## Question 1

---

**Question Type:** MultipleChoice

---

What determines an Account's Balance?

### Options:

---

- A- the sum of all the Financial Transactions linked directly to the service agreements related to the account
- B- the amount recorded in the "Balance Due" field on an account
- C- the logic defined in a plug-in spot on the Installations Option
- D- the sum of all the balances recorded in the "Balance Due" field on each service agreement related to the account
- E- the sum of all the Financial Transactions linked directly to the account

### Answer:

---

E

## Question 2

---

**Question Type:** MultipleChoice

---

Which statement is true about specifications?

**Options:**

---

- A- Specifications include the inspection history of an asset.
- B- Specifications apply only to assets and not to components.
- C- Specifications can include peer specifications.
- D- A single specification can only be used on one asset.

**Answer:**

---

D

## Question 3

---

**Question Type: MultipleChoice**

---

At what stage in the initial measurement data (IMD) import process will the application of meter multipliers be performed?

**Options:**

---

A- Critical Validation

B- VEE

C- Prepare for VEE

D- post-VEE

**Answer:**

---

A

## Question 4

---

**Question Type: MultipleChoice**

---

A Service Order Orchestrator determines the steps required to complete the service.

As an example, based on the state of the service point, what does the Enable Service Orchestrator determine the actions for?

**Options:**

---

- A- Create a Device Configuration; Install a Device; Turn on the Device
- B- Connect the Service Point; Install a Device; Create a Usage Subscription
- C- Create a Service Point; Install a Device; Turn on the Device
- D- Connect the Service Point; Install a Device; Turn on the Device

**Answer:**

---

C

## Question 5

---

**Question Type:** MultipleChoice

---

Which option correctly describes the high-level process from loading measurements through calculating usage?

**Options:**

---

- A- 1. Load Initial Measurements
- 2. Validate, edit, and estimate Initial Measurements
- 3. Create Final Measurements
- 4. Update Initial Measurements

- B-** 1. Load Initial Measurements
- 2. Verify, evaluate, and enter Initial Measurements
- 3. Create Final Measurements
- 4. Calculate Usage

- C-** 1. Load Initial Measurements
- 2. Validate, evaluate, and estimate Initial Measurements
- 3. Update Initial Measurements
- 4. Calculate Usage

- D-** 1. Load Initial Measurements
- 2. Validate, edit, and estimate Initial Measurements
- 3. Create Final Measurements
- 4. Calculate Usage

**Answer:**

---

B

## Question 6

---

**Question Type:** MultipleChoice

---

At what stage in the initial measurement data (IMD) import process will the application of meter multipliers be performed?

**Options:**

---

A- Critical Validation

B- VEE

C- Prepare for VEE

D- post-VEE

**Answer:**

---

A

## Question 7

---

**Question Type:** MultipleChoice

---

Which statement is true about specifications?

**Options:**

---

- A- Specifications include the inspection history of an asset.
- B- Specifications apply only to assets and not to components.
- C- Specifications can include peer specifications.
- D- A single specification can only be used on one asset.

**Answer:**

---

D

## Question 8

---

**Question Type:** MultipleChoice

---

A Service Order Orchestrator determines the steps required to complete the service.

As an example, based on the state of the service point, what does the Enable Service Orchestrator determine the actions for?

**Options:**

---

A- Create a Device Configuration; Install a Device; Turn on the Device

**B-** Connect the Service Point; Install a Device; Create a Usage Subscription

**C-** Create a Service Point; Install a Device; Turn on the Device

**D-** Connect the Service Point; Install a Device; Turn on the Device

**Answer:**

---

C

## Question 9

---

**Question Type:** MultipleChoice

---

Which option correctly describes the high-level process from loading measurements through calculating usage?

**Options:**

---

**A-** 1. Load Initial Measurements

2. Validate, edit, and estimate Initial Measurements

3. Create Final Measurements

4. Update Initial Measurements

**B-** 1. Load Initial Measurements

2. Verify, evaluate, and enter Initial Measurements
3. Create Final Measurements
4. Calculate Usage

**C-** 1. Load Initial Measurements

2. Validate, evaluate, and estimate Initial Measurements
3. Update Initial Measurements
4. Calculate Usage

**D-** 1. Load Initial Measurements

2. Validate, edit, and estimate Initial Measurements
3. Create Final Measurements
4. Calculate Usage

**Answer:**

---

B

## Question 10

---

**Question Type:** MultipleChoice

---

What determines an Account's Balance?

**Options:**

---

- A-** the sum of all the Financial Transactions linked directly to the service agreements related to the account
- B-** the amount recorded in the "Balance Due" field on an account
- C-** the logic defined in a plug-in spot on the Installations Option
- D-** the sum of all the balances recorded in the "Balance Due" field on each service agreement related to the account
- E-** the sum of all the Financial Transactions linked directly to the account

**Answer:**

---

E
