Question 1

Question Type: Hotspot

Case Study: Mix Questions

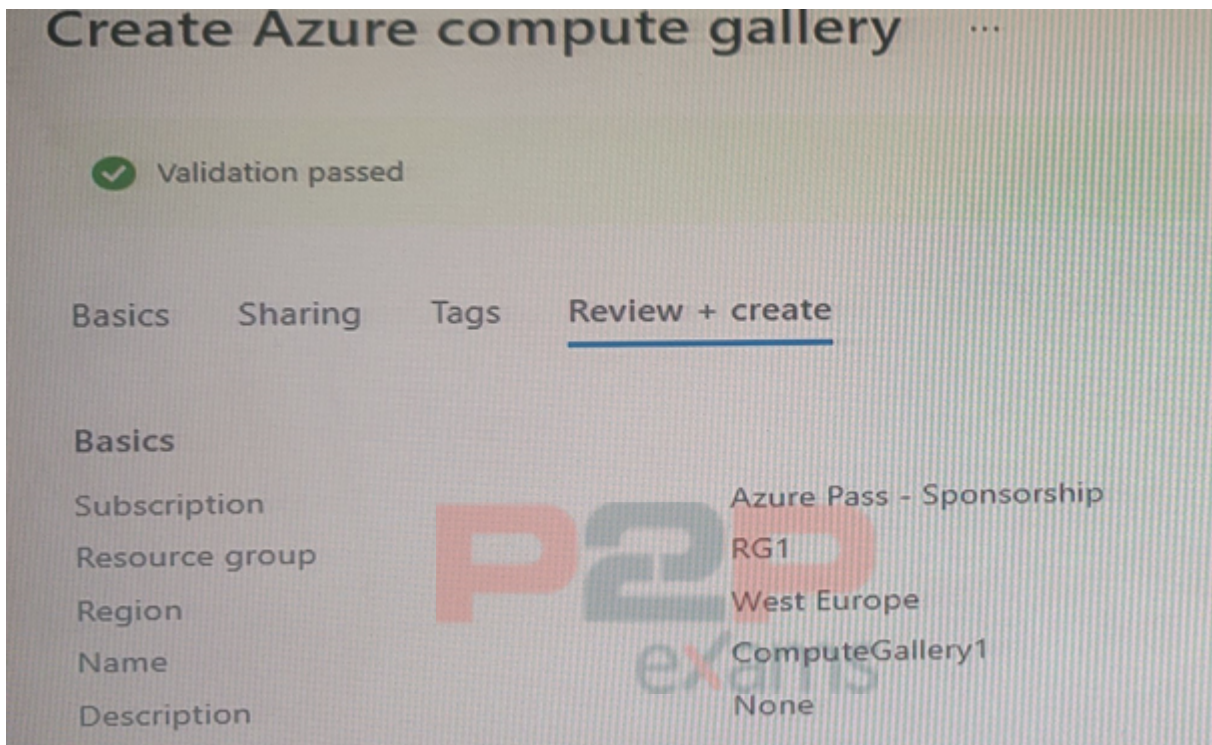

Mix Questions

AZ-140 Mix Questions IN THIS CASE STUDY

You have an Azure subscription that contains the virtual machines shown in the following table.

Name	Location	vCPUs	Generation
VM1	West Europe	8	2
VM2	East US	2	1
VM3	West US	12	1

You create an Azure Compute Gallery as shown in the Azure compute gallery exhibit. (Click the Azure compute gallery tab.)

You create a virtual machine image definition as shown in the VM image definition exhibit. (Click the VM image definition tab.)

Create a VM image definition

✓ Validation passed

Basics Version Publishing options Tags Review + create

Basics

Subscription	Azure Pass - Sponsorship
Resource group	RG1
Region	East US
Target Azure compute gallery	ComputeGallery1
VM image definition name	Image1
OS type	Windows
Security type	Standard
VM generation	V1

Question

Azure compute gallery

VM image definition

Publisher	Contoso
Offer	WindowsServer2022
SKU	Datacenter

Publishing options

Product name	None
License terms link	None
Description	None
Release notes URI	None
Privacy terms URI	None
Purchase plan name	None
Purchase plan publisher name	None
Recommended VM vCPUs	4-16
Recommended VM memory	1-32 GB
Excluded disk types	None
VM image definition end of life date	None

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Statements	Yes	No
You can use VM1 as a source for the version of the image definition.	<input type="radio"/>	<input type="radio"/>
You can use VM2 as a source for the version of the image definition.	<input type="radio"/>	<input type="radio"/>
You can use VM3 as a source for the version of the image definition.	<input type="radio"/>	<input type="radio"/>

Question 2

Question Type: MultipleChoice

Case Study: Mix Questions

Mix Questions

AZ-140 Mix Questions IN THIS CASE STUDY

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure Virtual Desktop host pool that runs Windows 10 Enterprise multi-session.

