Question 1

Question Type: DragDrop

You are a Dynamics 365 Finance developer.

You need to configure integration between Dynamics 365 Finance and other tools.

Which integration types should you use? To answer, drag the appropriate integration types to the correct requirement. Each integration type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Question 2

Question Type: MultipleChoice

You are a Dynamics 365 Finance developer. You create an integer variable named totalSales.

You need to display the value from totalSales in an info statement.

Which three code segments can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

image not found or type unknown

Options:

- A) Option A
- B) Option B
- C) Option C
- D) Option D

Answer:

A, C, D

Explanation:

A: int2Str converts an integer to the equivalent string.

C: any2Str converts an anytype value to a str value. The anytype data type is a placeholder for any data type.

D: Example:

```
void MyMethod()
{
for (int i = 0; i < 10; i++)
{
info(strfmt('i is %1', i));
}
}
```

Question 3

Question Type: MultipleChoice

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

SalesLineType and add a new method that returns the day of week for the system's current date as an integer value.

You need to create a class that extends SalesLineType and adds the new method.

Solution: You create the following code:

Does the solution meet the goal?

Options:

A) Yes

B) No

Answer:

B

Question 4

Question Type: MultipleChoice

A company has a cloud-based installation of Dynamics 365 Finance.

A user reports slow response times in the application when accessing the production environment.

You need to diagnose the performance issue by using the Environment monitoring tool.

Which two features of the Customization analysis should you use? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

Options:

- A) Customization analysis
- B) System diagnostics
- C) SQL insights
- D) Health metrics
- E) Availability monitoring

Answer:

C, D

Question 5

Question Type: OrderList

An error occurs when an employee creates a new workflow using a custom approval element to track the status of a document that the workflow is created correctly.

in which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Image not found or type unknown

Answer:

One file per step for the flow for the process scenario.

Question 6

Question Type: DragDrop

A company uses Dynamics 365 Finance.

The company requires extended data types (EDTs) that meet the following requirements:

- * The new EDTs must use primitive base types without extending other EDTs.
- * One Type must track the day that the user receives goods in the warehouse.
- * One type must track the quantity of items that the user receives.

You need to create the EDTs.

Which EDT types should you use? To answer, drag the appropriate types to the correct requirements. Each type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point
