Balancer
- C- Web Server Plug-in
- D- IBM WebSphere Portal

**Answer:**

---

C

## Question 3

---

**Question Type: MultipleChoice**

---

Which of the following is a potential consequence when using an external session management store over a server level store?

### Options:

---

- A- A server level store makes a smaller footprint.
- B- Only half the current sessions can be saved externally.
- C- External session management stores can use additional system resources.
- D- Using an external session management store takes 10X as long to rebuild the session after a failure.

### Answer:

---

C

### Explanation:

---

External session management stores can use additional system resources.

## Question 4

---

**Question Type: MultipleChoice**

---

What is the purpose of the resource environment provider in IBM WebSphere Application Server?

**Options:**

---

- A- Manage JMS resources.
- B- Alter deployment descriptor.
- C- Manage database resources.
- D- Administer application dependent variables.

**Answer:**

---

B

## Question 5

---

**Question Type: MultipleChoice**

---

When building a partial application for IBM WebSphere Application Server, how should the files be packaged for deployment?

**Options:**

---

- A- The files should be placed in the same directory structure as they are in the .ear file and zipped.

- B-** The files should be placed in the same flat folder, and the properties file should map the files to their intended destinations.
- C-** The files should be placed in the same flat folder, named to match the directory structure of the deployed application, and zipped.
- D-** The files can be placed in any directory structure the administrator decides, and then, manually replaces on the WebSphere Application Server file system.

**Answer:**

---

A

## Question 6

---

**Question Type:** MultipleChoice

---

Which statement describes a cell in a Network Deployment configuration?

**Options:**

---

- A-** A cell can consist of multiple nodes and node groups.
- B-** A cell only contains one node that contains one server.
- C-** Nodes and node groups in the cell are administered from the node agent.

**D-** Nodes and node groups in the cell are administered from the job manager.

**Answer:**

---

A

## Question 7

---

**Question Type: MultipleChoice**

---

What is needed on order to integrate IBM WebSphere Application Serve security and third-party security servers?

**Options:**

---

**A-** Set up a Trust Association.

**B-** Create a new session cookie definition.

**C-** Enable Java Authentication SPI (JASPI).

**D-** Implement a custom single sign on token.

**Answer:**

---

A

## Question 8

---

**Question Type:** MultipleChoice

---

Which of the following is a valid step in the process to update a single file in a deployed enterprise application using the monitored directory?

### Options:

---

- A-** Modify the property file to set the time when the file should be deployed to the application.
- B-** Modify the property file to set the email address of the administrator to email when the file is updated.
- C-** Modify the property file to set the URL to the location where the file can be retrieved from the internet.
- D-** Modify the property file to set the type of the operation, the location of the file, and the location within the deployed application where the file will go.

### Answer:

---

B

## Question 9

---

### Question Type: MultipleChoice

---

An administrator configured Web authentication for a Web module deployed in an application server to protect the URL. After this configuration, application users could not load images that are protected on the web page.

In addition to configuring `com.ibm.wsspi.security.web.webAuthReq` as a JVM custom property, which two property values can an administrator set to resolve the problem? (Choose two.)

#### Options:

---

- A- lazy
- B- eager
- C- always
- D- transient
- E- persisting

#### Answer:

---

D, E

## Question 10

---

**Question Type:** MultipleChoice

---

An administrator notices performance degradation after a new deployment of an application. After investigation, increased CPU usage is observed due to frequent GC cycles. However, there is no significant growth in the heap memory.

How can the resource consumption issue be resolved?

**Options:**

---

- A- Increase max heap.
- B- Increase perm space.
- C- Increase nursery size.
- D- Change the GC policy.

**Answer:**

---

D

## Question 11

---

**Question Type: MultipleChoice**

---

To ensure that all web traffic is secure from the client to the application server, which two layers have to be configured for SSL? (Choose two.)

**Options:**

---

- A- Client to Web server
- B- Web server to node agent
- C- Web server to application server
- D- Application server to node agent
- E- Node agent to deployment manager

**Answer:**

---

A, C

## Question 12

---

**Question Type: MultipleChoice**

---

What is something an administrator needs to keep on mind regarding the relationship between an IBM WebSphere Application Server install and an IBM Installation Manager install?

**Options:**

---

- A-** IBM Installation Manager should be used in GUI mode.
- B-** IBM Installation Manager can be uninstalled and reinstalled without impacting WebSphere Application Server
- C-** IBM Installation Manager repository information points to the install location of Websphere Application Server
- D-** IBM Installation Manager can be used by either a user with administrator privileges or a regular user to administer the same installation

**Answer:**

---

B
