Question 1

Which statement is FALSE about Data Insights?

Options:

A- Data Insights displays information about patterns and anomalies in the data of entities in your Oracle Autonomous Database

B- The results of the insight analysis appear as a series of bar charts in the Data Insights dashboard

C- Data insights are automatically generated by various analytic functions built into the database

D- Data Insights provides a wide range of graphical data presentation capabilities

Answer:

B

Question 2

Which statement is FALSE about Autonomous Database maintenance on Dedicated Infrastructure?

Options:

A- Autonomous Exadata infrastructure maintenance takes place at least once each quarter

B- Autonomous Exadata infrastructure maintenance runs are for infrastructure patching (including patching of the Exadata grid infrastructure code and operating systems updates) and includes container database patching

C- You can change your container database maintenance window or reschedule a single container database maintenance run to ensure that your container database maintenance runs follow infrastructure maintenance within the same quarter

D- If a scheduled container database maintenance run cannot take place, Oracle will automatically reschedules the container database maintenance for the following quarter

Answer:

B

Question 3

Question Type: **MultipleChoice**

As a database architect, you are tasked with configuring a high concurrency, production OLTP (online transaction processing) application to connect to an Autonomous Transaction Processing database with a requirement to have some reporting queries run in parallel mode.

Which connection service is appropriate for such a workload?

Options:

A- MEDIUM

B- HIGH

C- TP

D- TPURGENT

Answer:

D

Question 4

Question Type: **MultipleChoice**

When an administrator rotates the instance wallet for an Autonomous Database on Shared Infrastructure, what happens to the regional wallets used with that instance?

Options:

A- They continue to work

B- They revert to pending

C- They are also rotated

D- They become invalid

Answer:

A

Question 5

Question Type: **MultipleChoice**

Which two statements are true about using an Oracle Autonomous Database with private endpoints?

A- Private endpoints can be configured when you clone an Autonomous Database on Shared Infrastructure that was initially created with public endpoints

B- An Autonomous Database with private endpoints can be accessed from the public Internet by adding your IP address to an Access Control List (ACL)

C- A Network Security Group (NSG) is required within your virtual cloud network before you can provision a Shared Autonomous Database to use private endpoints

D- You can configure private endpoints for an Always Free Autonomous Database

Answer:

A, C

Question 6

Question Type: MultipleChoice

Which two are ways Oracle Database can optimally access data in Object Storage?

Options:

A- Optimized data archive using hybrid partitioned tables

B- Optimized data archive using partitioned external tables

C- Scan avoidance using partitioned external tables

D- Scan avoidance using columnar pruning for .csv files

Answer:

A, C

Question 7

Question Type: MultipleChoice

Which option is not available to access data in an Autonomous JSON Database?

Options:

A- Regular Oracle SQL statements using a connection string to the database

B- Oracle Cloud Infrastructure console using the JSON Developer tool

C- REST API calls to the database

O NoSQL statements using Simple Oracle Document Access (SODA) drivers

A

Question 8

Question Type: MultipleChoice

Which three advanced options can you enable or disable while creating a business model?

Options:

A- Analytic View Base Table Query Transformation

B- Analytic View Transparency Views

C- Autonomous Aggregate Cache

D- Business Object Security Feature

E- Display Private Tables

Answer:

A, B, C
