Question 1

Question Type: MultipleChoice

What is the difference between implicit and explicit end flows?

Options:

- A- Implicit end flows always return an action string, whereas explicit end flows do not.
- B- Implicit end flows return values using output parameters, whereas explicit end flows do not.
- C- Implicit end flows are added as a component state, whereas explicit end flows are not.
- D- Implicit end flows do not need to be added to a flow, whereas explicit end flows do.

Answer:

D

Question 2

Question Type: MultipleChoice

When using the Web channel, what is the recommended way to configure the Web messenger?

Options:

- A-** In the dialog flow, use resource bundles in ICU format to convey configuration options to the messenger.
- B-** Use an external configuration file, such as the one used In the Oracle Web SDK sample.
- C-** Create a custom component in the dialog flow to pass configuration parameters to the messenger.
- D-** Design a component for the widget in your preferred JavaScript framework.

Answer:

B

Question 3

Question Type: MultipleChoice

Which is NOT a primary reason for implementing naming conventions for artifacts such as intent and resource bundle entries?

Options:

- A- Makes It Easter to filter and view artifacts at design time
- B- Makes it easier to debug any runtime problems with the, conversations
- C- Makes it easier for copy writers and conversation designers to locate strings and con-vernation states
- D- Makes it easier to keep the artifact names brief

Answer:

B

Question 4

Question Type: MultipleChoice

Which three tasks are key parts of the skill developer role?

Options:

- A- Establishing quantitative measures of NLP Improvements to determine the success of the model

- B-** Working closely With the integration team to ensure that the skill can make calls to the backend as needed.
- C-** Implementing conversation flows that include entity extraction, varied prompting, validation, error handling, and disambiguation
- D-** Setting up data manufacturing jobs with high-quality guidance and questions
- E-** Defining processes related to versioning and deployment, ensuring that changes are property managed and rolled out without disrupting the user experience

Answer:

B, C, E

Question 5

Question Type: MultipleChoice

What are entities in skill development?

Options:

- A-** Variables that identify key pieces of information from user input and enable the skill to fulfill a task
- B-** The definition of the skill-user Interaction

C- Functions that allow a skill to respond to users, such as outputting text or performing custom logic.

D- Categories of actions or tasks users expect your, skill to perform for them

Answer:

A

Question 6

Question Type: MultipleChoice

When you create an out-of-domain test for a skill, what should it resolve to?

Options:

A- unresolved Intent for the digital assistant

B- An intent for the digital assistant where it is in domain

C- unresolved Intent for the skill

D- An intent in the skill for which it is in domain

Answer:

A

Question 7

Question Type: MultipleChoice

How are candidate flows determined in a digital assistant?

Options:

- A-** By comparing the confidence scores for each skill's candidate flows against candidate Skills Confidence Threshold
- B-** By evaluating each intent in the candidate skills according to the Intent model for each skill
- C-** By comparing the input's confidence scores for each skill against the Built-In System In-tent Confidence Threshold setting
- D-** By comparing the confidence scores for each skill's intent model against Candidate Skills Confidence Threshold

Answer:

D

Question 8

Question Type: MultipleChoice

Which is the primary responsibility of a conversational project's business owner?

Options:

- A- Defining the use cases, goals, and measures of success for the project
- B- Ensuring viability of the NLP model, including designing Intents
- C- Designing the details of each specific flow and how these can be reused during development
- D- Being the designated expert on all things related to conversational AI

Answer:

A

Question 9

Question Type: MultipleChoice

Which three tasks are the responsibility of the conversation champion and designer?

Options:

- A- Driving conversational best practices
- B- Writing skill responses that are engaging, helpful, and empathetic
- C- Validating, dealing up, and augmenting training utterances
- D- Running conversation design workshops
- E- Designing for reuse and best practices to ensure that the skill can be easily maintained and enhanced over time

Answer:

B, C, E

Question 10

Question Type: MultipleChoice

How does explicit invocation affect routing behavior in a digital assistant?

Options:

- A- The explicitly invoked skill is automatically added to the list of candidate skills, even if the user input does not match any of its intents.
- B- The digital assistant routes to the explicitly invoked skill and does not take into account confidence scores for other skills.
- C- All the Intents of the explicitly Invoked skill are automatically considered candidate flows.
- D- All skills except for the explicitly invoked skill are ignored for the rest of the session.

Answer:

B