User sessions are load-balanced between the session hosts. Idle session timeout is 30 minutes.

You plan to shut down a session host named Host1 to perform routine maintenance.

You need to prevent new user sessions to Host1 without disconnecting active user sessions.

Solution: From the properties of the virtual machine of Host1, you enable just-in-time (JIT) VM access.

Does this meet the goal?

Options:

A- Yes

B- No

Answer:

B

Explanation:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/drain-mode>

Question 3

Question Type: Hotspot

Case Study: Mix Questions

Mix Questions

AZ-140 Mix Questions IN THIS CASE STUDY

You have an Azure subscription named Subscription1 that contains the users shown in the following table.

Name	Member of
User1	Group1, Group3
User2	Group2, Group3

Subscription1 contains the Azure Virtual Desktop host pools shown in the following table.

Name	Session host in host pool	Session host public inbound ports
Pool1	P1-0.contoso.com	None
Pool2	P2-0.contoso.com	None

Subscription1 contains the Azure Virtual Desktop application groups shown in the following table.

Name	Host pool	Application group type
AppGroup1	Pool1	Desktop
AppGroup2	Pool2	Desktop

You perform the role assignments shown in the following table.

Role	To group	For resource
Desktop Virtualization Reader	Group3	Subscription1
Desktop Virtualization User Session Operator	Group1	Pool1
Desktop Virtualization User	Group3	AppGroup2
Virtual Machine User Login	Group1	P1-0.contoso.com

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

- User1 can connect to the P1-0.contoso.com session host.
- User2 can connect to the P1-0.contoso.com session host.
- User2 can connect to the P2-0.contoso.com session host.

Answer:

See the Answer in the Premium Version!

Question 4

Question Type: OrderList

Case Study: Mix Questions

Mix Questions

AZ-140 Mix Questions IN THIS CASE STUDY

You have an Azure subscription that contains a virtual machine named VM1. VM1 runs a customized version of Windows 10 Enterprise.

You generalize the operating system on VM1 and shut down the virtual machine.

You need to deploy additional virtual machines based on an image of VM1 by using the Azure portal.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

- Create an image version.
- Create an Azure compute gallery.
- Generate a snapshot of VM1.
- Create an image definition.
- Back up VM1.

Answer Area

Answer:

Create an Azure compute gallery.Create an image definition.Create an image version.

Question 5

Question Type: Hotspot

Case Study: Mix Questions

Mix Questions

AZ-140 Mix Questions IN THIS CASE STUDY

You have an Azure Virtual Desktop deployment that contains the resources shown in the following table.

Name	Location	Description
Profiles1	West US	Azure file share that stores FSLogix profile containers
HostPool1	West US	Pooled host pool containing session hosts that use the profile containers stored in Profiles1
HostPool2	West US	Personal host pool containing session hosts that each has an operating system disk and a data disk

You create the resources shown in the following table.

Name	Type	Location
Recovery1	Recovery Services vault	West US
Recovery2	Recovery Services vault	Central US
Backup1	Azure Backup vault	West US
Backup2	Azure Backup vault	Central US

You need to meet following requirements: * Back up the FSLogix profile containers used by HostPool1. * Backup the data disks in HostPool2. To which resources can you back up the profile containers and the data disks? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

FSLogix profile containers:

- Backup1 only
- Recovery1 only
- Backup1 and Backup2 only
- Backup1 and Recovery1 only
- Recovery1 and Recovery2 only
- Backup1, Backup2, Recovery1 and Recovery2

Data disks:

- Backup1 only
- Recovery1 only
- Backup1 and Backup2 only
- Backup1 and Recovery1 only
- Recovery1 and Recovery2 only
- Backup1, Backup2, Recovery1 and Recovery2

Answer:

See the Answer in the Premium Version!

Question 6

Question Type: MultipleChoice

Case Study: Mix Questions

Mix Questions

AZ-140 Mix Questions IN THIS CASE STUDY

You have a Azure Virtual Desktop deployment.

