Question 1

You ran a demand plan with the data refresh option "Do not refresh with current data." Identify two true statements. (Choose two.)

Options:

A- Shipments history data will not be modified.

B- Forecasting engine will run without advancing the plan date.

C- Shipments forecast data will not be modified.

D- Forecasting engine will not run.

E- Shipments history data will be updated.

Answer:

A, B

Question 2

Where do you view the collected data for Organizations, Customers, Suppliers, Carriers, and Interlocation Shipping Networks?

Options:

A- View Simulation Sets

B- Review Plan Inputs

C- Maintain Supply Network Model

D- View Collected Data

E- Planning Analytics

Answer:

C

Question 3

Question Type: MultipleChoice

Your client wants their supply plans to have a customized group of exceptions. What two steps must you complete in order to make sure only these exceptions are included when running all of your client's supply plans? (Choose two.)

Options:

A- Manage Plans > Select each supply plan > Edit each supply plan > Manually add each exception specified by client

B- Configure Exceptions > Expand Supply Planning Exceptions > Highlight lines with exceptions specified by client > Click 'Add to Exception Set'

C- Configure Exception Sets > Create exception set > Add exceptions specified by client

D- Select 'Add to Supply Plan' button > Select which supply plans you want to have this group of exceptions

E- Manage Plans > Select each supply plan > Edit each supply plan > Add your exception set to Plan Options for each supply plan

Answer:

C, E

Question 4

Question Type: MultipleChoice

On the plan page layout that you created, you have several graphs showing the status of the plans and the business. You see a concern in an area and you want to see the data behind it. What navigation should you use to see this data?

Options:

A- You cannot see it from the plan landing page, and you will need to search for the data.

B- On the table in question, go to View > Show table.

C- You cannot see it on the plan outputs, and you will need to create a new table with the information.

D- Go to Actions > View Data on the graph in question.

E- You cannot see it on the plan outputs, so you need to go into Planning Analytics and re-search the data.

Answer:

A

Question 5

Question Type: MultipleChoice

Your customer has seasonal demand and wants to generate forecast for next six months. You ran a demand plan for first time using six months of shipments history but the forecast accuracy was low.

Identify two statements that are true in this scenario. (Choose two.)

A- Running a demand plan with both shipments and booking forecast profile is required to forecast seasonal demand.

B- Running a demand plan with less than one year of history will impact seasonal analysis.

C- Running a demand plan with both shipments and seasonal shipments forecast profile is required to forecast seasonal demand.

D- Running a demand plan with six months of booking history instead of six months of shipment history is required for seasonal demand.

E- Running a demand plan with 18 to 36 months of shipments history is recommended.

Answer:

D, E

Question 6

Question Type: MultipleChoice

Which calendar is supported in the supply planning process but does not support bucketing by week?

Options:

A- Lunisolar

B- Fiscal

C- Roman

D- Gregorian

E- Julian

Answer:

E

Question 7

Question Type: MultipleChoice

Your client uses product categories and global sourcing rules for supply planning. However, their newest product doesn't follow these rules. For a specific item in the category, it needs to be sourced from a different supplier globally.

How should they set this up for the easiest maintenance, going forward?

Options:

A- Create a new global sourcing rule for the item; remove the category level assignments and create new item level assignments for all items in the category pointing each to the correct global sourcing rule.

B- Create a new local sourcing rule for the item; assign it to the assignment set at the item level; leave the category as is for the remainder of the products.

C- Create a new global sourcing rule for the item; assign it to the assignment set at the item-organization level; leave the category as is for the remainder of the products.

D- Create a new global sourcing rule for the item; assign it to the assignment set at the item level; leave the category as is for the remainder of the products.

E- Create a new global sourcing rule for the item; assign it to the assignment set at the item-organization level; alter the category to be category-organization for the remainder of the products.

Answer:
D

Question 8

Question Type: **MultipleChoice**
