Question 1

Question Type: MultipleChoice

An FTTH operator wants to deploy 5G cells as soon as possible In an urban area, what can they do?

Options:

- A- Re-use the existing FTTH network as fronthaul network.
- B- Deploy dedicated fibers for the 5G cells.
- C- If no dark fibers are available, the deployment cant take place.
- D- Why would they do that, FTTH is already available.

Answer:

A

Question 2

Question Type: MultipleChoice

Why Is beamforming coverage better for 5G compared to 4G?

Options:

- A- Lower frequency deployments
- B- Beam sweeping SSB
- C- Higher frequency deployments
- D- Better uplink coverage

Answer:

A

Question 3

Question Type: MultipleChoice

Is the FTTH technology suitable to serve as a fronthaul of the 5G cells?

Options:

- A- No, because an FTTH network was developed and deployed to connect homes.
- B- No, because an FTTH network has a limited capacity of 2.5Gbps down and 1.2Gbps up.
- C- No, because an FTTH network can't deal with the 5G latency, capacity and performance demands.
- D- Yes, re-using the FTTH network reduces costs, speeds-up deployment and FTTH is still being improved to reduce latency and increase performance.

Answer:

D

Question 4

Question Type: MultipleChoice

What is a characteristic of analog beamforming?

Options:

- A- Primarily use for adding capacity
- B- Support MU-MIMO
- C- Radiating elements each have separate TRX
- D- Only transmits one beam at a time

Answer:

B

Question 5

Question Type: MultipleChoice

Which option best is NOT a functionality of Network Slice Selection Function (NSSF)?

Options:

- A- Takes care of mapping slice specific identifiers.
- B- Determines the candidate AMFs to be used to serve the UE.
- C- Selects the slices to which the UE can connect.
- D- Provides policies directly to the UPF for implementation, in the form of slices.

Answer:

D

Question 6

Question Type: MultipleChoice

Which of the following sentences is WRONG regarding the implementation of the Artificial Intelligence in a Network?

Options:

- A- Minimize up front effort
- B- Fix problems before they arise
- C- Rules must be understood and written in advance
- D- Detect silent failures

Answer:

B

Question 7

Question Type: MultipleChoice

Which is NOT one of the main features of SDN?

Options:

- A- Flexible and scalable architecture
- B- Allows the operator to adjust the network offline
- C- Traffic optimization
- D- Separation between hardware and control plane

Answer:

D

Question 8

Question Type: MultipleChoice

Which of the following are the functions of each Slice Management orchestrator?

Options:

A- Automation

B- Monitoring

C- Optimization

D- Yes, re-using the FTTH network reduces costs, speeds-up deployment and FTTH is still being improved to reduce latency and increase performance.

Answer:

D

Question 9

Question Type: MultipleChoice

Unified inventory (or inventory federation) is mandatory for digital automation service.

Options:

A- True

B- False

Answer:

A