You Implement FSLogix profile container.

You need to ensure that the FSLogix profile containers are not used for specific users.

What should you do?

Options:

A- Modify the RDP Properties of the host pool.

B- Apply an Application Masking rule to each session host.

- C- Apply an AppLocker policy to each session host.
- D- Modify the local groups on each session host.

Answer:

D

Explanation:

<https://docs.microsoft.com/en-us/fslogix/configure-profile-container-tutorial>

Question 7

Question Type: MultipleChoice

Case Study: Mix Questions

Mix Questions

AZ-140 Mix Questions IN THIS CASE STUDY

You have an Azure Virtual Desktop deployment that uses Azure Active Directory Domain Services (Azure AD DS). You have the following host pool:

- * Name: Pool1
- * Type: Personal
- * Number of session hosts: 5

You plan to deploy two new session hosts to Pool1. What should you do before you deploy the session hosts?

Options:

- A- Create a scaling plan.
- B- Precreate a computer account in Azure AD DS.
- C- Increase the maximum session limit.
- D- Create a registration key.

Answer:

B

Explanation:

This is done by using the Add-AzDomainComputer cmdlet in PowerShell. After the computer accounts have been created, the new session hosts can be deployed. For more information, please refer to the following Microsoft documentation:<https://docs.microsoft.com/en-us/azure/virtual-desktop/create-session-host-pools#precreate-computer-accounts-in-azure-ad-ds>.

Question 8

Question Type: MultipleChoice

Case Study: Mix Questions

Mix Questions

AZ-140 Mix Questions IN THIS CASE STUDY

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure Virtual Desktop host pool that runs Windows 10 Enterprise multi-session.

User sessions are load-balanced between the session hosts. Idle session timeout is 30 minutes.

You plan to shut down a session host named Host1 to perform routine maintenance.

You need to prevent new user sessions to Host1 without disconnecting active user sessions.

Solution: From the host pool, you remove Host1 from the session host list.

Does this meet the goal?

Options:

A- Yes

B- No

Answer:

B

Explanation:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/drain-mode>

Question 9

Question Type: MultipleChoice

Case Study: Mix Questions

Mix Questions

AZ-140 Mix Questions IN THIS CASE STUDY

You have an Azure Virtual Desktop deployment.

You deploy and configure Azure Virtual Desktop in a secondary location.

You plan to perform a test failover to the secondary location, but discover existing user sessions to the primary location.

You need to sign out users from the session hosts in the primary location.

Which PowerShell cmdlet should you run?

Options:

- A- Invoke-RdsUserSessionLogoff
- B- Remove-AzWvdUserSession
- C- Invoke-RestMethod
- D- Remove-Alias

Answer:

B

Explanation:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/disaster-recovery>

Question 10

Question Type: MultipleChoice

Case Study: Mix Questions

Mix Questions

AZ-140 Mix Questions IN THIS CASE STUDY

You have an Azure Virtual Desktop deployment and the users shown in the following table.

Name	User device operating system	Preferred web browser
User1	MacOS	Mozilla Firefox
User2	Windows 10	Internet Explorer
User3	iOS	Apple Safari

All the users plan to use a web browser to access Azure Virtual Desktop resources.

Which users can connect to Azure Virtual Desktop by using their preferred browser?

Options:

- A- User2 only
- B- User1 only
- C- User1, User2, and User3
- D- User2 and User3 only
- E- User1 and User2 only

Answer:

C

Explanation:

<https://learn.microsoft.com/en-us/azure/virtual-desktop/users/connect-web>

Question 11

Question Type: MultipleChoice

Case Study: Mix Questions

Mix Questions

AZ-140 Mix Questions IN THIS CASE STUDY

You have an Azure subscription that contains an Azure Virtual Desktop deployment and the storage accounts shown in the following table.

Name	Kind	Location
storage1	StorageV2	East US
storage2	FileStorage	East US
storage3	BlobBlockStorage	East US
storage4	StorageV2	West US

You plan to deploy a host pool named Poo 11 to the East US Azure region. Poo 11 will use FSLogix Profile Containers and Office Containers.

Which storage accounts can Pool! use?

Options:

- A- storage2 only
- B- storage 1 and storage2 only
- C- storage1, storage2, and storage3 only
- D- storage1, storage2, and storage4 only
- E- storage1, storage2, storage3, and storage4

Answer:

D
