## Mix Questions

### MS-203 Mix Questions IN THIS CASE STUDY

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

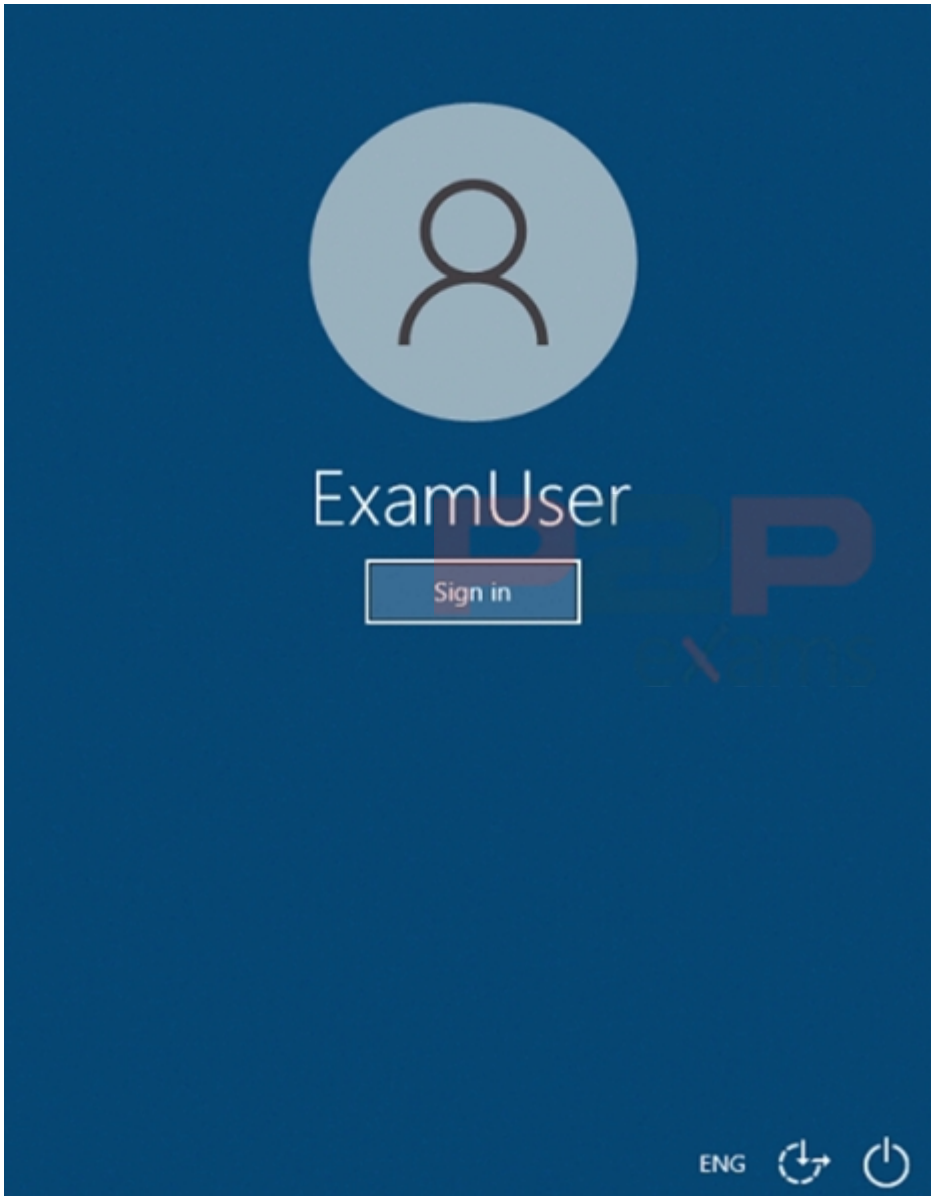

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: admin@abc.com

Microsoft 365 Password: xxxxxx

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only.

Lab Instance: XXXXXX

You need to ensure that all emails sent from the users in your company to recipients who use a suffix of @fabnkam.com are encrypted by using Microsoft Office 365 Message Encryption (OME).

To complete this task, sign in to the Exchange admin center.

### Options:

---

A- See explanation below

### Answer:

---

A

### Explanation:

---

In the Microsoft 365 admin center, choose Admin centers > Exchange.

In the EAC, go to Mail flow > Rules and select New+ > Create a new rule.

In Name, type a name for the rule, such as Encrypt mail for DrToniRamos@hotmail.com.

