## Question 1

---

Question Type: MultipleChoice

---

Which two statements correctly describe an ESI-LAG? (Choose two.)

Options:

- A- Both VTEPs advertise connectivity to the same Ethernet segment.
- B- Both VTEPs advertise connectivity to different Ethernet segments.
- C- The LACP system ID on the two connected leafs is configured with the same value.
- D- The LACP system ID on the two connected leafs is configured with different values.

Answer:

A, C

## Question 2

---

Question Type: MultipleChoice

---

What are two issues that affect the uptime of a network? (Choose two.)

Options:

- A- planned outages
- B- power current used
- C- WAN failure
- D- packet loss

Answer:

A, C

## Question 3

---

Question Type: MultipleChoice

---

In an EVPN-VXLAN data center, what would be a reason to consider using discrete border leafs rather than placing border roles onto the spines?

Options:

---

- A- to provide for differentiated oversubscription ratios for traffic into and out of the data center
- B- to eliminate multicast traffic in and out of the fabric
- C- to allow for provisioning ACLs between the data center and the WAN
- D- to provide specific devices designed for handling traffic burstiness on the WAN

Answer:

---

A

## Question 4

---

Question Type: MultipleChoice

---

Which Juniper ATP Cloud feature detects threats in HTTPS without decryption?

Options:

---

- A- Encrypted Traffic Insights
- B- DNSSEC
- C- Paragon Active Assurance
- D- SSL

Answer:

---

A

## Question 5

---

Question Type: MultipleChoice

---

What are two fundamental functions of Cloud Access Security Broker (CASB)? (Select two.)

Options:

---

- A- compliance
- B- redundancy
- C- performance
- D- visibility

Answer:

A, D

## Question 6

Question Type: MultipleChoice

What are two primary objectives when designing a wireless LAN (WLAN)? (Choose two.)

Options:

- A- the number of access points required
- B- the location of the access points
- C- access point serviceability
- D- access point configurability

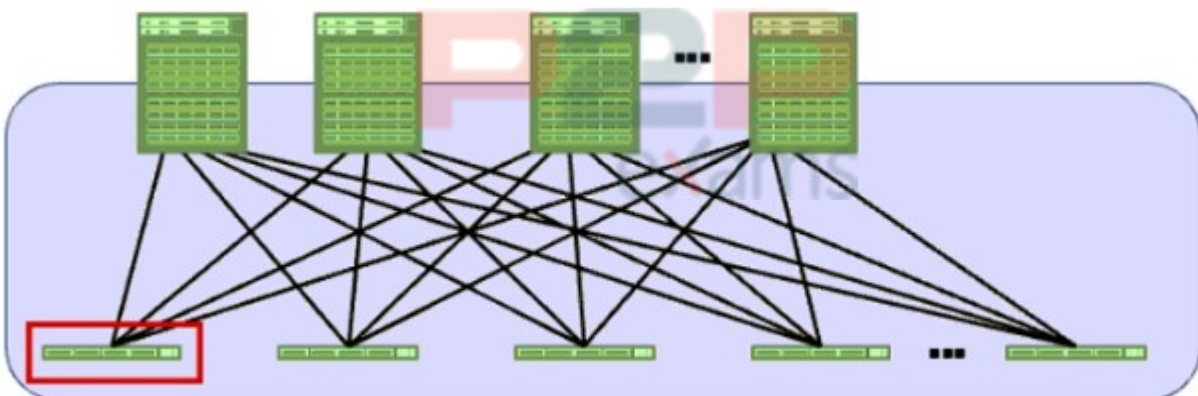

Answer:

A

## Question 7

Question Type: MultipleChoice

Click the Exhibit button.

Referring to the exhibit, what is the highlighted device in a data center called?

Options:

- A- a spine node
- B- a leaf node
- C- a core node
- D- an aggregation node

Answer:

---

B

## Question 8

---

Question Type: MultipleChoice

---

What two statements are true about SD-WAN? (Choose two.)

Options:

---

- A- Distributed policy enforcement does not scale.
- B- SD-WAN branches can aggregate different WAN circuits.
- C- SD-WAN routers must have specialized hardware to do application routing.
- D- SD-WAN supports local breakout for Direct Internet Access

Answer:

---

B, D

## Question 9

---

Question Type: MultipleChoice

---

What are two characteristics of a greenfield deployment? (Select two.)

Options:

---

- A- A greenfield deployment means that there are fewer restrictions.

- D- A greenfield deployment means a new deployment.

Answer:

---

A, D

## Question 10

---

Question Type: MultipleChoice

---

You are considering changing an IBGP-based IP fabric design to one that is EBGP-based.

In this scenario, which two statements are correct about an EBGP-based design? (Choose two.)

Options:

---

- A- Route reflection is not required.
- B- An IGP is not required.
- C- AS numbers are not required.
- D- Confederations may be used.

Answer:

---

A, B

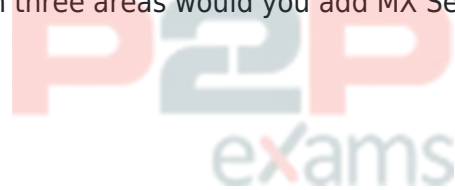

## Question 11

---

Question Type: MultipleChoice

---

As a network architect, in which three areas would you add MX Series routers? (Choose three.)

Options:

---

- A- mobile device
- B- data center network
- C- C. service provider
- D- edge networkE WiMAX

Answer:

---

B, C, D
