Question 1

Question Type: MultipleChoice

A company uses an on-premises product management application that manages 200 products. Product information does not change frequently.

You need to synchronize data between the application and Dynamics 365 Supply Chain Management. Data in Dynamics 365 Supply Chain Management must update in near real time when changes are made in the application.

What should you recommend?

Options:

- A- OData
- B- Batch data API
- C- Application Integration Framework
- D- Lifecycle Services

Answer:

A

Explanation:

<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/data-entities/integration-overview>

Question 2

Question Type: MultipleChoice

A company manufactures and distributes sporting goods. The company uses Dynamics 365 Finance and Project Operations.

A user's primary role is managing projects. The user must also have access to trial balances and journal entries.

You need to determine the correct license assignment for this user.

Which two licenses should you assign to the user? Each correct answers presents part of the

solution.

NOTE: Each correct selection is worth one point.

Options:

- A- Finance attach
- B- Finance base
- C- Project Operations base
- D- Project Operations attach

Answer:

B, D

Explanation:

Base licenses and cost savings opportunities for "attach" licenses

Microsoft provides a cost-effective way for a single Dynamics 365 user to obtain full user licensing for multiple products. Licenses for products that provide core business functionality qualify as base licenses. (See the table below.) Each has one or more additional applications that are frequently used by people in the same roles and that qualify as attach licenses for that user. (These are sometimes referred to as subsequent qualifying applications.) To take advantage of the special attach license pricing:

1. Buy the first base user license at standard pricing.
2. Review which attach licenses are available for that base. (See the qualifying products for each base license below.)
3. Buy attach licenses for the same user at an attach license price. You may buy as many attach licenses as are available for that base license.

Question 3

Question Type: MultipleChoice

A company uses Dynamics 365 Supply Chain Management.

The system has a slow response time when sales orders are entered.

You need to identify any blocking SQL statements.

Which Lifecycle Services (LCS) tool should you use?

Options:

- A- SQL Insights - Live View
- B- SQL Insights - Index Analysis
- C- Telemetry data monitoring
- D- Performance SDK

Answer:

A

Explanation:

All SQL performance tools in LCS are available under the SQL Insights tab on the Environment Monitoring page for a specific environment. The following tabs are available:

Live View -- Shows executing statements and blocking statements. The current SQL Now page that shows performance issues will be replaced with Live View.

Index Analysis -- Shows aggregated index and table information, based on user scans, user seeks, user updates, and row count. Like performance metrics, this tool shows the trend for the selected index along with additional table metrics. This feature is not available in self-service environments.

Queries -- Shows a list of predefined queries that can be used to retrieve metrics on demand. Examples of queries include a current blocking tree, a list of active plan guides, and a list of most expensive queries.

Etc.

Question 4

Question Type: MultipleChoice

You need to recommend an action to meet the FastTrack engagement requirements. Which action should you recommend?

Options:

- A- Engage a qualified Microsoft partner.
- B- Increase yearly Dynamics 365 license spend.
- C- Include Microsoft Power Platform technologies.
- D- Increase yearly Microsoft Azure spend.
- E- Complete on-demand Success by Design training.

Answer:

A

Question 5

Question Type: MultipleChoice

Your company has a Microsoft has a Microsoft 365 subscription.

You need to prevent temporary employees from using the chat feature in Microsoft Teams.

Solution: From the Microsoft Entra admin center, you modify the External collaboration settings.

Does this meet the goal?

Options:

A- Yes

B- No

Answer:

B

Explanation:

Modifying External collaboration settings in Microsoft Entra (formerly Azure Active Directory) affects the ability of users to collaborate with external users. This setting does not impact internal features such as the chat functionality within Teams for internal users. To restrict chat for temporary employees, you should configure Teams messaging policies instead.

Question 6

Question Type: MultipleChoice

A company with multiple legal entities implements Dynamics 365 Finance. The company does not want to purchase additional licensing or incur development costs.

The company's controller notes that vendors exist in multiple companies. The system does not apply and does not post payments to the correct company.

The controller notes that a company-specific report exists for vendor payment journals.

You must replace the single company-specific report with a global report that displays the vendor payment journal status across all companies in the organization for a single vendor.

You must minimize development and creation of new reports.

You need to identify a tool to create the report.

What should you recommend?

Options:

- A- Financial Reporter
- B- Electronic reporting tool
- C- View
- D- SQL Server Reporting Services (SSRS)
- E- Power BI

Answer:

A

Explanation:

Financial reporting for the application allows financial and business professionals to create, maintain, deploy, and view financial statements. It moves beyond traditional reporting constraints to help you efficiently design various types of reports.

Financial reporting includes dimension support. Therefore, account segments or dimensions are immediately available. No additional tools or configuration steps are required.

Question 7

Question Type: MultipleChoice

A company with multiple legal entities implements Dynamics 365 Finance.

The company's financial controller needs a single global report that displays vendor aging across all companies.

The report must meet the following requirements:

- * Leverage standard functionality as much as possible.
- * Minimize development time.
- * Minimize configuration time.

You must identify a tool to create the report. Which tool should you use?

Options:

- A- Business document management
- B- SQL Server Reporting Services (SSRS)
- C- Financial Reporter
- D- Electronic reporting tool

Answer:

D

Question 8

Question Type: MultipleChoice

A company implements Dynamics 365 Supply Chain Management.

The company uses a third-party analytics software solution for reporting. The solution requires permissions to ensure T-SQL code can access data.

The company must include Dynamics 365 Supply Chain Management data in the analytics software solution to display data in a single view with other data.

You need to identify the correct data analytics approach.

Which solution should you use?

Options:

- A- Dual-write
- B- Microsoft Dataverse
- C- Bring your own database (BYOD)
- D- Entity store
- E- Power BI

Answer:

C

Question 9

Question Type: MultipleChoice

Which license should you purchase to meet the technical requirement of the marketing department to apply a watermark?

Options:

- A- Microsoft Defender for Cloud Apps
- B- Microsoft Priva Privacy Risk Management
- C- Microsoft team Premium
- D- Microsoft Priva Subject Rights Requests

Answer:

C

Question 10

Question Type: MultipleChoice

A company plans to use Dynamics 365 Supply Chain Management to migrate from multiple enterprise resource planning (ERP) systems.

You are leading data requirements sessions for the migration of master data from the ERP systems into Supply Chain Management.

You need to document the data migration strategy based on the gathered requirements.

Which three considerations should be included in the data migration strategy? Each correct answer presents part of the solution. Choose three

NOTE: Each correct selection is worth one point.

Options:

- A- source systems
- B- record counts
- C- data cleansing
- D- project budget
- E- data monetization

Answer:

A, B, C
