Question 1

Question Type: MultipleChoice

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is automating manual processes in the Dynamics 365 finance and operations apps. The company has the following batch groups and priorities configured:

Batch Group Name	Priority
BATCHGROUP1	Normal
BATCHGROUP2	High
BATCHGROUP3	Critical
BATCHGROUP4	Reserved

The batch processes run during the following times of day:

Batch Active Period	Active From (local time)	Active To (local time)
LUNCHBREAK	12:00 PM	1:00 PM
AFTERHOURS	5:00 PM	8:00 AM

The company requires a process that meets the following requirements:

- * Runs every weekday.
- * Runs outside of work hours.
- * Runs with at least a high priority.

You need to automate the manual process.

Solution: Create a batch job to have an active period of AFTERHOURS and a batch job recurrence of Daily. Set the batch job to run as part of BATCHGROUP2.

Does the solution meet the goal?

Options:

A- Yes

B- No

Answer:

B

Question 2

Question Type: MultipleChoice

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is automating manual processes in the Dynamics 365 finance and operations apps. The company has the following batch groups and priorities configured:

Batch Group Name	Priority
BATCHGROUP1	Normal
BATCHGROUP2	High
BATCHGROUP3	Critical
BATCHGROUP4	Reserved

The batch processes run during the following times of day:

Batch Active Period	Active From (local time)	Active To (local time)
LUNCHBREAK	12:00 PM	1:00 PM
AFTERHOURS	5:00 PM	8:00 AM

The company requires a process that meets the following requirements:

- * Runs every weekday.
- * Runs outside of work hours.
- * Runs with at least a high priority.

You need to automate the manual process.

Solution: Create a batch job to have an active period of AFTERHOURS and a recurrence of Daily. Select the Every Weekday setting, and set the batch job to run as part of BATCHGROUP2.

Does the solution meet the goal?

Options:

A- Yes

B- No

Answer:

B

Question 3

Question Type: MultipleChoice

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company uses Dynamics 365 finance and operations apps.

You have a custom enumeration named CarType. The enumeration has the following elements: Sedan, SUV.

You must extend CarType and add a new element named MUV to CarType.

You need to develop a solution that meets the requirements.

Solution: Set the Is Extensible property to true for the CarType enumeration. Add the MUV element to the CarType base enumeration.

Does the solution meet the goal?

Options:

A- Yes

B- No

Answer:

B

Question 4

Question Type: DragDrop

A company is implementing Dynamics 365 Finance.

You are extending the standard fixed asset functionality to develop a new feature.

You need to select the appropriate components for the solution.

Which components should you use? To answer, drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Component	Requirement	Component
Model	Group elements for deployment as a unit.	
Package	Manage and organize a group of elements during development.	
Project		

Question 5

Question Type: Hotspot

You are a Dynamics 365 Finance developer. You check out elements from version control in order to make modifications.

You need to check in the modified elements to version control.

What should you do? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Right-click the modified element and select:

Answer:

In Team Explorer, check in changes using the following option:

Question 6

Question Type: MultipleChoice

You are a Dynamics 365 Finance developer.

You need to initialize an embedded Microsoft Power BI report.

Which code segment should you add to the form initialization method?

A.

```
deployOrUpdateReport(powerBIConfiguration, reportName, resourceName)
```

B.

```
initializeReportControlInternal(powerBIConfiguration, reportParameters, reportControl, showError)
```

C.

```
importAndStoreReport(powerBIConfiguration, resourceName, isUpdate)
```

D.

```
initializeCustomReportControl(resourceName, formGroupControl, reportCustomParams)
```

Options:

A- Option A

B- Option B

C- Option C

D- Option D

Answer:

D

Question 7

Question Type: MultipleChoice

A company is implementing Dynamics 365 finance and operations apps.

The company must test the custom enhancements for its native Dynamics 365 finance and operations apps.

You need to create a test case within a development environment.

Which base class should the test class extend?

Options:

A- SysTestSuite

B- SysTestCase

C- SysTestExecute

D- SysTest

Answer:

B

Question 8

Question Type: MultipleChoice

A company is implementing Dynamics 365 finance and operations apps.

The company must functionally test its native Dynamics 365 finance and operations apps with specific data values.

You need to add specific values on test data within a development environment.

Which two fluent setter methods can you use to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

Options:

A- `post<CoandParaterUame>`

B- `for<ComntandParBTeterNate>`

C- `set<ComandParaweterfJatie>`

D- create<ComandParameterHane>

E- save<ComanndParametername>

Answer:

B, C
