Question 1

Question Type: MultipleChoice

Analyzing the requirement, ''The system shall allow cash advances of at least 200 Euros for all supported credit cards. The correct list of credit cards is American Express, Diners, VISA, Mastercard and Eurocard.'' There are arguments to be made for several test design techniques.

Which of the following test design techniques is LEAST likely to be used for identifying test cases for the requirement?

[K4] 3 credits

P2P exams

Options:

A- Boundary value analysis
B- Equivalence Partitioning
C- Classification Tree Method
D- State Transition Testing

Answer:

D

Question 2

Question Type: MultipleChoice

Ken, an entrepreneur in Leeds finds the quality of the tea locally available so low, that he decides to research superior teas around the world. He decides to market, sell and distribute these superior teas via the web. His market strategy is to offer superior products on a well-designed website with graphics that are fast to load, has high availability, superior usability and fast response times.

The website will offer the following:

-An innovative interactive catalogue of teas, which not only enables customers to buy the product, but also enables them to provide feedback by rating the teas (which will influence his stock purchasing levels)

Provide the customer with the ability to use secure credit card transactions

Provide the customer to give general feedback

Ken selects an iterative model for the development of the prototypes. The team consists of three developers that are experienced in web development. Ken, although he doesn't have technical

skillset, is concerned with quality. He doesn't believe a lot of documentation is necessary and he wants the website to be completed quickly.

The test basis contains the following:

-Story boards that show the information flow and page links through the site

-HTML pages developed to date.

-A statement of non-functional requirements.

With the strategy taking shape, Ken asks your advice on the specific testing techniques that should be used to complete the required testing, bearing in mind the nature of the application and the nature of Ken's overall objectives.

We now make the assumption that in the scenario described as above, exploratory testing was selected as being the main test technique. You have now been given the task of specifying, executing and recording the exploratory test sessions.

Select TWO of the options below to define what you will typically use for specifying, executing and recording the sessions?

[K3] 2 credits

Options:

A- Record the results in email and send the email to the test manager.
B- Use external testers on the team to provide a new approach and fresh view to the testing effort.
C- Create test charters for planned test session.
D- Use debriefing sessions with stakeholders and other testers to discuss the findings and new risks identified.
E- Define concrete test cases to be executed by the developers.

Answer:

C, D

Question 3

Question Type: MultipleChoice

Which of the following is a type of testing that someone in the role of a test analyst, working with the test manager, should typically consider and plan for?

[K2] 1 credit

Options:

A- Security testing
B- Reliability testing
C- Accessibility testing
D- Performance testing

Answer:

C

Question 4

Question Type: MultipleChoice

How many invalid test cases can be identified from the ''Route Calculation'' state table provided?

You may assume all actions are different and independent.

[K3] 3 credits

Options:

A- 6
B- 8
C- 102
D- 12

Answer:

A

Question 5

Question Type: MultipleChoice

You are testing an ATM based on the following use case;

ATM start screen is showing

The user inserts card

The user types in PIN

The user selects 'cash with receipt'

The user selects 50

The user selects 'no further service'

Expected results

The ATM provides 50 to the user

The ATM return the card and balance slip

The ATM clears the screen

The ATM returns to start menu In your test log which of the following could be noted as part of additional attention points? [K3] 2 credits

Options:

A- Issues regarding time-behavior
B- Issues regarding interoperability
C- More test cases needed to achieve full coverage
D- Expected results not clearly defined

Answer:

A

Question 6

Question Type: MultipleChoice

Your test team is currently executing interoperability testing. Consider the following excerpt from the failure description of an interoperability defect report:

Connect external camera to a Windows Vista PC.

Start the camera application on the PC. Application starts normally and recognizes connected camer

a.

Attempt to download the recorded data from the camera.

Data does not download.

Attempt to download the data three times. Data will not down---load.

Based on this information alone, which of the problems described hereafter exists in this defect report?

[K4] 3 credits

Options:

A- Lack of structured testing
B- Inadequate classification information
C- Insufficient isolation
D- Poorly documented steps to reproduce

Answer:

B

Question 7

Question Type: MultipleChoice

You are starting to review some of the incident reports that have been submitted as a result of test execution.

Description	*Strange tab behaviour and wrong error message*	Date	*12 August 2009*
Tester	*Mr. Bug*	Priority	*Medium*
Test case ID	*02.05*	Severity	*Low*

Which THREE of the comments would be your main findings when you have reviewed the following incident report?

[K4] 3 credits, 2 out of 3 correct 1 credit

Options:

A- Should have been two defect reports
B- Ambiguous description
C- Both severity and priority do not make sense

D- Actual cause is missing
E- Reproducibility is not indicated
F- Defect type is missing
G- Date to be fixed not defined

Answer:

A, B, E

Question 8

Question Type: MultipleChoice

You are a test analyst in the banking domain. You have received the following requirement:

''The system shall allow cash advances of at least 200 Euros for all supported credit cards. The correct list of credit cards is American Express, Diners, VISA, Mastercard and Eurocard.

Which one of the findings described below is true regarding this requirement?

[K3] 2 credits

Options:

A- The requirement is ambiguous in terms of supported cards
B- The paragraph indicates potential performance problems
C- The paragraph is unclear in terms of advance limits
D- The paragraph indicates potential usability problems

Answer:

C

Question 9

Question Type: MultipleChoice

You are testing the processing of a critical traffic control system to which various regulations apply. The processing of the input variables is dependent of defined ranges within which the actual retrieved data values can lie.

Which of the following test techniques will you use to the processing functionality of the traffic control system?

[K4] 3 credits

Options:

A- defect taxonomies
B- exploratory testing
C- equivalence partitioning enhanced with boundary value analysis
D- state transition testing

Answer:

C
