Answer:

D

Question 5

Question Type: MultipleChoice

As part of the new strategy a user interface specification has been created to help development to gain familiarity with the requirements. What kind of review would be most helpful in this situation?

Options:

- A- A walkthrough, because it would help them understand the interface better

- B-** An inspection, because it would result in a signed off user interface specification to work from
- C-** A technical review, because it will identify all the problems with the user interface specification
- D-** A management review, because it sets management criteria for the development

Answer:

A

Question 6

Question Type: MultipleChoice

The development manager has reviewed the initial inspection results in the company and has discovered that your inspection logging rate is 2 issues per minute and the average checking rate is 5 pages per hour. Around 10 major defects are found per page. The manager is willing to invest more money in your inspection programme. What should he/she do?

Options:

- A-** Ask checkers to try a checking rate of 6 pages per hour
- B-** Make sure the scribe logs issues at a rate of 1 issue per minute

C- Ask moderators to cut back on discussion in the logging meeting

D- Ask checkers to try a checking rate of 4 pages per hour

Answer:

D