In Apply this rule if, select a condition, and enter a value if necessary. For example, to encrypt messages going to DrToniRamos@hotmail.com:

- To select an existing name, select it from the list and then click OK.

- To enter a new name, type an email address in the check names box and then select check names > OK.

To add more conditions, choose More options and then choose add condition and select from the list.

For example, to apply the rule only if the recipient is outside your organization, select add condition and then select The recipient is external/internal > Outside the organization > OK.

To enable encryption using the new OME capabilities, from Do the following, select Modify the message security and then choose Apply Office 365 Message Encryption and rights protection. Select an RMS template from the list, choose Save, and then choose OK.

Lab Instance: XXXXXX

You need to prevent email messages that contain attachments that have the .js file extension

from being delivered to any recipients in your organization.

To complete this task, sign in to the Microsoft 365 admin center.

### Options:

---

A- See explanation below

### Answer:

---

A

### Explanation:

---

Go to Mail flow > Rules.

Create the rule by using one of the following options:

+

+

In the New rule dialog box, name the rule, and then select the conditions and actions for this rule:

- In Apply this rule if..., select the condition you want from the list of available conditions:

- In Do the following..., select the action you want the rule to take on messages matching the criteria from the list of available actions:

- Specify how rule match data for this rule is displayed in the Data Loss Prevention (DLP) reports and the Mail protection reports.

- Set the mode for the rule. You can use one of the two test modes to test the rule without impacting mail flow. In both test modes, when the conditions are met, an entry is added to the message trace:

Exchange Online admins can create mail flow rules in the Exchange admin center (EAC) at Mail flow > Rules. You need permissions to do this procedure. After you start to create a new rule, you can see the full list of attachment-related conditions by clicking More options > Any attachment under Apply this rule if. The attachment-related options are shown in the following diagram.

## Mix Questions

### MS-203 Mix Questions IN THIS CASE STUDY

You have a Microsoft Exchange Online tenant.

You suspect that an administrator accessed the mailbox of a user named User1.

You need to run a PowerShell command to identify which administrator signed in to the mailbox of User1.

How should you complete the command? To answer, select the appropriate options in the answer

area.

NOTE: Each correct selection is worth one point.

Answer Area

Answer:

See the Answer in the Premium Version!

## Question 4

Question Type: MultipleChoice

Case Study: Mix Questions

## Mix Questions

### MS-203 Mix Questions IN THIS CASE STUDY

You have a Microsoft Exchange Online tenant that contains a mailbox named Mailbox1.

You need to ensure that Mailbox1 rejects all external email messages and responds with the following non-delivery report (NDR): "Mailbox1 is an automated system mailbox and does not accept incoming mail.

What should you do?

Options:

- A- Set a message delivery restriction for Mailbox1.
- B- From Mailbox1, create an inbox rule.
- C- Create a mail flow rule.
- D- Modify the permissions for Mailbox1.

Answer:

C

## Question 5

---

Question Type: MultipleChoice

---

### Mix Questions

#### MS-203 Mix Questions IN THIS CASE STUDY

You have a hybrid deployment between a Microsoft Exchange Online tenant and an on-premises Exchange Server 2019 organization. Users report that email messages between the Exchange Server organization and the Exchange Online tenant are undelivered. You install and enable a new certificate from a different trusted certification authority (CA). You need to ensure that mail flow between Exchange Server and Exchange Online is restored. Which two PowerShell cmdlets should you run? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

#### Options:

---

- A- Set-SendConnector
- B- Set-IntraOrganizationConnector
- C- Update-Hybridconfiguration
- D- Set-ReceiveConnector

#### Answer:

---

C, D

## Question 6

### Mix Questions

#### MS-203 Mix Questions IN THIS CASE STUDY

You have a Microsoft Exchange Online tenant.

From the Exchange admin center, you create an alert policy named Policy1 as shown in the following exhibit.

# Review policy and finish

Review the settings for your app protection policy. The policy will take effect immediately after you create it, and we recommend letting your users know how these changes will impact them.

## Policy name

Policy1

[Edit policy name](#)

## General

Severity: Low

Trigger an alert when: New domains being forwarded

[Edit general](#)

## General

Severity: Low

Trigger an alert when: New domains being forwarded

[Edit general](#)

## Recipients

Send email notification

Email recipients: admin@contoso.com

Daily notification limit: 1

[Edit recipients](#)

You need to recreate Policy1 to ensure that admin@contoso.com receives an email alert each time a new user configures external forwarding.

