Question 1

Question Type: MultipleChoice

Consider the current values of BPEL variables InputVariable andOutputVariable:

InputVariable	OutputVariable
<ns2:query_Input> <ns2:Row_Id>808</ns2:Row_Id> </ns2:query_Input>	<ns3:query_Output> <ns3:Agent/> </ns3:query_Output>

Then consider the following BPEL activity Assign1:

part = ''query_Input''

query=''/ns2: query_Input/ns2:Row_Id''/>

part = ''query_Output''

query=''/ns2: query_Outnput/ns2:RowId''/>

Which two changes allow Assign1 to work with the current values of InputVariable andOutputVariable?

Options:

A- adding the attribute bpelx :insertMissingToData=''yes'' to line 2
B- adding the attribute bpelx :insertMissingFromData=''yes'' to line 2
C- correcting the namespace prefixes in line 5
D- correcting the namespace prefixes in line 8

Answer:

B, C

Question 2

Question Type: MultipleChoice

Identify two correct statements about Oracle Event Processing (OEP).

Options:

A- It is a platform to develop and execute applications that process streaming data.
B- It is designed to connect businesses using standards-based event communication protocols.
C- It is a powerful CQL engine that performs filtering, aggregations, calculations, and pattern matching in near real time.
D- It is an implementation of the Service Component Architecture (SCA) to process streaming data using regular expressions.

Answer:

C

Explanation:

http://www.oracle.com/technetwork/middleware/complex-event-processing/overview/sxds1213-otn-2470236.pdf

Question 3

Question Type: MultipleChoice

Which two statements accurately describe policy attachment in Oracle Web Services Manager (OWSM)?

Options:

A- The order in which policies are attached to a subject determines the order in which the policies are executed.
B- JDeveloper groups the policies that can be attached into five categories of interceptors.
C- Multiple WS-Addressing policies can be attached to a policy subject.
D- In Enterprise Manager Fusion Middleware Control, a security policy can be attached to a web service and it can be either enabled or disabled.

Answer:

A, C

Explanation:

http://docs.oracle.com/cd/E12839_01/web.1111/b32511/attaching.htm

Question 4

Question Type: MultipleChoice

Which three are proper applications of Oracle Service Bus?

Options:

A- An existing Java web service is made available to clients running transports and protocols not originally planned by the original developers. No modifications to the web service implementation are required.
B- A request is transformed and routed to an appropriate service endpoint based on the content of the request message. All complexity of the supporting runtime protocol selection is hidden
C- A request for a large graphics job is split into smaller pieces that are processed in parallel by an existing rendering service. After all of the pieces have been processed, the results are joined to create a single response.
D- A request containing a complex family tree is validated before being routed to an existing genealogy service. Recursive logic is implemented to validate that all relationships in the tree are consistent.
E- A request for a background check is conditionally routed between multiple third-party validation services with different service-level agreements. Remediation must be handled if any one of the validation service calls fails.

Answer:

A, C, D

Question 5

Question Type: MultipleChoice

The identity context is opaque to your web service client and web service and you don't need to perform any additional coding or processing in your client or service to support it after you enable identity context propagation.

Which Oracle SOA Suite component directly enables this behavior?

Options:

A- Oracle Web Service Manager Policy Manager
B- Oracle BPEL Process Manager
C- Oracle Enterprise Manager
D- Oracle User Messaging Service

Answer:

D

Explanation:

https://docs.oracle.com/middleware/1212/ums/UMSAG/introduction.htm

Question 6

Question Type: MultipleChoice

Which two statements are correct about the Oracle Enterprise Scheduler Service (ESS) facility?

Options:

A- It is a Java EE application that is deployed to WebLogic Server to provide distributed job request processing across a single WebLogic Server or a collection of WebLogic Servers.
B- It is shipped as a separate product and you can install it after you have completed the SOA Suite installation.
C- It is used extensively by Fusion Applications so it is well-tested.
D- It is administered via the WebLogic Server Administration Console.

Answer:

A, D

Explanation:

http://docs.oracle.com/cd/E23943_01/web.1111/e13702/deploy.htm

Question 7

Question Type: MultipleChoice

In a BPEL model, what is the quickest way to implement a capability to skip rule execution if a particular condition holds?

Options:

A- Model a switch activity to conditionally execute the business rule component.
B- Use a skip condition on the business rule component.
C- Include an XPath expression in an annotation on the business rule component.
D- Use a correlation set on the business rule component.

Answer:

C

Question 8

Question Type: MultipleChoice

Which two statements are true about Complex Event Processing (CEP)?

Options:

A- It is a method to achieve the best outcome in a model where data is already stored in a relational database.
B- It is a technique used for querying data prior to it being stored within a database or without it ever being stored.
C- It is a highly efficient method of analyzing and processing streams of data.
D- It is a technique for rapidly storing large amounts of unstructured data.
E- It executes extremely complex queries against a database using a new query language.

Answer:

B, D
