Question 1

Question Type: MultipleChoice

You have an Azure virtual machine named VM1 that contains the drives shown in the following table.

Letter	Name
C	Operating System
D	Temporary Storage
E	Data Disk

On VM1, you plan to install an app named App1. The data for App1 must be stored on a persistent data disk assigned to drive D.

You need assign the data disk to drive D.

What should you do on VM1 first?

Options:

- A- Change the drive letter of the Temporary Storage drive to F.
- B- Move pagefile.sys to the Operating System drive.
- C- Stop (deallocate) VM1.

D- Expand the Temporary Storage drive.

Answer:

C

Question 2

Question Type: MultipleChoice

Your network contains an Active Directory Domain Services (AD DS) forest. The forest contains the servers shown in the following table.

Name	In domain	Description
Server1	contoso.com	Domain controller, DNS server
Server2	contoso.com	Domain controller, DNS server
Server3	contoso.com	DNS server
Server4	east.contoso.com	Domain controller, DNS server
Server5	east.contoso.com	DNS server

On Server1, you create a DNS zone named Zone1.com as shown in the following exhibit.

Zone1.com Properties

- WINS
- Zone Transfers
- Security
- General
- Start of Authority (SOA)
- Name Servers

Status: Running

Pause

Type: Active Directory-Integrated

Change...

Replication: All DNS servers in this domain

Change...

Data is stored in Active Directory.

Dynamic updates: Secure only

 Allowing nonsecure dynamic updates is a significant security vulnerability because updates can be accepted from untrusted sources.

To set aging/scavenging properties, click Aging.

Aging...

- Help

To which DNS servers is Zone1.com replicated?

Options:

- A- Server2 only
- B- Server2 and Server3 only
- C- Setver2 and Sen/er4 only
- D- Server2, Server3, and Server4 only
- E- Server2, Server3, Server4, and Server5

Answer:

D

Question 3

Question Type: Hotspot

You have a server named Host1 that runs Windows Server 2022 and is configured as a container host. Host1 stores a container image named image1 that is based on Windows Server 2019.

You need to start a container from image1 on Host1.

How should you complete the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Docker

- container
- isolation=hyperv
- isolation=process

Answer:

Question 4

Question Type: MultipleChoice

You have four testing devices that are configured with static IP addresses as shown in the following table.

Name	IP address
TestDevice1	192.168.16.242
TestDevice2	192.168.16.243
TestDevice3	192.168.16.244
TestDevice4	192.168.16.245

The test devices are turned on once a month.

You need to prevent Server1 from assigning the IP addresses allocated to the test devices to other devices when the test devices are offline. The solution must minimize administrative effort.

What should you do?

Options:

- A- Create an exclusion range.
- B- Create reservations.
- C- Configure the Scope options.
- D- Create a policy.

Answer:

B

Question 5

Question Type: MultipleChoice

You have an Azure virtual machine named VM1 that runs Windows Server.

You need to ensure that administrators request access to VM1 before establishing a Remote Desktop connection.

What should you configure?

Options:

- A- Azure Front Door
- B- Microsoft Defender for Cloud
- C- Azure AD Privileged Identity Management (PIM)
- D- a network security group (NSG)

Answer:

B

Question 6

Question Type: MultipleChoice

You have an on-premises server named Server1 that runs Windows Server.

You have an Azure subscription that contains a virtual network named VNet1.

You need to connect Server1 to VNet1 by using Azure Network Adapter.

What should you use?

Options:

A- Azure AD Connect

B- Device Manager

C- the Azure portal

D- Windows Admin Center

Answer:

D

Question 7

Question Type: MultipleChoice

Your network contains a DHCP server.

You plan to add a new subnet and deploy Windows Server to the subnet.

You need to use the server as a DHCP relay agent.

Which role should you install on the server?

Options:

- A- Network Policy and Access Services
- B- Remote Access
- C- Network Controller
- D- DHCP Server

Answer:

B

Question 8

Question Type: MultipleChoice

Your network contains an Active Directory forest. The forest contains two domains named contoso.com and east.contoso.com and the servers shown in the following table.

Name	Domain	Configuration
DC1	contoso.com	Domain controller
Server1	contoso.com	Member server
DC2	east.contoso.com	Domain controller
Server2	east.contoso.com	Member server

Contoso.com contains a user named User1.

You add User1 to the built-in Backup Operators group in contoso.com.

Which servers can User1 back up?

Options:

- A- DC1 only
- B- Server1 only
- C- DC1 and DC2 only
- D- DC1 and Server1 only
- E- DC1, Server1, and Server2

Answer:

A
