- B- pebbles
- C- golf balls
- D- footballs
- E- hail-stones

Answer:

A

Question 4

Question Type: MultipleChoice

The island's volcano had been inactive for-

Options:

- A- seventy years
- B- seven thousand years
- C- seven thousand months
- D- seven hundred years
- E- seventy decades

Answer:

B

Question 5

Question Type: MultipleChoice

This liquid was coming from the --

Options:

- A- mountains
- B- ground

C- sea

D- sky

E- ocean

Answer:

B

Question 6

Question Type: MultipleChoice

The color of the hot liquid was-

Options:

A- orange

B- black

C- yellow

D- red

E- gray

Answer:

D

Question 7

Question Type: MultipleChoice

The village is located on the island of-

Options:

A- Vestmannaeyjar

B- Hebrides

C- Heimaey

D- Helgafell

E- Heimma

Answer:

C

Question 8

Question Type: MultipleChoice

When you have finished reading the meter, mark off-

Options:

A- the number of units recorded

B- the figures on the small dial

C- the total figures

D- all the zero marks

E- the last reading of the month

Answer:

A

Explanation:

The village of Vestmannaeyjar, in the far northern country of Iceland, is as bright and clean and up-to-date as any American or Canadian suburb. It is located on the island of Heimaey, just off the mainland. One January night in 1973, however, householders were shocked from their sleep. In some backyards red-hot liquid was spurting from the ground. Flaming "skyrockets" shot up and over the houses. The island's volcano, Helgafell, silent for seven thousand years, was violently erupting!

Luckily, the island's fishing fleet was in port, and within twenty-four hours almost everyone was ferried to the mainland. But then the agony of the island began in earnest. As in a nightmare, fountains of burning lava spurted three hundred feet high. Black, baseball-size cinders rained down. An evil-smelling, eye-burning, throat-searing cloud of smoke and gas erupted into the air, and a river of lava flowed down the mountain. The constant shriek of escaping steam was punctuated by ear-splitting explosions. As time went on, the once pleasant village of Vestmannaeyjar took on a weird aspect. Its street lamps still burning against the long Arctic night, the town lay under a thick blanket of cinders. All that could be seen above the ten-foot black drifts were the tips of street signs. Some houses had collapsed under the weight of cinders; others had burst into flames as the heat ignited their oil storage tanks. Lighting the whole lurid scene, fire continued to shoot from the mouth of the looming volcano. The eruption continued for six months. Scientists and reporters arrived from around the world to observe the awesome natural event. But the town did not die that easily. In July, when the eruption ceased, the people of Heimaey Island returned to assess the chances of rebuilding their homes and lives. They found tons of ash covering the ground. The Icelanders are a tough people, however, accustomed to the strange and violent nature of their Arctic land. They dug out their homes. They even used the cinders to build new roads and airport runways. Now the new homes of Heimaey are warmed from water pipes heated by molten lava.

Question 9

Question Type: MultipleChoice

When did the Lindberghs map an air route to China?

Options:

- A- before they worked for an airline
- B- before Charles worked with Dr. Carrel
- C- after World War II
