## Mix Questions

### AZ-104 Mix Questions IN THIS CASE STUDY

You have an Azure subscription that has a Recovery Services vault named Vault 1. The subscription contains the virtual machines shown in the following table.

Name	Operating system	Auto-shutdown
VM1	Windows Server 2016	Off
VM2	Windows Server 2022	19:00
VM3	Ubuntu Server 18.04 LTS	Off
VM4	Windows 10	19:00

You plan to schedule backups to occur every night at 23:00.

Which virtual machines can you back up by using Azure Backup?

#### Options:

---

- A- VM1 only
- B- VM1 and VM2 only
- C- VM1 and VM3 only
- D- VM1, VM2, VM3 and VM4

#### Answer:

---

D

### AZ-104 Mix Questions IN THIS CASE STUDY

You have an Azure subscription that contains the resources shown in the following table.

Name	Type
storage1	Storage account
container1	Blob container
table1	Storage table

You need to perform the tasks shown in the following table.

Name	Task
Task1	Create a new storage account.
Task2	Upload an append blob to container1.
Task3	Create a file share in storage1.
Task4	Add data to table1.

Which tasks can you perform by using Azure Storage Explorer?

Options:

- A- Task1 and Task3 only
- B- Task1, Task2, and Task3 only
- C- Task1, Task3, and Task4 only
- D- Task2, Task3, and Task4 only
- E- Task1, Task2, Task3, and Task4

Answer:

D

## Question 3

Question Type: Hotspot

You have a Microsoft Entra tenant named contoso.onmicrosoft.com that contains the users shown in the following table.

Name	Member of	Role assigned
User1	Group1	None
User2	Group2	None
User3	Group1, Group2	User Administrator

You enable password reset for contoso.onmicrosoft.com as shown in the Password Reset exhibit. (Click the Password Reset tab.)

You configure the authentication methods for password reset as shown in the Authentication Methods exhibit. (Click the Authentication Methods tab.)

**i** These settings only apply to end users in your organization. Admins are always enabled for self-service password reset and are required to use two authentication methods to reset their password. [Click here to learn more about administrator password policies.](#)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

**Answer Area**

Statements	Yes	No
After User2 answers three security questions correctly, he can reset his password immediately.	<input type="radio"/>	<input type="radio"/>
If User1 forgets her password, she can reset the password by using the mobile phone app.	<input type="radio"/>	<input type="radio"/>
User3 can add security questions to the password reset process.	<input type="radio"/>	<input type="radio"/>

### Mix Questions

#### AZ-104 Mix Questions IN THIS CASE STUDY

You have an Azure Storage account named storage1.

You have Azure App Service apps named App1 and App2 that run in an Azure container instance. Each app uses a managed identity.

You need to ensure that App1 and App2 can read blobs from storage1. The solution must meet the following requirements:

- \* Minimize the number of secrets used.
- \* Ensure that App2 can only read from storage1 for the next 30 days.

What should you configure in storage1 for each app? To answer, select the appropriate options in the answer area

a. NOTE: Each correct selection is worth one point

#### Answer Area

App1:

App2:

### AZ-104 Mix Questions IN THIS CASE STUDY

You need to add VM1 and VM2 to the backend pool of LB1. What should you do first?

**Options:**

---

- A- Create a new NSG and associate the NSG to VNET1/Subnet1.
- B- Connect VM2 to VNET1/Subnet1.
- C- Redeploy VM1 and VM2 to the same availability zone.
- D- Redeploy VM1 and VM2 to the same availability set.

**Answer:**

---

B

## Mix Questions

### AZ-104 Mix Questions IN THIS CASE STUDY

You have the Azure virtual networks shown in the following table.

Name	Address space	Subnet	Resource group Azure region
VNet1	10.11.0.0/16	10.11.0.0/17	West US
VNet2	10.11.0.0/17	10.11.0.0/25	West US
VNet3	10.10.0.0/22	10.10.1.0/24	East US
VNet4	192.168.16.0/22	192.168.16.0/24	North Europe

To which virtual networks can you establish a peering connection from VNet1?

**Options:**

---

- A- VNet2, VNet3, and VNet4

- B- VNet2only
- C- VNet3 and VNet4 only
- D- VNet2 and VNet3 only

Answer:

---

C

### Mix Questions

#### AZ-104 Mix Questions IN THIS CASE STUDY

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure subscription that contains 10 virtual networks. The virtual networks are hosted in separate resource groups.

Another administrator plans to create several network security groups (NSGs) in the subscription.

You need to ensure that when an NSG is created, it automatically blocks TCP port 8080 between the virtual networks.

Solution: You configure a custom policy definition, and then you assign the policy to the subscription.

Does this meet the goal?

Options:

---

- A- Yes
- B- No

Answer:

---

B

## Explanation:

A custom policy definition is a way to define your own rules for using Azure resources. You can use custom policies to enforce compliance, security, cost management, or organization-specific requirements. However, a custom policy definition alone is not enough to meet the goal of automatically blocking TCP port 8080 between the virtual networks. You also need to create a policy assignment that applies the custom policy definition to the scope of the subscription. A policy assignment is the link between a policy definition and an Azure resource. Without a policy assignment, the custom policy definition will not take effect. Therefore, the solution does not meet the goal.
