# Question 1

---

## Question Type: MultipleChoice

---

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company uses a Microsoft Power Platform application. Employees report that they are unable to open the application. You need to ensure that the employees can access the application.

Solution: Configure a conditional access policy.

Does the solution meet the goal?

### Options:

---

A- Yes

B- No

### Answer:

---

B

## Question 2

---

**Question Type:** MultipleChoice

---

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company uses a Microsoft Power Platform application.

Employees report that they are unable to open the application.

You need to ensure that the employees can access the application.

Solution: Add the employees to a security group and associate a security role with the security group.

Does the solution meet the goal?

**Options:**

---

A- Yes

B- No

**Answer:**

---

A

## Question 3

---

**Question Type: MultipleChoice**

---

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company uses a Microsoft Power Platform application.

Employees report that they are unable to open the application.

You need to ensure that the employees can access the application.

Solution: Add the employees to the user table in the environment.

Does the solution meet the goal?

**Options:**

---

**A-** Yes

**B-** No

**Answer:**

---

A

## Question 4

---

**Question Type: DragDrop**

---

You are designing a Microsoft Power Platform solution for a financial services company. Data from existing financial systems will be imported into Microsoft Dataverse and displayed to users as part of the app deployment.

The company has the following issues with data:

- \* Phone numbers in records can contain letters in the record.
- \* Security has not been applied to financial total values held in each record.

\* Users and managers can see all records.

You need to apply data quality standards to the solution.

What should you recommend? To answer, drag the appropriate solutions to the correct data quality items. Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content

NOTE: Each correct selection is worth one point.

Solutions	Answer Area	Data quality item
Masking rules		
<b>Answer:</b> Field-level security	<input checked="" type="checkbox"/>	<del>Phone numbers must contain only numbers.</del>
Hierarchical security	<input type="checkbox"/>	Account financial totals are secured for only authorized users to access.
	<input type="checkbox"/>	<del>Users must be able to view their records and managers must be able to view records for their team.</del>

## Question 5

Question Type: DragDrop

A company plans to implement a model-driven app. The company has the following requirements:

- \* Short Message Service (SMS) data must be visible on the model-driven app timeline.
- \* Store location data must be referenced from a SQL server database.
- \* Customer data must be audited and only edited by specific users.

You need to recommend the table type for each requirement.

Which table types should you recommend? To answer, drag the appropriate solutions to the correct requirements. Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Solutions	Answer Area
Virtual – organization owned and managed	<b>Requirement</b>
<b>Answer:</b>	SMS data
Custom – user or team owned	Store location data
Custom – organization owned	Customer data
Activity – user or team owned	

**Question 6**  
**Question Type: DragDrop**

An organization plans to replace large, legacy systems with apps in Microsoft Power Platform. The technical staff consolidated the legacy data into a Microsoft SQL Server database and provisioned a Microsoft Power Platform environment for prototyping new processes. The business decision makers approved the SQL data and the prototype data that must be migrated into production.

The following types of data exist:

- \* Historical data: read-only legacy data to be used for future reference
- \* Prototype data: created to support new business processes

You need to deploy the approved data into the Microsoft Dataverse production environment and keep the remaining data in SQL Server.

Which method should you use for each type of data?

To answer, drag the appropriate tools to the correct migrations. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Tools**

Dataflows ws

**Answer:**

Virtual tables s

Package Deployer yer

**Question 7**

SolutionPackager r

**Question Type: MultipleChoice**

**Answer Area**

Migration	Tool
Historical data	
Prototype data	

A company plans to use Power BI.

The company plans to share reports indefinitely with a specific set of users.

You need to recommend a solution.

Which solution should you recommend?

### Options:

---

- A- Share directly with the users.
- B- Embed code by using the Publish to web option.
- C- Embed code by using the website or portal option.
- D- Share by using a link.

### Answer:

---

D

## Question 8

---

### Question Type: MultipleChoice

---

You are designing a solution for a national vehicle repair company. You have the following requirements:

- \* Customers must search for vehicle issues by using natural language expressions.
- \* Customers must contact a customer service agent as required.

You need to recommend a solution.

Which two features should you include? Each correct answer presents part of the solution.

**Options:**

---

A- Power Virtual Agents

B- Business process flow

C- Power Apps portal

D- Customer Insights

**Answer:**

---

B, C
