Question 1

Question Type: MultipleChoice

What is feature of Autonomous Digital Experience Management (ADEM)?

Options:

- A-** It applies configuration changes and provides credential management, role-based controls, and a playbook repository.
- B-** It provides customized forms to collect and validate necessary parameters from the requester.
- C-** It natively ingests, normalizes, and integrates granular data across the security infrastructure at nearly half the cost of legacy security products attempting to solve the problem.
- D-** It provides IT teams with single-pane visibility that leverages endpoint, simulated, and real-time user traffic data to provide the most complete picture of user traffic flows possible.

Answer:

D

Question 2

Question Type: MultipleChoice

What are two benefits provided to an organization using a secure web gateway (SWG)? (Choose two.)

Options:

- A-** VPNs remain connected, reducing user risk exposure.
- B-** Security policies for making internet access safer are enforced.
- C-** Access to inappropriate websites or content is blocked based on acceptable use policies.
- D-** An encrypted challenge-response mechanism obtains user credentials from the browser.

Answer:

B, C

Question 3

Question Type: MultipleChoice

Which product enables organizations to open unknown files in a sandbox environment and scan them for malware or other threats?

Options:

- A- network sandbox
- B- SD-WAN
- C- cloud access security broker (CASB)
- D- remote browser isolation

Answer:

A

Question 4

Question Type: MultipleChoice

Which product draws on data collected through PAN-OS device telemetry to provide an overview of the health of an organization's next-generation firewall (NGFW) deployment and identify areas for improvement?

Options:

- A- Cloud Identity Engine (CIE)

- B- DNS Security
- C- security information and event management (SIEM)
- D- Device Insights

Answer:

D

Question 5

Question Type: MultipleChoice

How does SaaS Security Inline provide a consistent management experience?

Options:

- A- user credentials required before accessing the resource
- B- uses advanced predictive analysis and machine learning (ML)
- C- automatically forwards samples for WildFire analysis
- D- integrates with existing security

Answer:

D

Question 6

Question Type: MultipleChoice

What are two benefits of installing hardware fail-to-wire port pairs on Instant-On Network (ION) devices? (Choose two.)

Options:

- A-** local area network (LAN) Dynamic Host Configuration Protocol (DHCP) and DHCP relay functionality
- B-** control mode insertion without modification of existing network configuration
- C-** network controller communication and monitoring
- D-** ensures automatic failover when ION devices experience software or network related failure

Answer:

D

Question 7

Question Type: MultipleChoice

Which App Response Time metric is the measure of network latency?

Options:

- A- Round Trip Time (RTT)
- B- Server Response Time (SRT)
- C- Network Transfer Time (NTTn)
- D- UDP Response Time (UDP-TRT)

Answer:

A

Question 8

Question Type: MultipleChoice

How does SaaS Security Inline provide a consistent management experience?

Options:

- A- user credentials required before accessing the resource
- B- uses advanced predictive analysis and machine learning (ML)
- C- automatically forwards samples for WildFire analysis
- D- integrates with existing security

Answer:

D

Question 9

Question Type: MultipleChoice

What are two benefits of installing hardware fail-to-wire port pairs on Instant-On Network (ION) devices? (Choose two.)

Options:

- A- local area network (LAN) Dynamic Host Configuration Protocol (DHCP) and DHCP relay functionality
- B- control mode insertion without modification of existing network configuration
- C- network controller communication and monitoring
- D- ensures automatic failover when ION devices experience software or network related failure

Answer:

D

Question 10

Question Type: MultipleChoice

Which product enables organizations to open unknown files in a sandbox environment and scan them for malware or other threats?

Options:

- A- network sandbox

B- SD-WAN

C- cloud access security broker (CASB)

D- remote browser isolation

Answer:

A

Question 11

Question Type: MultipleChoice

Which product draws on data collected through PAN-OS device telemetry to provide an overview of the health of an organization's next-generation firewall (NGFW) deployment and identify areas for improvement?

Options:

A- Cloud Identity Engine (CIE)

B- DNS Security

C- security information and event management (SIEM)

D- Device Insights

Answer:

D

Question 12

Question Type: MultipleChoice

What are two benefits provided to an organization using a secure web gateway (SWG)? (Choose two.)

Options:

- A-** VPNs remain connected, reducing user risk exposure.
- B-** Security policies for making internet access safer are enforced.
- C-** Access to inappropriate websites or content is blocked based on acceptable use policies.
- D-** An encrypted challenge-response mechanism obtains user credentials from the browser.

Answer:

B, C
