Question 1

You assign security roles to users in a company.

New purchasing managers must be able to have a single role assigned to them to accomplish a tasks. The purchasing manager role has the following requirements;

* Must be standalone and not -impacted when another security role is changed.

* Must be able to view payment journals but not edit them.

The purchasing manager role does not currently have access to the payment journals.

You need to edit the security configuration on to meet the requirements.

What Should you do?

Options:

A- Create a privilege for the read-only access for the payment journal tables.

B- Assign an existing security role with read-only access to the payment journal as a sub role.

C- Create a new security role for the payment journal, access,

D- Create an Extension Data Security (XOS) policy and add the payment journal table as a constrained table.

Answer:

D

Question 2

A company uses Dynamics 365 Supply Chain Management. The company has two legal entities, one in the United States and one in Canada.

The Canada entity has a vendor that the US entity wants to order from directly. The US entity requires access to the vendor sales representative information for order placement

You need to resolve the US access requirement.

What should you do?

Options:

A- Associate the global address book party to the US company.

B- Create an intercompany relationship.

C- Create a new address book.

D- Set the secure by address book parameter.

Answer:

B

Question 3

Question Type: MultipleChoice

You are implementing Dynamics 365 Supply Chain Management. You have a CSV file that contains two million records. You need to import the file into Dynamics 365 Supply Chain Management without manual manipulation of the dat

a. What should you use?

Options:

A- Microsoft Excel Add-In

B- Microsoft SQL Server Integration Services

C- Classic data integration

D- Data management import job

Answer:

D

Question 4

Question Type: **MultipleChoice**

A company that uses Dynamics 365 Finance has a new data entry team.

The data entry team creates multiple records for a single contact.

You need to recommend methods to minimize creation of multiple contacts that are the same.

Which two options should you recommend? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

Options:

A- Set the Check for duplicate parameter.

B- Check for duplicates on the global address book list page.

C- Set the Delete parties with no roles parameter

D- Assign parties in the global address book.

E- Set the secure by address book parameter.

Answer:

A, D

Question 5

Question Type: MultipleChoice

A company is preparing for go-live with Dynamics 365 Finance.

The company plans to test the sales order process.

You need to ensure that a delivery note is generated for each sales order created.

What should you use?

Options:

A- Chain test case

B- Derived test case

C- SysTest

D- Data task automation

Answer:

B

Question 6

Question Type: MultipleChoice

A company implements Dynamics 365 Supply Chain Management. The company is starting a short-term project that has a rigid budget.

The warehouse manager requests an environment that has demo data so that users can look at samples of the warehouse module. A cloud scale unit is not required.

You need to recommend a cost-effective environment.

What should you recommend?

Options:

A- Tier 3

B- Tier 1

C- Tier 2

D- Tier 4

Answer:

B

Explanation:

Environment types

You can use the following environment types for your project:

* Environment image (VHD) -- These additional Tier-1 environments are hosted on-premises by using a virtual hard disk (VHD) that can be downloaded from Microsoft Dynamics Lifecycle Services (LCS).

* Standard -- This environment is included in the standard offer and is managed by Microsoft in a Microsoft subscription. Standard environments include the production environment and a Tier-2 Standard Acceptance Test environment.

* Add-on -- The add-on environments are in a Microsoft-managed subscription that the customer has purchased in addition to the standard offer. For example, an add-on environment might be an additional Tier-4 environment for performance testing.

* Cloud-hosted -- Cloud-hosted environments are additional environments that are managed by the customer or partner in a customer or partner Microsoft Azure subscription. A cloud-hosted environment can include a Tier-1 demo environment.

Question 7

Question Type: **MultipleChoice**

You are implementing Dynamics 365 Finance and build out customizations. You finalize all configurations.

You need to deploy the solution to a Microsoft-managed user acceptance testing (UAT) environment. Costs must be minimized.

What should you do first?

Options:

A- Complete project onboarding in lifecycle Services (LCS).

B- Upload a new estimate to the subscription estimator.

C- Purchase a tier 3 UAT environment.

D- Purchase a tier 5 UAT environment.

Answer:

C

Explanation:

User acceptance testing (UAT) can be used in Tiers 2-5 sandbox.

Note: Tiers 2-5 can be purchased to increase performance of the environment. The higher the tier, the more compute and database capacity is reserved for your use.

Question 8

Question Type: **MultipleChoice**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have the following Dynamics 365 Finance instances:

Instance	Comments
1	Contains configuration data for a company named CompanyA
2	Contains a blank setup for a company named CompanyB

You must copy the configuration data from CompanyA to CompanyB.

