Question 1

Question Type: MultipleChoice

You support a RAC database with these characteristics:

1. There are six instances.
2. Server Pool prod has a maximum of four servers.
3. CRM is a policy managed, uniform service using Server Pool prod.
4. ERP is a policy managed, singleton service using Server Pool prod.
5. Grid infrastructure is installed and running in its default configuration.

Which four benefits are provided by this configuration in Oracle 19c? (Choose four.)

Options:

- A-** High availability for the CRM service
- B-** Load balancing of connection requests across all six database instances
- C-** High availability for the ERP service
- D-** Load balancing of client connection requests for CRM across four Single Client Access Name (SCAN) listeners

- E-** Load balancing of connection requests for ERP across all database instances running on servers in the prod pool
- F-** Load balancing of client connection requests for ERP across three Single Client Access Name (SCAN) listeners
- G-** Load balancing of connection requests for CRM across all database instances running on servers in the prod pool

Answer:

A, C, D, G

Question 2

Question Type: MultipleChoice

Identify three prerequisites for the successful installation of Oracle Grid Infrastructure 19c when using Full Featured Grid Naming Service (GNS). (Choose three.)

Options:

- A-** Each cluster node must have at least two network interface cards.
- B-** You must enable the Name Server Cache Daemon
- C-** A DHCP service on the private network for the cluster is required to allocate virtual IP addresses for HAIP.

- D-** A DHCP service on the public network for the cluster is required to allocate virtual IP addresses as required by the cluster.
- E-** DNS must be configured to delegate name resolution for the cluster subdomain to the cluster.
- F-** You must create a Grid Management Repository database.

Answer:

B, D, E

Question 3

Question Type: MultipleChoice

Which three statements are true about ASM Cloud File System (ACFS) auditing? (Choose three.)

Options:

- A-** acfsutil audit read marks audit files to indicate that it is safe to purge them.
- B-** acfsutil audit init must be run by a system administrator.
- C-** acfsutil audit purge can be run by an audit manager.
- D-** Audit information gathered by each cluster node can be consolidated into the unified ACFS audit trail.

E- acfsutil audit archive must be used to archive audit files that are larger than 10 MB.

Answer:

B, C, D

Question 4

Question Type: MultipleChoice

You must deploy several Oracle 19c databases on an Oracle Grid Infrastructure Managed Cluster, and are required to have the ability to perform these actions without down time:

1. Apply a Grid Infrastructure interim patch.
2. Apply a Grid Infrastructure Patch Set Update (PSU).
3. Apply a database on-line patch.
4. Apply a Grid Infrastructure patchset.
5. Apply a database patchset.
6. Upgrade Grid Infrastructure from one release to another.
7. Upgrade databases from one release to another.

Your plan is to perform these tasks:

1. Install and configure Oracle Grid Infrastructure on a local file system.
2. Install Oracle Database software on an ACFS file system.
3. Create several RAC One Node databases.

Which of the seven requirements are met by your plan?

Options:

A- 1, 2, 3, 4, 5 and 6.

B- 2, 3, 4 and 6.

C- 1, 2, 3 and 4.

D- 2, 3, 4, 5 and 6.

E- 1, 2, 3, 4 and 6.

F- 1, 2, 3, 4, 5, 6 and 7.

Answer:

C

Question 5

Question Type: MultipleChoice

Which two statements are true about node listeners in a Grid Infrastructure Cluster using ASM? (Choose two.)

Options:

- A- They listen only for database instances on the same node.
- B- They listen on behalf of any ASM instance and all database instances on the same node.
- C- They listen only for the ASM instance on the same node.
- D- There can be only one node listener per node.
- E- They run from the Grid Infrastructure home by default.

Answer:

B, E

Question 6

Question Type: MultipleChoice

Which three statements are true about ASM Cloud File System (ACFS) auditing? (Choose three.)

Options:

- A-** acfsutil audit read marks audit files to indicate that it is safe to purge them.
- B-** acfsutil audit init must be run by a system administrator.
- C-** acfsutil audit purge can be run by an audit manager.
- D-** Audit information gathered by each cluster node can be consolidated into the unified ACFS audit trail.
- E-** acfsutil audit archive must be used to archive audit files that are larger than 10 MB.

Answer:

B, C, D

Question 7

Question Type: MultipleChoice

Identify three prerequisites for the successful installation of Oracle Grid Infrastructure 19c when using Full Featured Grid Naming Service (GNS). (Choose three.)

Options:

- A-** Each cluster node must have at least two network interface cards.
- B-** You must enable the Name Server Cache Daemon
- C-** A DHCP service on the private network for the cluster is required to allocate virtual IP addresses for HAIP.
- D-** A DHCP service on the public network for the cluster is required to allocate virtual IP addresses as required by the cluster.
- E-** DNS must be configured to delegate name resolution for the cluster subdomain to the cluster.
- F-** You must create a Grid Management Repository database.

Answer:

B, D, E
