Question 8

Question Type: MultipleChoice

Which two items are required when a VM-100 BYOL instance is upgraded to a VM-300 BYOL instance? (Select two.)

Options:

- A- UUID
- B- new Auth Code
- C- CPU ID
- D- API Key

Answer:

B, D

Explanation:

In a public cloud deployment, if your firewall is licensed with the BYOL option, you must deactivate VM before you change the instance type or VM type and apply the license again on the firewall after you complete the model or instance upgrade. When you change the instance type, because the firewall has a new UUID and CPU ID, the existing license will no longer be valid.
