Question 1

Question Type: MultipleChoice

You plan to deploy Windows Virtual Desktop session host virtual machines based on a preconfigured master image. The master image will be stored in a shared image.

You create a virtual machine named Image1 to use as the master image. You install applications and apply configuration changes to Image1.

You need to ensure that the new session host virtual machines created based on Image1 have unique names and security identifiers.

What should you do on Image1 before you add the image to the shared image gallery?

Options:

- A- At a command prompt, run the set computername command.
- B- At a command prompt, run the sysprep command.
- C- From PowerShell, run the rename-computer cmdlet.
- D- From the lock screen of the Windows device, perform a Windows Autopilot Reset.

Answer:

B

Explanation:

<https://docs.microsoft.com/en-us/azure/virtual-machines/windows/prepare-for-upload-vhd-image#determinewhen-to-use-sysprep>

Question 2

Question Type: MultipleChoice

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure Virtual Desktop deployment.

You need to ensure that users are signed out automatically when they disconnect from a session.

Solution: From the Local Group Policy Editor, you configure the Remote Session Environment settings.

Does this meet the goal?

Options:

A- Yes

B- No

Answer:

B

Question 3

Question Type: MultipleChoice

You have an Azure Virtual Desktop deployment that contains a host pool. The pool has the following settings:

- * Resource group: RG1
- * Host pool name: Pool1
- * Location: East US
- * Host pool type: Pooled

The deployment contains the workspaces shown in the following table.

Name	Resource group	Location
Workspace1	RG1	East US
Workspace2	RG1	West US
Workspace3	RG2	East US
Workspace4	RG2	West US

For Pool1, you plan to create a RemoteApp application group named AppGroup1.

In which workspaces can you register AppGroup1?

Options:

- A- Workspace1 and Workspace2 only
- B- Workspace1 and Workspace3 only
- C- Workspace1 only
- D- Workspace1, Workspace2, Workspace3, and Workspace4

Answer:

B

Question 4

Question Type: MultipleChoice

You have an Azure Active Directory Domain Services (Azure AD DS) managed domain named conioso.com.

You create a Azure Virtual Desktop host pool named Pool1. You assign the Virtual Machine Contributor role for the Azure subscription to a user named Admin1.

You need to ensure that Admin1 can add session hosts to Pool1. The solution must use the principle of least privilege.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

Options:

- A- Add Admin1 to the AAD DC Administrators group.
- B- Assign a Microsoft 365 Enterprise E3 license to Admin1.
- C- Assign Admin1 the Desktop Virtualization Session Host Operator role for Pool1.
- D- Assign Admin1 the Desktop Virtualization Host Pool Contributor role for Pool1.
- E- Generate a registration token.

Answer:

C, E

Explanation:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/rbac>

Question 5

Question Type: MultipleChoice

You have an Azure Virtual Desktop host pool named Pool1 that contains three session hosts. The session hosts are configured to use FSLogix profiles.

On a management computer, you create an Application Masking rule and assignment files.

You need to apply Application Masking to the session hosts in Pool1.

What should you do?

Options:

- A- Generate a registration token.
- B- Install the FSLogix agent on the session hosts in Pool1.
- C- Compile the rule and assignment files.
- D- Copy the files to the session hosts in Pool1.

Answer:

D

Explanation:

<https://cloudbuild.co.uk/fslogix-application-masking-in-windows-virtual-desktop/>

Question 6

Question Type: MultipleChoice

You have an Azure subscription that contains the resources shown in the following table.

Name	Description
AVDVM-0	A virtual machine used in a pooled virtual machine set
share1	An Azure file share that stores FSLogix profile containers
Image1	A custom Windows 10 image in a shared image gallery
Image2	A custom Windows Server 2019 image stored in Azure Blob storage

You create a recovery services vault named Vault1.

Which resources can you back up using Azure Backup to Vault1?

Options:

- A- AVDVM-0 only
- B- AVDVM-0 and share1 only
- C- AVDVM-0, Image1 and Image2 only
- D- AVDVM-0. share1 and Image1 only
- E- AVDVM-0. share1. Image1 and Image2

Answer:

B

Explanation:

<https://docs.microsoft.com/en-us/azure/backup/backup-overview#what-can-i-back-up> Operational backup of blobs is a local backup solution. So the backup data isn't transferred to the Backup vault

Question 7

Question Type: MultipleChoice

You need to prepare the disk on VM1 for use with the Azure Virtual Desktop deployment. Which two actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

Options:

- A- Convert the disk format to VHD.
- B- Merge the disk.
- C- Convert the disk type to Fixed size.
- D- Compact the disk.
- E- Convert the disk type to Differencing.

Answer:

A, C

Question 8

Question Type: MultipleChoice

You have a Azure Virtual Desktop deployment.

You need to monitor the deployment of using the Azure Virtual Desktop Insights solution in Azure Monitor.

What should you use as the Diagnostic settings destination for the host pool?

Options:

- A- Event hub
- B- Log Analytics workspace
- C- Storage account

Answer:

B

Explanation:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/azure-monitor>

Question 9

Question Type: MultipleChoice

Your company has a main office and two branch offices. Each office connects directly to the internet. The router in each branch office is configured as an endpoint for the following VPNs:

A VPN connection to the main office

A site-to-site VPN to Azure

The routers in each branch office have the Quality of Service (QoS) rules shown in the following table.

Name	Destination	Available bandwidth allocated
Rule1	VPN traffic to the main office	25%
Rule2	Site-to-site VPN traffic to Azure	25%
Rule3	HTTP/HTTPS traffic to all Azure and Microsoft 365 public IP addresses	25%
Rule4	Traffic to non-Microsoft internet addresses	25%

Users in the branch office report slow responses and connection errors when they attempt to connect to Windows Virtual Desktop resources.

You need to modify the QoS rules on the branch office routers to improve Windows Virtual Desktop performance.

For which rule should you increase the bandwidth allocation?

Options:

- A- Rule2
- B- Rule3
- C- Rule4
- D- Rule1

Answer:

B

Explanation:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/safe-url-list>

Any Remote Desktop clients you use must have access to the following URLs:

Remote Desktop clients

Address Outbound TCP port

*.wvd.microsoft.com 443

*.servicebus.windows.net 443

go.microsoft.com 443

aka.ms 443

docs.microsoft.com 443

privacy.microsoft.com 443

query.prod.cms.rt.microsoft.com 443

Question 10

Question Type: MultipleChoice

You have a Azure Virtual Desktop deployment that contains multiple host pools.

You need to create a PowerShell script to sign users out of a specific session host before you perform a maintenance task.

Which PowerShell module should you load in the script?

Options:

- A- Az.Automation
- B- Az.COMputC
- C- Az.Maintenance
- D- Az.DektopVirtualization

Answer:

D

Explanation:

<https://docs.microsoft.com/en-us/powershell/module/az.desktopvirtualization/?view=azps-6.6.0#desktopvirtualization>
