Question 1

Question Type: MultipleChoice

Case Study: Mix Questions

Mix Questions

MB-330 Mix Questions IN THIS CASE STUDY

A company is implementing the Warehouse management module in Dynamics 365 Supply Chain Management.

The company will receive an item in three units of measure (UOM): each, case, and pallet. The item must be counted from a mobile device in each UOM or case UOM only by the warehouse worker.

You must configure the item.

What should you configure?

Options:

- A- Create a reservation hierarchy and define the rules.
- B- Set the default inventory unit of measure to each and the default purchase and sell unit to case.
- C- Create one-unit sequence group and enable counting per unit of measure.
- D- Set the default inventory unit of measure to each and assign the default item set up to case.
- E- Create separate unit sequence groups, one for case counting and one for each counting.

Answer:

C

Explanation:

Set up a unit sequence group and unit of measure conversions in Warehouse management.

The unit sequence group defines the sequence of units that can be used in warehouse operations. The sequence determines the order of units in which warehouse work is generated and it is applied when work is created for quantities on a purchase order line or transfer order line. The unit sequence group should include units of measure that range from the smallest to the largest unit and can be used for the product in warehouse operations.

Question 2

Question Type: MultipleChoice

Case Study: Mix Questions

Mix Questions

MB-330 Mix Questions IN THIS CASE STUDY

A company uses Dynamics 365 Supply Chain Management to manage procurement operations.

The company sources the majority of items from foreign vendors based in different countries/regions. Each country/region has different exporters. Exporter details for every shipment is required for compliance.

You need to report shipments by exporters

What should you configure?

Options:

- A- Shipping container
- B- Vessel
- C- Voyage
- D- Folio
- E- Purchase order

Answer:

B

Question 3

Question Type: MultipleChoice

Case Study: Mix Questions

Mix Questions

MB-330 Mix Questions IN THIS CASE STUDY

A company uses Dynamics 365 Supply Chain Management. The company provides warehouse workers with handheld devices to perform inventory operations.

Periodic inventory audits are required due to the frequent theft of some inventory items from a

warehouse. Some inventory has been fully depleted. On-hand inventory quantities of other items are consistently incorrect.

You need to configure the system to automatically create cycle-counting work.

Which two methods can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

Options:

- A- threshold parameters
- B- work pool
- C- cycle count plan
- D- work policies
- E- inventory journals

Answer:

A, E

Question 4

Question Type: MultipleChoice

Case Study: Mix Questions

Mix Questions

MB-330 Mix Questions IN THIS CASE STUDY

A company uses Planning Optimization.

A customer calls a service agent at the company and asks about product availability dates when placing an order.

Capable to promise (CTP) is initiated from the customer's order.

What is the expected output?

Select only one answer.

Options:

- A- An error occurs because CTP is not supported when Planning Optimization is enabled.

- B- Built-in master planning runs the calculation if the master plan has a separate dynamic master plan specified.
- C- A warning shows in the plan history log.
- D- CTP runs if add-ins are installed from Feature management.
- E- CTP calculates if all Planning Optimization jobs are withheld from batch scheduling.

Answer:

A

Question 5

Question Type: MultipleChoice

Case Study: Mix Questions

Mix Questions

MB-330 Mix Questions IN THIS CASE STUDY

A company uses Dynamics 365 Supply Chain Management.

The company classifies and tracks products based on how useful they are for achieving their business goals. Certain product classifications are important in relation to inventory controls and margins. Other classifications have a small profit margin and are less important for inventory variances.

The classification configuration must feed into existing classification reports and system logic.

You need to configure the products for the classifications.

Where should you configure the classifications?

Options:

- A- Unreleased product variant
- B- Released product variant
- C- Product attributes

- D- Unreleased product
- E- Released product

Answer:

C

Question 6

Question Type: MultipleChoice

Case Study: Mix Questions

Mix Questions

MB-330 Mix Questions IN THIS CASE STUDY

You are running Planning Optimization. A and B items need to be planned. C and D items do not need to be included in Planning Optimization.

Users sometimes mistakenly include the C and D items in the plans.

You need to prevent C and D items from inclusion when users manually start a plan. The solution must not require users to manually create a filter.

What should you configure?

Select only one answer.

Options:

- A- Runtime filter
- B- Quick filter
- C- ter
- D- Advanced filtering and query syntax
- E- Filter code

Answer:

C
