B- No

Answer:

B

Question 6

Question Type: MultipleChoice

Is this a valid group type supported in Okta?

Solution: Private group

Options:

A- Yes
B- No

Answer:

B

Question 7

Question Type: MultipleChoice

Is this an option available to end users for sell-service password reset if enabled by an Okta Administrator?

Solution: Email

Options:

A- Yes
B- No

Answer:

A

Explanation:

1.Click on the password reset link Include a Click here to reset your password link on the Okta Sign-On page so that users can intuitively initiate the password reset ow. By combining self-service password resets with SSO, not only can organizations reduce the number of required passwords (a security benet, as well as end-user convenience) but users are able to access all their applications through a single password reset.

2.Receive either an email or an SMS message The user has the option to receive either an email or an SMS message containing a password reset code. With both options, the user still has to answer a security question to verify identity before they are allowed to reset their password. This security question and answer is created when users enroll in Okta MFA.

3.Enter a new password The newly created password can still impose the same password policies such as character length, number of special characters required, etc., ensuring a consistent password policy throughout the organization.
