Question 1

Question Type: MultipleChoice

Pmcmd is used for which of the following tasks?

Options:

- A- Delete workflow, schedule workflow, ping service.
- B- Start workflow, schedule workflow, ping service.
- C- Start workflow, delete task, ping service.
- D- Start workflow, schedule workflow, copy workflow.

Answer:

B

Explanation:

<http://www.folkstalk.com/2012/10/pmcmd-command-usage-in-informatica.html>

Question 2

Question Type: MultipleChoice

In reference to relational connections created in the PowerCenter Workflow Manager, which one of the following statements is true?

Options:

- A-** The connection environment SQL executes when a session connects to the database.
- B-** The transaction environment SQL executes Just before a COMMIT against the target.
- C-** The transaction environment SQL causes PowerCenter to ignore the Transaction Control Transformation.
- D-** You can use the connection environment SQL to set folder permissions in the PowerCenter repository database.

Answer:

A

Explanation:

<http://www.info-etl.com/course-materials/tips-power-center-9>

Question 3

Question Type: MultipleChoice

Which statement is true regarding object copy across folders in the Repository Manager?

Options:

- A- You can copy an object even though it has been checked out or has a write-intent lock.
- B- The Repository service will lock the repository database until the objects have been copied.
- C- It is best practice to export the objects as XML prior to performing the copy operation.
- D- You must have write permissions in both the origin folder and the destination folder.

Answer:

B

Question 4

Question Type: MultipleChoice

What is the purpose of operating system profiles?

Options:

- A-** To allow two or more workflows to run on the same node under different operating system users.
- B-** To allow two or more Integration Services to run on the same node under differed operating system users.
- C-** To allow two or more workflows to run on the same node while accessing different database connection users.
- D-** To allow two or more Integration Services to run a single workflow on two or more different nodes with different operating systems.

Answer:

D

Question 5

Question Type: MultipleChoice

Complete this sentence Each operating system profile can have a different _?

Options:

- A- Integration Service
- B- Node
- C- Process variable root directory
- D- Log agent

Answer:

C

Question 6

Question Type: MultipleChoice

Which statement below best describes how to change a worker node to a gateway node?

Options:

- A- By changing a property of the node.

- B-** By changing a property of the node and the domain.
- C-** By changing a property of the node and setting each service that runs on that node to Primary node
- D-** By reinstalling the Service Manager on that node and configuring it to run as a gateway node.

Answer:

A

Question 7

Question Type: MultipleChoice

When using pmrep to import objects from XML which choice would be following best practice?

Options:

- A-** Run pmrep In Interactive mode so each conflict can be answered directly.
- B-** Use a control file.
- C-** Use a shell script or batch file.
- D-** Import the objects manually instead of using pmrep so the conflicts can be handled in the XML import wizard.

Answer:

B

Question 8

Question Type: MultipleChoice

Which application(s) can be used to copy a PowerCenter repository folder?

Options:

- A-** The Repository Manager.
- B-** The Repository Manager or the Informatica Administrator.
- C-** The Repository Manager or the Designer.
- D-** Any application except the Workflow Monitor.

Answer:

B

Question 9

Question Type: MultipleChoice

How many different repository services can be associated with a single integration service?

Options:

A- One

B- One or more

C- Zero or more

D- One if the integration service is not part of a grid, more than one if It is part of a grid

Answer:

A

Explanation:

<http://datawarehouse.ittoolbox.com/groups/technical-functional/informatical/associating-a-single-repository-with-two-integration-services-3300097>

Question 10

Question Type: MultipleChoice

Why should you use PowerCenter Metadata Exchange (MX) views rather than querying the PowerCenter repository tables directly- i.e. the ones that begin with OPB_?

Options:

- A-** Querying the PowerCenter repository tables directly is a violation of the PowerCenter license and terms of use.
- B-** PowerCenter repository tables store most data in proprietary binary format and hence are not directly readable. This binary format improves performance.
- C-** Stored (hard-coded) queries against the repository tables may become invalid upon a repository version upgrade due to the fact that the repository table structures may change.
- D-** It is not possible to query the repository tables directly.

Answer:

B
