Question 1

Question Type: MultipleChoice

Which proprietary technology solutions will allow a customer to identify and control traffic sources regardless of internet protocol (IP) address or network segment?

Options:

- A- User ID and Device-ID
- B- Source-D and Network.ID
- C- Source ID and Device-ID
- D- User-ID and Source-ID

Answer:

A

Question 2

Question Type: MultipleChoice

Which statement is true about Deviating Devices and metrics?

Options:

- A- A metric health baseline is determined by averaging the health performance for a given metric over seven days plus the standard deviation
- B- Deviating Device Tab is only available with a SD-WAN Subscription
- C- An Administrator can set the metric health baseline along with a valid standard deviation
- D- Deviating Device Tab is only available for hardware-based firewalls

Answer:

A

Question 3

Question Type: MultipleChoice

A company has deployed the following

- * VM-300 firewalls in AWS
- * endpoint protection with the Traps Management Service
- * a Panorama M-200 for managing its VM-Series firewalls
- * PA-5220s for its internet perimeter,
- * Prisma SaaS for SaaS security.

Which two products can send logs to the Cortex Data Lake? (Choose two).

Options:

- A- Prisma SaaS
- B- Traps Management Service
- C- VM-300 firewalls
- D- Panorama M-200 appliance

Answer:

C, D

Question 4

Question Type: MultipleChoice

What helps avoid split brain in active / passive high availability (HA) pair deployment?

Options:

- A- Enable preemption on both firewalls in the HA pair.
- B- Use a standard traffic interface as the HA3 link.
- C- Use the management interface as the HA1 backup link
- D- Use a standard traffic interface as the HA2 backup

Answer:

C

Question 5

Question Type: MultipleChoice

Which two configuration elements can be used to prevent abuse of stolen credentials? (Choose two.)

Options:

- A- WildFire analysis
- B- Dynamic user groups (DUGs)
- C- Multi-factor authentication (MFA)
- D- URL Filtering Profiles

Answer:

C, D

Question 6

Question Type: MultipleChoice

What two types of certificates are used to configure SSL Forward Proxy? (hoose two.)

Options:

- A- Enterprise CA-signed certificates
- B- Self-Signed certificates
- C- Intermediate certificates
- D- Private key certificates

Answer:

A, B

Explanation:

%20certificate.&text=Certificate%20Name-,,unique%20name%20for%20each%20firewall

Question 7

Question Type: MultipleChoice

Which built-in feature of PAN-OS allows the NGFW administrator to create a policy that provides autoremediation for anomalous user behavior and malicious activity while maintaining user visibility?

Options:

- A- Dynamic user groups (DUGS)
- B- tagging groups
- C- remote device User-ID groups
- D- dynamic address groups (DAGs)

Answer:

A

Question 8

Question Type: MultipleChoice

A Fortune 500 customer has expressed interest in purchasing WildFire; however, they do not want to send discovered malware outside of their network.

Which version of WildFire will meet this customer's requirements?

Options:

- A- WildFire Private Cloud
- B- WildFire Government Cloud
- C- WildFire Secure Cloud
- D- WildFire Public Cloud

Answer:

A

Question 9

Question Type: MultipleChoice

An Administrator needs a PDF summary report that contains information compiled from existing reports based on data for the Top five(5) in each category Which two timeframe options are available to send this report? (Choose two.)

Options:

- A- Daily
- B- Monthly
- C- Weekly
- D- Bi-weekly

Answer:

A, C

Question 10

Question Type: MultipleChoice

When HTTP header logging is enabled on a URL Filtering profile, which attribute-value can be logged?

Options:

- A- X-Forwarded-For
- B- HTTP method
- C- HTTP response status code
- D- Content type

Answer:

A

Question 11

Question Type: MultipleChoice

When having a customer pre-sales call, which aspects of the NGFW should be covered?

Options:

- A- The NGFW simplifies your operations through analytics and automation while giving you consistent protection through exceptional visibility and control across the data center, perimeter, branch, mobile and cloud networks
- B- The Palo Alto Networks-developed URL filtering database, PAN-DB provides high-performance local caching for maximum inline performance on URL lookups, and offers coverage against malicious URLs and IP addresses. As WildFire identifies unknown malware, zero-day exploits, and advanced persistent threats (APTs), the PAN-DB database is updated with information on malicious URLs so that you can block malware downloads and disable Command and Control (C2) communications to protect your network from cyberthreats. URL categories that identify confirmed malicious content --- malware, phishing, and C2 are updated every five minutes --- to ensure that you can manage access to these sites within minutes of categorization
- C- The NGFW creates tunnels that allow users/systems to connect securely over a public network, as if they were connecting over a local area network (LAN). To set up a VPN tunnel you need a pair of devices that can authenticate each other and encrypt the flow of information between them. The devices can be a pair of Palo Alto Networks firewalls, or a Palo Alto Networks firewall along with a VPN-capable device from another vendor
- D- Palo Alto Networks URL Filtering allows you to monitor and control the sites users can access, to prevent phishing attacks by controlling the sites to which users can submit valid corporate credentials, and to enforce safe search for search engines like Google and Bing

Answer:

D
