Question 1

Question Type: MultipleChoice

Will the Okta Help Desk Administrator role be appropriate for this scenario?

Solution: The company has business units that need to reset multifactor authentication (MFA) on a specific group of end users.

Options:

A- Yes

B- No

Answer:

A

Question 2

Question Type: MultipleChoice

Is this an example of a user state that CANNOT be changed?

Solution: Deleted

Options:

A- Yes

B- No

Answer:

B

Question 3

Question Type: MultipleChoice

Is this an option available to end users for self-service password reset if enabled by an Okta Administrator?

Solution: Email

Options:

A- Yes

B- No

Answer:

A

Explanation:

1. Click on the password reset link Include a Click here to reset your password link on the Okta Sign-On page so that users can intuitively initiate the password reset ow. By combining self-service password resets with SSO, not only can organizations reduce the number of required passwords (a security benet, as well as end-user convenience) but users are able to access all their applications through a single password reset.

2. Receive either an email or an SMS message The user has the option to receive either an email or an SMS message containing a password reset code. With both options, the user still has to answer a security question to verify identity before they are allowed to reset their password. This security question and answer is created when users enroll in Okta MFA.

3. Enter a new password The newly created password can still impose the same password policies such as character length, number of special characters required, etc., ensuring a consistent password policy throughout the organization.

Question 4

Question Type: MultipleChoice

Is this a source from which attributes can be directly imported into Universal Directory?

Solution: Unformatted text file

Options:

A- Yes

B- No

Answer:

B

Question 5

Question Type: MultipleChoice

Can an Okta Administrator enable multifactor authentication (MFA) at this level?

Solution: Application

Options:

A- Yes

B- No

Answer:

A

Explanation:

<https://help.okta.com/en/prod/Content/Topics/Security/MFA.htm>

An Okta admin can configure MFA at the organization or application level. If both levels are enabled, end users are prompted to confirm their credentials with factors both when signing in to Okta and when accessing an application.

Question 6

Question Type: MultipleChoice

An Okta Administrator is instructed to assign an application to 1,000 users in the Sales department. Is this a recommended method for the administrator to assign the application to the users?

Solution: Assign the application to an Okta group

Options:

A- Yes

B- No

Answer:

B
