Question 1

Question Type: MultipleChoice

Click the Exhibit button.

```
heat_template_version: 2018-03-02

resources:
  vm_1:
    type: OS::Nova::Server
    properties:
      image: cirros
      flavors: m1.tiny
      networks: [{"network": "VN-A"}]

  vm_2:
    type: OS::Nova::Server
    properties:
      image: cirros
      flavors: m1.tiny
      networks: [{"network": "VN-A"}]
```

What will be the result of deploying the Heat template shown in the exhibit?

Options:

- A- Neither VM will be deployed.
- B- Only vm_2 will be deployed and vm_1 will be overwritten.
- C- Both vm_1 and vm_2 will be deployed.
- D- Only vm_1 will be deployed and vm_2 will fail.

Answer:

C

Explanation:

<https://docs.onap.org/projects/onap-vnfrqts-requirements/en/latest/Chapter5/Heat/ONAP%20Heat%20Resource%20ID%20and%20Parameter%20Naming%20Convention/Nova%20Parameters.html>

Question 2

Question Type: MultipleChoice

In which OpenStack core service would you find disk snapshots?

Options:

A- Glance

B- Trove

C- Cinder

D- Swift

Answer:

A

Question 3

Question Type: MultipleChoice

Which two statements about a Contrail environment are true? (Choose two.)

Options:

- A- Control nodes peer with other control nodes using XMPP.
- B- Control nodes peer with other control nodes using MP-BGP.
- C- Control nodes peer with compute nodes using XMPP.
- D- Control nodes peer with compute nodes using MP-BGP.

Answer:

B, C

Explanation:

The control nodes peer with the remote compute nodes by means of XMPP and peer with local gateways by means of MP-eBGP.

Question 4

Question Type: MultipleChoice

Which two statements are true about Contrail Enterprise Multicloud? (Choose two.)

Options:

- A-** Contrail Enterprise Multicloud supports the intent-driven automation function using PowerShell.
- B-** Contrail Enterprise Multicloud enables basic device management functions from Contrail.
- C-** Contrail Enterprise Multicloud supports the intent-driven automation function using Ansible.
- D-** Intent-driven automation can only be applied on virtual network elements in Contrail Enterprise Multicloud.

Answer:

B, C

Question 5

Question Type: MultipleChoice

What is the proper order for creating a virtual network?

Options:

- A-** Configure the IPAM, virtual network, DNS, and then the virtual machine.
- B-** Configure the DNS, IPAM, virtual network, and then the virtual machine.
- C-** Configure the virtual network, DNS, IPAM, and then the virtual machine.
- D-** Configure the IPAM, DNS, virtual network, and then the virtual machine.

Section: (none)

Explanation

Answer:

D

Question 6

Question Type: MultipleChoice

What are two advantages of SDN? (Choose two.)

Options:

A- centralized management

B- decentralized management

C- programmability

D- static networking

Answer:

A, C

Question 7

Question Type: MultipleChoice

You have a centrally routed and bridged topology.

In this scenario, routing between subnets would be performed on which two types of devices? (Choose two.)

Options:

A- leaf

B- spine

C- DC gateway

D- bridge

Answer:

A, B

Explanation:

https://www.juniper.net/documentation/en_US/release-independent/solutions/topics/task/configuration/centrally-routed-overlay-cloud-dc-configuring.html

Question 8

Question Type: MultipleChoice

You are using Contrail as the SDN controller for your data center. You must ensure that Contrail provides DNS service to the VMs of a particular virtual network.

Which two DNS modes would accomplish this task? (Choose two.)

Options:

A- tenant

B- virtual DNS

C- default

D- reverse

Answer:

A, B
