Question 1

Question Type: MultipleChoice

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure Virtual Desktop host pool named Pool1 that is integrated with a Microsoft Entra Domain Services managed domain. You need to configure idle session timeout settings for users that connect to the session hosts in Pool1.

Solution: From a Microsoft Entra joined computer, you modify the AADDC Users GPO settings.

Does this meet the goal?

Options:

A- Yes

B- No

Answer:

A

Question 2

Question Type: Hotspot

You have an Azure Virtual Desktop deployment that contains a host pool named HostPool1.

You plan to deploy session hosts to HostPool1 as shown in the following table.

Name	Operating system	Security type
Host1	Windows Server 2019	Trusted launch
Host2	Windows 10	Standard

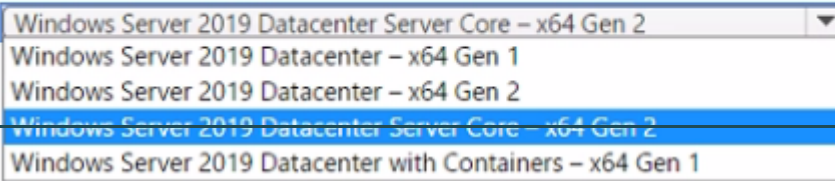

rent users.

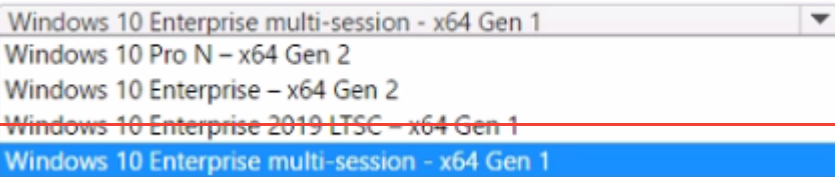

n version to deploy from Azure Marketplace to the session hosts.

What should you recommend for each session host? To answer, select the appropriate options in the answer area.

Answer Area

Answer:

Host1: 

Host2: 

Question 3

Question Type: Hotspot

You have an Azure subscription that contains the storage accounts shown in the following table.

Name	Location	Azure Files share
storage1	West US	share1

the following table.

Name	Location	Type
Vault1	East US	Recovery Services vault

sktop host pools shown in the following table.

Name	Session host	Location	FSLogix user profile location
Pool1	P1-0	West US	share1
Pool2	P2-0	West US	share2
Pool3	P3-0	West US	share3

true. Otherwise, select No.

Answer Area

Statements	Yes	No
The FSLogix user profiles in Pool1 can be backed up to Vault1.	<input type="radio"/>	<input type="radio"/>
The FSLogix user profiles in Pool2 can be backed up to Vault2.	<input type="radio"/>	<input type="radio"/>
P3-0 can be backed up to Vault4.	<input type="radio"/>	<input type="radio"/>

Answer:

Question 4

Question Type: MultipleChoice

You have an Azure Virtual Desktop deployment that contains a host pool. The host pool contains 10 session hosts. The session hosts are configured by using a custom image and ephemeral disks.

You need to deploy Microsoft OneDrive for Business.

Which two actions should you perform for each session host? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

Options:

- A- Install FSLogix.
- B- Install the OneDrive sync app by using the per-machine installation option.
- C- Implement Application Masking.
- D- Install the OneDrive sync app by using the per-user installation option.
- E- Deploy an MSIX app attach package.

Answer:

A, B

Explanation:

The two actions you should perform for each session host in order to deploy Microsoft OneDrive for Business are:

A) Install FSLogix - FSLogix provides a single-user solution for running multiple OneDrive for Business clients simultaneously on the same session host.

Question 5

Question Type: MultipleChoice

You have an Azure Virtual Desktop deployment that contains a host pool. The host pool contains 15 session hosts. All the session hosts have FSLogix installed.

You need to configure the path to where the user profiles are stored. The solution must minimize administrative effort.

Which registry setting should you use?

Options:

- A- VHDLocations
- B- CCDLocations
- C- ProfileDirSDDL
- D- FlipFlopProfileDirectoryName

Answer:

A

Question 6

Question Type: Hotspot

You create an Azure Virtual Desktop host pool as shown in the following exhibit.

Create a host pool ...

stion based on the information presented in the graphic.

✓ Validation passed.

What is the maximum number of concurrent user sessions for the host pool?

5
10
15
30
50
150

Answer:

Where will the first five user sessions be created?

On five different session hosts
On the same session host
On three different session hosts

Question 7

Question Type: Hotspot

Virtual Machines

Resource group	RG1
Name prefix	vm
Virtual machine location	West Europe
Availability options	Availability zone
Availability zone	3
Image type	Gallery
Image	Windows 11 Enterprise multi-session
Number of VMs	5
Use managed disks	Yes
Boot Diagnostics	Enable with managed storage account (recommended)
Subnet	default(10.0.0.0/24)
Network security group	Basic
Public inbound ports	None
Specify domain or unit	No
Domain Join Type	Active Directory

You have an Azure Virtual Desktop host pool that contains 10 session hosts.

You plan to configure each session host to use an FSLogix profile container that will exclude specific folders in the user profile.

You need to perform the following configurations:

- * Create a configuration file to list the excluded profile folders.
- * Identify which registry setting will distribute the file to each session host automatically.

What should you name the configuration file, and which registry setting should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Answer:

File name:

▼

- Exclude.xml
- Redirect.xml
- Redirections.xml

Registry setting:

▼

- KeepLocalDir
- NoProfileContainingFolder
- RedirXMLSourceFolder
