## Question 1

---

**Question Type:** MultipleChoice

---

Adopting a naming convention can have some benefits. Of the sentences below, which one is NOT a benefit of adopting a naming convention?

**Options:**

---

- A- Enforce the reference architecture.
- B- Avoid error codes.
- C- Normalize patterns.
- D- Reveal the nature of each Module.

**Answer:**

---

B

## Question 2

---

**Question Type:** MultipleChoice

---

Consider the common style guide scenarios presented in this course. Which of the following statements is true?

**Options:**

---

- A-** The 'specialize a built-in Style Guide' scenario should be used when the changes to the base theme are not extensive.
- B-** The 'clone a built-in Style Guide' should be used when you want to extend an existing theme.
- C-** Build-your-own Style Guide should be used when the changes in the theme are not extensive.

**Answer:**

---

A

## Question 3

---

**Question Type: MultipleChoice**

---

Which of the below is NOT a weak dependency as of OS11?

**Options:**

---

- A- Screens
- B- Static Entities
- C- Server Actions
- D- Database Entities
- E- Service Actions
- F- Local Storage Entities
- G- Structures

**Answer:**

---

C

## Question 4

---

**Question Type:** MultipleChoice

---

Which of the following is an Assembling principle?

**Options:**

---

- A- Keep concepts with different lifecycles apart.
- B- Join all integrations into a single Module.
- C- Disclose business concepts and integration needs.
- D- Isolate all business concepts.

**Answer:**

---

A

## Question 5

---

**Question Type:** MultipleChoice

---

Consider the following Module names and the suggested naming conventions for Modules. Which of these is a mobile Module?

**Options:**

---

- A- Customer\_CW
- B- Mobile\_API
- C- Service\_CS

D- Pricing\_MBL

**Answer:**

---

D

## Question 6

---

**Question Type: MultipleChoice**

---

In the Architecture Canvas, where should the API module sit in?

**Options:**

---

A- Core Layer

B- End-User Layer

C- Foundation Layer

**Answer:**

---

A

## Question 7

---

**Question Type:** MultipleChoice

---

Foundation may have non-business services and business services in them

**Options:**

---

**A-** TRUE

**B-** FALSE

**Answer:**

---

B

## Question 8

---

**Question Type:** MultipleChoice

---

Which of the below is NOT a Synchronization Best Practice for mobile application?

## Options:

---

- A- Sync only when required. p At session start: sync summary data to local storage At process start: sync process detail to local storage  
At process/transaction end, sync back to server
- B- Only synchronize delta : Use control timestamps
- C Avoid long synchronization in a single transaction
- D- Sync only when strictly required
- E Don't sync on every screen or online event
- F- Only synchronize relevant data
- G- Do not use Entity Bulk Operation to ensure small lightweight updates
- H- Ensure sync granularity: Prepare for constant retries without repeating work due to network loss. Sync in chunks, incremental by entity

## Answer:

---

D

## Question 9

---

**Question Type:** MultipleChoice

---

Which of the following is NOT a benefit of having well-defined application architecture?

**Options:**

---

A- Poor service abstraction

B- Reduces costs

C- Reduces risk

D- Supports planning

**Answer:**

---

A