Which policy settings should you configure? To answer, drag the appropriate settings to the correct requirements. Each setting may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Settings	Answer Area
Category	To alert when a new user sets up forwarding: <input type="text"/>
Daily notification limit	To send an email for all alerts: <input type="text"/>
Email recipients	
Severity	
Trigger an alert when following insight is generated	

Answer:

See the Answer in the Premium Version!

## Question 7

Question Type: MultipleChoice

Case Study: Mix Questions

### Mix Questions

#### MS-203 Mix Questions IN THIS CASE STUDY

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 E5 subscription.

You need to ensure that a user named User1 can review audit reports from the Microsoft 365 security center. User1 must be prevented from tracing messages from the Security admin center.

Solution: You assign the Security Reader role to User1.

Does this meet the goal?

Options:

A- Yes

B- No

Answer:

A

Explanation:

Security Administrator can view the audit reports but cannot create a message trace.

<https://docs.microsoft.com/en-us/microsoft-365/security/office-365-security/message-trace-scc>

## Question 8

Question Type: DragDrop

Case Study: Mix Questions

### Mix Questions

#### MS-203 Mix Questions IN THIS CASE STUDY

You have a Microsoft 365 E5 subscription that contains a public folder named Folder1 and two users named User1 and User2. You need to ensure that the users can perform the actions shown in the following table.

User	Action
User1	<ul style="list-style-type: none"><li>• Create new items.</li><li>• Delete items created by User1.</li><li>• Only modify items created by User1.</li><li>• Read existing items.</li><li>• View folders.</li></ul>
User2	<ul style="list-style-type: none"><li>• Create subfolders.</li><li>• Read all items.</li><li>• Delete all items.</li><li>• Only modify items created by User2.</li></ul>

The solution must use the principle of least privilege and minimize administrative effort.

Which folder permission should you grant to each user? To answer, drag the appropriate permissions to the correct users. Each permission may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Permissions

- Author
- Custom
- Editor
- Non-Editing Author
- Owner
- PublishingEditor
- PublishingAuthor

## Question 9

Question Type: MultipleChoice

Case Study: Mix Questions

### Mix Questions

#### MS-203 Mix Questions IN THIS CASE STUDY

You have a Microsoft Exchange Online tenant that contains a user named User1.

User1 needs to be able to search mailboxes and purge email.

To which role group should you add Use1?

Options:

- A- eDiscovery Manager
- B- Security Administrator
- C- Compliance Data Administrator
- D- Organization Management

Answer:

D

## Question 10

---

Question Type: MultipleChoice

---

Case Study: Mix Questions

---

### Mix Questions

#### MS-203 Mix Questions IN THIS CASE STUDY

You have a Microsoft Exchange Online tenant that contains a user named User1.

You need to ensure that User1 can create, manage, and remove Exchange recipient objects.

What should you assign to User1?

Options:

---

- A- a sharing policy
- B- a role assignment policy
- C- a role group
- D- an administrative unit

Answer:

---

C

## Question 11

---

Question Type: MultipleChoice

---

Case Study: Mix Questions

---

### Mix Questions

#### MS-203 Mix Questions IN THIS CASE STUDY

You have a Microsoft Exchange Online tenant.

You plan to use a third-party service to archive all the email messages that are sent and received by the Exchange mailboxes.

You need to copy all the sent and received messages automatically to the third-party service.

What should you configure?

**Options:**

- A- a content search
- B- a retention policy
- C- an archive policy
- D- a journal rule

**Answer:**

D

## Question 12

Question Type: MultipleChoice

Case Study: Mix Questions

## Mix Questions

### MS-203 Mix Questions IN THIS CASE STUDY

You have a Microsoft Exchange Online tenant that uses Microsoft Defender for Office 365. You have the policies shown in the following table.

Name	Type
Standard Preset Security Policy	Preset security policy
Policy1	Anti-malware

You need to track any modifications made to Policy1 by the identifying following:

- \* The name of the user that modified the policy
- \* The old and new values of settings modified in Policy1
- \* How the modifications compare to the baseline settings of Standard Preset Security Policy

What should you use in the Microsoft 365 Defender portal?

**Options:**

- A- Threat tracker
- B- Threat analytics
- C- Audit
- D- Configuration analyzer

Answer:

D
