Question 1

Question Type: Hotspot

A company uses Dynamics 365 Supply Chain Management. The company uses a Business Unit financial dimension. The dimension is required on items and posted on transactions.

The company wants to update item costs but exclude the required financial dimension. The change must include a warning to users before the update. The costing method should be calculated based on the expected, calculated cost to produce an item.

You must configure the system to meet the requirements.

Which actions should you perform? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement

Action

Enable the feature.
Answer:

- Enable Options of defaulting financial dimensions for inventory standard cost revaluation.
- Enable Costing version maintenance.
- Enable Default financial dimensions separately when using item templates.
- Enable Inventory and storage dimensions.

Question 2

Question Type: Multiple Choice

Configure the feature.

A company uses Dynamics 365 Supply Chain Management.

You create a product by using an incorrect product dimension group. The product has not yet been released to the legal entities.

You need to determine whether you can change the product dimension group.

Which two conditions must be met? Each answer presents part of the solution.

NOTE: Each correct selection is worth one point.

Options:

A- Dimensions must not be specified for the product master.

- B-** The item must not already be validated.
- C-** Dimensions must be specified that match the original but not the new product dimension group.
- D-** The product master must not be released to any legal entities.

Answer:

A, D

Explanation:

Changing the product dimension group for a product master

The setup of the product dimension group for a product master can be changed if the product master has not been released, and if no dimensions have been created.

Otherwise, the following rules apply:

If a product master has been shared, the setup of the product dimension group cannot be changed. This rule applies both to the shared instance of the product master and to any company-specific instances.

If a product master is created as a released product master, the product dimension group cannot be changed.

If dimensions have been created for a product master, the product dimension group cannot be changed. However, if the dimension setup of a new product dimension group is identical to the dimension setup of the original product dimension group, the new product dimension group can be changed.

Question 3

Question Type: Hotspot

A company is implementing Dynamics 365 Supply Chain Management. The company uses subcontracted services on its bills of material (BOMs).

You must set up and release a subcontractor item so that it can be included on the BOM and subcontractor charges are included in the BOM calculation. Because the subcontractor is a step included in a BOM but not a tangible item, inventory for the item must not be tracked in the warehouse.

You need to set up the subcontractor item and release the item to the company.

What should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement

Create subcontractor item for release.

Answer:

Configuration

- Service product type
- Item product type
- BOM line
- BOM designer

Question 4

Question Type: MultipleChoice

Set up inventory policy.

A company uses Dynamics 365 Supply Chain Management.

A large item fits only one item per pallet. A purchase order for the item must be a minimum of 24. Additional line quantities for the item must be in multiples of 24.

An incorrect setup for the item allows entry of multiples of 50. This setup error causes purchase order entry overrides.

You must configure the system to enforce a match of default quantities during setup.

What should you do?

- Select stocked product.
- Clear stocked product.

Options:

A- Select the Strict option.

B- Select the Standard option.

C- Configure Warehouse management options.

Answer:

A

Explanation:

Use strict or standard validation of default order quantities

You can choose how strict the system should be when validating quantities entered in the Default order settings for a product. When you use the new strict option, the Standard order quantity must always be a multiple of the specified Multiple value for purchase orders, inventory, and sales orders. If you are using strict validation, you won't be able to save default order settings that don't meet this requirement (and an error is shown in the message bar).

Question 5

Question Type: Hotspot

A donut company is implementing Dynamics 365 Supply Chain Management.

The company wants to set up and maintain formula items for donut production. If the formula quantity changes, all ingredients must automatically adjust with no manual edits.

You must configure the formula features.

Which features should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Configuration

Feature

Answer: Configure item component consumption.

Question 6

Question Type: MultipleChoice

A retail distributor is implementing Dynamics 365 Supply Chain Management

Enable the formula feature.

Wholesale customers receive 10 percent off list price for the current calendar year. CustomerA is a wholesaler that agreed to a pilot program for a new product. with terms to receive a discounted set price for 100 each of the products for the next six months. The distributor will charge penalties to CustomerA If the 100 each are not sold within the period

You must configure pricing Customer

A.

Which three configurations should you set up? Each correct answer presents part Of the solution

Options:

	▼
Backflush	
Fixed	
Constant	
Variable	
	▼
Scalable	
Signature	
Step	
Version	

- A- Create a trade agreement for wholesalers.
- B- Create a sales agreement with the max parameter set to yes
- C- Set the effective date on the trade agreement to begin after sales agreement.
- D- Create a sales agreement with the price and discount is fixed parameter set to yes
- E- Set the find next parameter on trade agreements.

Answer:

A, C, D
