Question 1

Question Type: MultipleChoice

Which four Openstack projects implement Nuage integration?

Options:

- A) Keystone, Heat, Neutron, Nova
- B) Ironic, Heat, Horizon, Neutron
- C) Cinder, Horizon, Neutron, Nova
- D) Ironic, Heat, Neutron, Nova

Answer:

A

Question 2

Question Type: MultipleChoice

What use case does not apply in virtual machine migration?

Options:

- A) Optimization of East-West traffic flows.
- B) Maintenance and upgrading of the servers.
- C) Avoidance of disaster caused by a power outage or hardware failure.
- D) Energy saving by shutting down under-utilized servers after moving all their VNs.

Answer:

A

Question 3

Question Type: MultipleChoice

What statement is FALSE regarding the forwarding policies used in VCS for traffic redirection (also known as service chaining)?

Options:

- A) Forwarding policies can be applied to either ingress or egress traffic.
- B) Redirection targets should be created in advanced and associated with vPorts.
- C) Redirection targets cannot be associated with host vPort (physical appliances)
- D) A forwarding policy can be created in an active domain or be instantiated from a template.

Answer:

C

Question 4

Question Type: MultipleChoice

Which of the following is NOT Nuage metadata required when creating a virtual machine?

Options:

- A) Enterprise

- B) Subnet
- C) VLAN ID
- D) User

Answer:

C

Question 5

Question Type: MultipleChoice

What statement is CORRECT regarding the extension of a VXLAN L# domain to a 7750 DCI?

Options:

- A) The VXLAN tunnel is from the domain VPRN. The tunnel payload is the IP packet.
- B) The VXLAN tunnel is from the domain VPRN. The tunnel payload is the Ethernet frame.
- C) The VXLAN tunnel is from the backhaul BPLS. The tunnel payload is the IP packet.
- D) The VXLAN tunnel is from the backhaul VPLS. The tunnel payload is the Ethernet frame

Answer:

C

Question 6

Question Type: MultipleChoice

Which two elements of the Nuage VCS solution act respectively as the control and data plane of a virtual router?

Options:

- A) VSD and VSC
- B) VSC and VRG
- C) VSC and VRS
- D) VSD and VSG

Answer:

C

Question 7

Question Type: MultipleChoice

What is the function of a Virtualized Services Gateway (VSG)?

Options:

- A) To interconnect a VLAN network with a VXLAN network.
- B) To interconnect multiple data centers.
- C) To extend a data center to the internet.
- D) To enable MPLS over GRE tunneling

Answer:

A

Question 8

Question Type: MultipleChoice

What statement about the Nuage 7850 VSG is TRUE?

Options:

- A) 1.2 Tbps capacity in 1 RU.
- B) It is ideal as a spine router.
- C) UP to four Nuage VSGs can be combined into a single chassis.
- D) A hypervisor can be connected to two Nuage 7850 VSGs in an active.active MC-LAG

Answer:

D

Question 9

Question Type: MultipleChoice

What statement is FALSE regarding a virtual machine connected to a DC managed by Nuage VCS?

Options:

- A) A Nuage virtual machine can belong to multiple enterprises
- B) A Nuage virtual machines can belong to multiple domains.
- C) A Nuage virtual machine can belong to multiple zones.
- D) A Nuage virtual machine can belong to multiple subnet

Answer:

A

Question 10

Question Type: MultipleChoice

Which of the following is a solution to create virtual is which the server runs the hypervisor as a specialized operating system and, as a consequence, there is no need for a conventional operating system?

Options:

- A) Kernel

- B) Container
- C) Native hypervisor
- D) Hosted hypervisor

Answer:

C

Question 11

Question Type: MultipleChoice

What statement about the relationship between the SDN controller and VTEP devices is correct?

Options:

- A) The SDN controller controls VTEP devices using Openflow and tells the VTEP devices which routing/birding protocol to use to dynamically learn the VTEP forwarding table.
- B) The SDN controller collect VM-related information such as MAC and IP, and leads the VTEP devices with this information.
- C) The optimal deployment is one SDN controller per VTEP device.

D) The optimal deployment is one SDN controller for all VTEP devices

Answer:

B

Question 12

Question Type: MultipleChoice

For a packet transmitted using VxLAN encapsulation, where VxLAN header within this packet.

Options:

- A)** It is part of the Layer 2 Ethernet header, just like VLAN.
- B)** It is added between the Layer 2 header and the Layer 3 IP header.
- C)** It is added between the Layer 3 IP header and the TCP/UDP transport layer header.
- D)** It is added between the UDP header and the payload

Answer:

D
