Question 1

Question Type: MultipleChoice

Which four service offerings are included in Oracle Public Cloud?

Options:

- A- Database Service
- B- Data Service
- C- Java Service
- D- Security Service
- E- .NET Service
- F- SOA Service

Answer:

A, B, C, D

Question 2

Question Type: MultipleChoice

Oracle Coherence is best classified as _____?

Options:

- A- A Database Product
- B- A Middleware Product
- C- An Object Relational Mapping (ORM) Tool
- D- A Soft Load Balancer
- E- An Application Product

Answer:

B

Explanation:

Oracle Coherence 3.6 is a component of Oracle Fusion Middleware 11g.

Question 3

Question Type: MultipleChoice

To use Active Cache features in WebLogic 12C, which three libraries are needed from the WebLogic Server installation to be deployed in WebLogic Server?

Options:

- A- coherence-work.jar
- B- coherence.jar
- C- active-cache-1.0.jar
- D- coherence-web-spi.war

Answer:

B, C, D

Explanation:

B, D: In addition to the coherence.jar file, Coherence provides a deployable shared library, coherence-web-spi.war, that contains a native plug-in to WebLogic Server's HTTP Session Management interface. Coherence also provides the active-cache-1.0.jar file which contains the classes that allow WebLogic Server to interact with Coherence.

C: The active-cache-1.0.jar is included in the WebLogic Server installation.

Question 4

Question Type: MultipleChoice

What are four benefits of recommended basic architecture?

Options:

- A- Good load balancing between Presentation Tier and Object Tier
- B- Easy administration
- C- Flexible Load balancing
- D- Optimal performance
- E- Simple security

Answer:

B, C, D, E

Question 5

Question Type: MultipleChoice

In WebLogic 10.3.6 and WebLogic 12c on ExaLogic, performance of JMS is further improved through _____ and _____.

Options:

- A-** Web Session Affinity
- B-** Concurrent Request Manager
- C-** Coherence
- D-** Elastic Message Overflow

Answer:

B, D

Explanation:

D: Elastic message overflow is the ability for WebLogic JMS to take advantage of solid state disks, especially on Exalogic, for paging of JMS messages. This is especially important in spikes of traffic. Access to SSD is much faster than disks or the database, which are used for true persistent storage. This speed of writing and reading enables the system to absorb the spikes in traffic.

Question 6

Question Type: MultipleChoice

WebLogic Node Manager can be used to manage the life cycle of WebLogic servers. WebLogic Node Manager is installed and started _____.

Options:

- A-** Per Machine
- B-** Per Domain
- C-** Per Managed Server
- D-** Per Admin Server

Answer:

A

Explanation:

A Node Manager process is not associated with a specific WebLogic domain but with a machine. You can use the same Node Manager process to control server instances in any WebLogic Server domain, as long as the server instances reside on the same machine as the Node Manager process. Node Manager must run on each computer that hosts WebLogic Server instances---whether Administration Server or Managed Server---that you want to control with Node Manager.

Question 7

Question Type: MultipleChoice

What type of Java EE application can be upgraded to WebLogic 12c using the Smart Upgrade tool?

Options:

A- GlassFish

B- iAS

C- WebLogic Server 11g

D- JBoss

Answer:

B

Explanation:

Note:

* iAS: Oracle Application Server

* Oracle WebLogic Server SmartUpgrade is one several Oracle software tools that can help you upgrade your entire Oracle Application Server or Oracle WebLogic Server environment to Oracle Fusion Middleware 11g.

Question 8

Question Type: MultipleChoice

In the area of Performance Management and Diagnostics, which feature is supported in Oracle Enterprise Manager 12C?

Options:

- A-** Search information in logs across multiple domains
- B-** View different log information in single console location
- C-** Save current performance data as baseline to be used in comparison with future data
- D-** Provides single dashboard across multi-tier composite application

Answer:

A