Solution: Use the Move Database option in Lifecycle Services.

Does the solution meet the goal?

Options:

A- Yes

B- No

Answer:

B

Explanation:

Question 9

Question Type: **MultipleChoice**

Your company attends a conference where many part suppliers will be in attendance. Your supplier relations executives meet with suppliers to discuss contracts with your company at the conference.

You are building a mobile app to support the discussions. The mobile app must access multiple data entities within Dynamics 365 Finance. Data operations must be synchronous and provide minor updates to existing information.

You need to implement a data access technology.

Which data access technology should you use?

Options:

A- Business events

B- ODataAPIs

C- ADO.NET

D- Data management framework

Answer:

B

Question 10

Question Type: **MultipleChoice**

Dynamics 365 Finance is implemented at your company.

Users in the accounts payable roles and inventory management roles can edit the general ledger details for all departments. These roles must not be able to change the inventory on hand or be able to pay a parts supplier. The users have physical access to warehouses.

You attempt to remove the users from the roles and see that the users are then added back to the roles.

Users must not be able to be added to both roles. Users in a single role must be able to perform their duties.

You need to ensure that users are assigned to the proper roles.

What are two possible ways to achieve this goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

Options:

A- Remove the privileges from the roles.

B- Include the users in automatic assignment.

C- Set up segregation of duties for the users.

D- Remove segregation of duties for the users.

E- Exclude the users from automatic assignment.
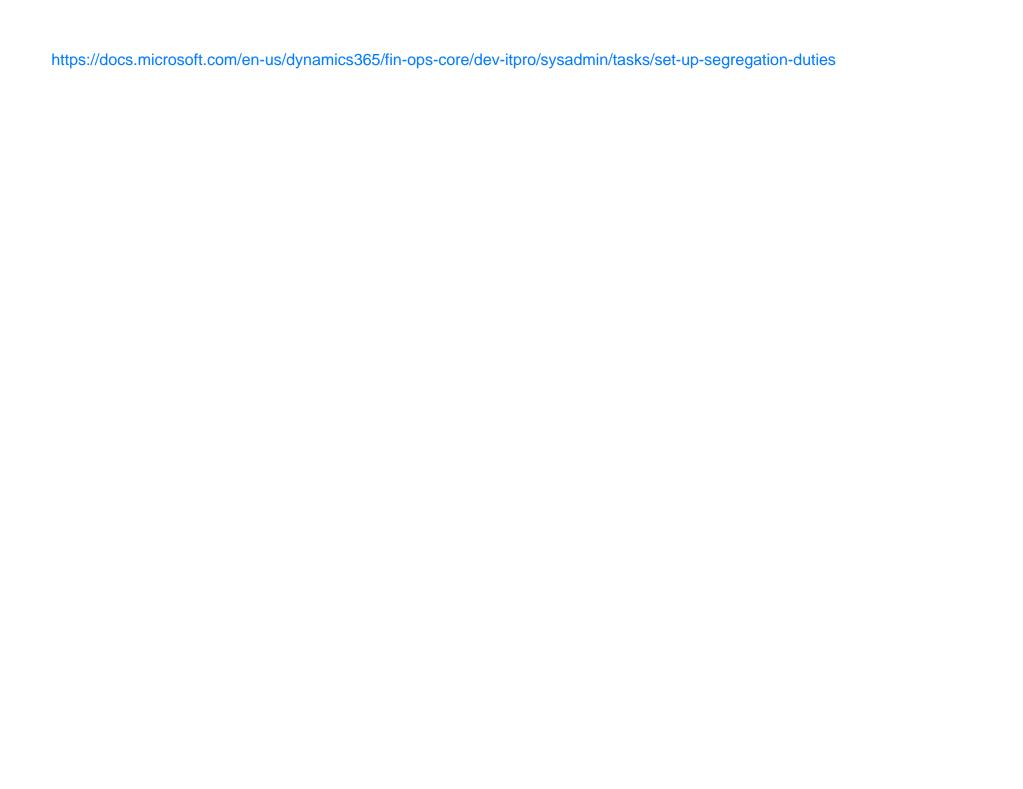

Answer:

B, C

Explanation:

B: To use anything other than common capabilities in finance and operations apps, users must be assigned to security roles. You can assign users to roles automatically, based on rules and business data, exclude users from automatic role assignment, or add users to roles manually.

C: You can set up rules to separate tasks that must be performed by different users. This concept is named segregation of duties.
