Question 1

Question Type: MultipleChoice

Which option best is a benefit of a whole-team approach?

Options:

- A- Enables reduction in test duplication as the testers and test engineers function as a single team.
- B- Enables testers to execute their responsibility for quality for the combined team.
- C- Enables the team to focus on solely their separate areas of expertise and responsibility.
- D- Enables the various skill sets within the team to be leveraged to the benefit of the project.

Answer:

D

Question 2

Question Type: MultipleChoice

Which option best statements about Agile retrospectives is CORRECT?

Options:

- A- During Agile retrospectives, testers should be encouraged to provide constructive suggestions only on non-testing activities.
- B- In an Agile retrospective the moderator can encourage and make sure that good practices are kept by the team, by asking what the team is doing well.
- C- Agile retrospectives should be focused mainly on impediments that are outside the control of the team because these issues are more challenging.
- D- Unlike working sessions or meetings held in non-Agile projects, Agile retrospectives do not require follow-up activities.

Answer:

B

Question 3

Question Type: MultipleChoice

Which of the following statements about a test charter are CORRECT?

- 1) It is used mainly in exploratory tests.
- 2) It is used to monitor a test process.
- 3) It may make reference to user stories.
- 4) It contains notes taken during a test session.
- 5) It is used to outline the company test policy.

Options:

- A- 1, 2, 5
- B- 2, 3, 4
- C- 2, 4, 5
- D- 1, 3, 4

Answer:

C

Question 4

Question Type: MultipleChoice

Which one of the following is a testable acceptance criterion?

Options:

- A- The solution shall support business processes.
- B- The system shall be easy to use.
- C- The response time to confirm a customer submission must not exceed 5 seconds.
- D- The tools for testing are tested before use and are meeting the requirements.

Answer:

C

Question 5

Question Type: MultipleChoice

Which agile development approach incorporates the following practices:

- * a project is divided into iterations called sprints
- * each sprint results in a potentially releasable/shippable product?

Options:

- A- Kanban
- B- Extreme Programming
- C- Continuous Integration
- D- Scrum

Answer:

D

Question 6

Question Type: MultipleChoice

Which option best sentences about the integration of development and testing activities in Agile projects is INCORRECT?

Options:

- A- While developers develop automated unit test scripts, testers write automated system level tests.
- B- Testers replace developers in writing unit test automation scripts.
- C- Developers write acceptance criteria and test cases, together with testers.
- D- Developers and testers may work as a pair to develop and test a feature.

Answer:

B

Question 7

Question Type: MultipleChoice

What is the main benefit of the Test Pyramid?

Options:

- A- It means testing is involved early in the development cycle.
- B- It helps in evaluating the amount of test cases needed.
- C- It shows complexity of testing activities.
- D- It acts as a metric for testing progress.

Answer:

D

Question 8

Question Type: MultipleChoice

Iteration planning for Sprint 5 of your current project is complete. The plan for the sprint is to increase performance of the system, which of the following acceptance criteria would you expect for Sprint 5?

- 1) User access for all roles has been validated.
- 2) A static analysis tool has been executed for all code.
- 3) 100% of the existing regression test suite has passed.
- 4) System is responding in less than 3 seconds, 90% of the time.
- 5) A new version of internet Explorer has been included.

Options:

- A- 1, 3
- B- 3, 4
- C- 4, 5
- D- 2, 5

Answer:

B

Question 9

Question Type: MultipleChoice

You are working in a team preparing a bank loan application. Your task is the preparation of acceptance tests for the following user story:

"IF a customer needs a loan for less than 50,000 Euros and they have made repayments regularly (without any delay) and the customer's monthly income is more than 3000 Euros for the last year, THEN the bank will accept the loan request; in other cases, the bank will not accept the request. A customer assistant is responsible for preparing data for approval but the approval is done by the bank manager."

Which of the following test cases can be treated as acceptance test criteria for the above user story?

- 1) As a customer assistant I can log in to the system and check the history of the customer account for the last year.
- 2) As a customer assistant I can log in to the system and check the history of the customer debts and repayments.
- 3) As a customer assistant I can log in to the system and change my password.
- 4) As a bank manager I can log in to the system and receive the information of all requests waiting for approval.
- 5) As a bank manager I can log in to the system and decide whether to approve a loan for a customer.
- 6) As a bank manager I can log in to the system within 10 seconds.

Options:

- A- Acceptance test criteria are 1, 2, 3 and 6
- B- Acceptance test criteria are 1, 3, 4 and 5
- C- Acceptance test criteria are 2, 4, 5 and 6
- D- Acceptance test criteria are 1, 2, 4 and 5

Answer:

D

Question 10

Question Type: MultipleChoice

Which two of the following statements are CORRECT with regards to test automation on agile projects?

- 1) Every test developed for past iterations is kept and executed as part of a regression suite for each new release of code.
- 2) It would be very difficult to ensure high quality in an agile project without test automation.
- 3) Automated acceptance tests are run regularly as part of the continuous integration full system build.
- 4) Automated regression suites are only run for the final release of code.
- 5) In agile projects, the results from automated acceptance tests provide feedback on the overall product quality.

Options:

- A- 3, 4
- B- 2, 5
- C- 1, 3
- D- 2, 3

Answer:

B

Question 11

Question Type: MultipleChoice

User Story: As a user I want to be able to calculate tax percentage based on amount of income.

What is the best black box test design technique for verifying the accuracy of this user story?

Options:

- A- Statement testing - test all statements in income calculation.
- B- User story testing - test that the user can enter an income amount and get a result.
- C- State transition testing - test all states of income entry.
- D- Equivalence partitioning - test with low, medium and high income.

Answer:

D
