Question 1

You are implementing a Power Automate cloud flow that submits invoice information using a custom connector action.

You observe that the custom connector action sometimes results in an error. You want the system to send you an email to alert you when the custom connector action throws an error.

You need to make sure the send email action is triggered only when the custom connector action fails.

What should you do?

Options:

A- Create a terminate action and set the status to Cancelled

B- Create a terminate action set the status to Failed and set an error code.

C- Set the Configure run after action to has timed out

D- Set the Configure run ate- action to has failed

E- Set the Configure run after action to is skipped

Answer:

D

Question 2

A company is using SAP in a data center. The SAP environment uses the default configuration.

The company plans to automate the creation of vendors in SAP after data is approved in a SharePoint list
You need to recommend a solution for the automation.

Which four actions should you perform in sequence? To answer move the appropriate actions from the fist of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

Actions		Answer Area
Create an instant cloud flow		
Create a desktop flow		
Configure an on-premises data gateway		
Record steps in SAP	>	^
Configure an SAP ERP connection		
Create an automated cloud flow	<	v
Add a Call SAP function (V2) action		
Register a machine		

Answer:

Register a machine and gateway (V2) action
Configure an SAP ERP connection

Question 3

Question Type: **MultipleChoice**

You create a custom connector that retrieves data from an API.

The host URL of the API requires a connection with a dynamic subdirectory path.

You need to ensure the custom connectors requests are completed successfully.

Which two features should you use? Each correct answer presents a part of the solution.

NOTE: Each correct selection is worth one point.

Options:

A- Define a base URL

B- Use references

C- Use custom code

D- Define a policy

Answer:

A, C

Question 4

Question Type: **DragDrop**

You are developing automation solutions for a company.

You need to select the applicable flow type to automate the following tools and technologies:

* Microsoft Excel

* Desktop application

* File system

Which flow types should you use? To answer, drag the appropriate flow types to the correct automation targets. Each flow type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Flow types

Answer Area

Answer: Cloud flows only nly

Desktop flows only nly

Cloud flows or desktop flows ws

Question Type: DragDrop

You are developing automation solutions.

Automation tar

Microsoft Excel

Desktop applicat

File system

You need to select solution components for each scenario.

Which solution components should you use? To answer, drag the appropriate solution components to the correct requirements. Each solution component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Solution components	Answer Area
Process advisor r	

Answer:

AI Builder	Requirement
	Create a flow that runs on a schedule.

Desktop flow

Cloud flow

Sign into a website that does not have

Analyze bottlenecks in a process.

You are designing automation solutions that interact with a desktop application.

Flow checker
You need to select the appropriate UI automation action for each business requirement.

Which automation action should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Question 7

Question Type: Hotspot

Requirement

Retrieve the state from a checkbox in the desktop application.

Get sel
Get det
Get sel
Extract

You are automating a form on a website. The website uses the following HTML markup to define each field on the form:

Bring the desktop application to the foreground.

```
<div _ngcontent-c1="" class="col s6 m6 l6">
  <div class="ng-invalid ng-dirty ng-touched">
    <label>Field1</label><input ng-reflect-name="labelField1" class="ng-pristine ng-invalid ng-t
  </div>
</div>
```

Answer:

Question 8

Question Type: OrderList

A company hires you to develop a solution that helps the company manage new hires. Users will enter information about the new employee into an app and the app will save the information to a database.

The app must be simple to use and must rely on a data model. You must implement a workflow that automatically notifies the IT department when new employee records are created in the database.

You need to create the solution.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Create a cloud flow that is triggered when you create a new record in the Microsoft Dataverse table.
Create a worksheet in Microsoft Excel to store employee data.
Create a desktop flow that is triggered when you create a new record in the Microsoft Dataverse table.
Create a model-driven app.
Create a cloud flow that is triggered when a record is selected in the app.
Create a custom Microsoft Dataverse table to store employee data.

> <

Answer:

Create a cloud flow that is triggered when you create a new record in the Microsoft Dataverse table.

Question 9

Question Type: DragDrop

You are designing automation processes.

You need to configure the run mode for each automation scenario.

Which run modes should you use? To answer, drag the appropriate run modes to the correct scenarios. Each run mode may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Run modes

Attended

Answer:

Unattended

Answer Area

Scenario	Run mod
Automate the transfer of data from a file you save locally in an active user session to an application installed on your machine.	
Run 10 credit card checks in parallel in a system without API.	
Trigger an automation to update data in a customer relationship management app after an approval process completes.	

Question 10

Question Type: DragDrop

You are developing desktop flows for a company.

You need to use Recorder to record steps that you are performing in target applications.

Which recording modes will Recorder use? To answer, drag the appropriate recording modes to the correct target applications. Each recording mode may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Recording modes

Standard

Image based

Web

Question 11

Question Type: Hotspot

You are designing automation processes for a company.

You need to select the appropriate action for each automation scenario.

Which actions should you perform? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Target application	Recording mode
Web browser	
iFrame within a web browser	
Java applet	
Windows application	

Answer Area

Requirement	Action
Automate keyboard input and mouse movements for a product ordering website that does not have an API.	Add an HTTP trigger. Create a custom connector. Create a desktop flow.
Automate a process for a desktop application that provides an API with authenticated access.	Create and run a dataflow. Create a custom connector. Create and run a Dataverse vi Create a desktop flow.
Automate keyboard input and mouse movements for a desktop application.	Create a custom connector. Create a cloud flow. Create a desktop flow.
