Question 1

Question Type: MultipleChoice

Which one of the following is an example of Direct Cost?

Options:

- A- Legal fees
- B- Damaged brand perception
- C- Negative public relations
- D- Reduced customer satisfaction

P2P
exams

Answer:

A

Explanation:

Legal fees are an example of direct cost because they can be directly attributed to a specific project, product, or service. Legal fees are incurred for the purpose of obtaining legal advice, drafting contracts, resolving disputes, or complying with regulations related to the core business activity. Legal fees are not general overhead expenses that are shared by multiple cost objects.

Question 2

Question Type: MultipleChoice

What is the purpose of a service corridor?

P2P
exams

Options:

- A- To create a secure and conditioned environment where media can be stored in a controlled manner.
- B- It is a generic name for pathways leading to other rooms that contains facility supporting equipment like the UPS room, battery room, generator room etc.
- C- It provides a safe, vented and secure area where standby generators can operate safely.
- D- It provides a secure area where supporting facilities can be serviced and monitored on a 24x7 basis without disturbing the computer room.

Answer:

D

Explanation:

A service corridor is a dedicated space within or adjacent to a data centre that allows access to the supporting facilities, such as power, cooling, fire suppression, security, and cabling systems, without interfering with the computer room operations. A service corridor helps to isolate the noise, vibration, heat, and dust generated by the supporting facilities from the sensitive equipment in the computer room. A service corridor also enhances the safety and efficiency of the maintenance and monitoring activities, as well as the flexibility and scalability of the data centre design.

P2P
exams

Question 3

Question Type: MultipleChoice

Which one of the following represents the three elements (oxygen, heat and fuel) to interact in order for the fire to exist?

Options:

- A- The Fire Hexagon
- B- The Fire Class
- C- The Fire Triangle
- D- The Fire Technology

P2P
exams

Answer:

C

Explanation:

The fire triangle is a simple model that illustrates the three elements a fire needs to ignite: heat, fuel, and an oxidizing agent (usually oxygen). A fire naturally occurs when the elements are present and combined in the right mixture. A fire can be prevented or extinguished by removing any one of the elements in the fire triangle.
