Question 1

Question Type: MultipleChoice

The administrator needs to migrate non-persistent base images using Move from a legacy vSphere environment to an AHV cluster.

What must the administrator do with regards to the Nutanix Guest Tools (NGT)?

Options:

- A- Leave NGT in, because it is required to run VMs on AHV.
- B- Remove NGT after conversion and after reprovisioning.
- C- Remove NGT before conversion and before reprovisioning.
- D- Remove NGT after conversion and before reprovisioning.

Answer:

C

Question 2

Question Type: MultipleChoice

Which method of creating desktops is recommended when using Omnissa Horizon for non-persistent task worker desktops on Nutanix?

Options:

- A- Instant Clones
- B- Manual Desktops
- C- Full Clones
- D- Linked Clones

Answer:

A

Question 3

Question Type: MultipleChoice

An administrator is creating a customized report. Both the "global" and "report" level have been applied.

What is the expected outcome?

Options:

- A- Global Level will take precedence.
- B- Report level will take precedence.
- C- Contradicting data will be highlighted.
- D- Report with two charts will be created.

Answer:

B

Question 4

Question Type: MultipleChoice

What network port is required for inbound communication to Citrix Licensing?

Options:

- A- 59
- B- 3269
- C- 8083
- D- 27000

Answer:

D

Question 5

Question Type: MultipleChoice

Which display protocol developed by Omnisys Horizon supports both TCP and UDP to be adaptive to network conditions?

Options:

- A- Citrix HDX
- B- PCoIP
- C- Microsoft RDP
- D- Blast Extreme

Answer:

D

Question 6

Question Type: MultipleChoice

An administrator is investigating a complaint about poor performance and slow response times for a virtual desktop environment.

The administrator has obtained the following statistics from the environment:

vCPU to pCPU ratio is 4:1

VM Guest OS is Windows 10

VMs are configured with 4 vCPUs each

VM Guests are configured with 16GB of RAM

The SSD cache tier is 85% full, and the capacity tier is 45% full

Host CPU utilization is < 40%

What is the most likely cause of the poor performance?

Options:

- A- SSD Cache tier is over-committed.
- B- vCPU to pCPU ratio is too high.
- C- Capacity tier is over-provisioned.
- D- VM RAM is over-provisioned.

Answer:

A

Question 7

Question Type: MultipleChoice

An EUC environment is being deployed with multi-session server OS workloads. An administrator has a requirement for configuring RDS licensing for redundancy across Nutanix clusters.

Which action should the administrator take when configuring the group policy settings needed for this requirement?

Options:

- A- Specify the remote desktop license server security group.
- B- Use the specified remote desktop license servers.
- C- Prevent remote desktop license server upgrade.
- D- Set the remote desktop licensing mode.

Answer:

B
